September MS Predictions MMMonVHF -
Even if no big meteor showers hit the Earth in September, this month deserves lot of interest by MS enthusiasts. Sporadic Meteors flux is at its annual maximum in this period, thus providing relatively good rates especially during morning hours. Some minor to medium showers (Alpha-Aurigids, September Epsilon-Perseids, Sextantids and others) will also add significant meteor rates. Have a look to shower predictions for September 2011 at our MMM MS-Propagationpage: www.MMMonVHF.de/ms.php [MMMonVHF]

MESSAGE: (#2224) MS0INT - EU189
AUTHOR: Col MM0NDX
DATE: August 29, 2011 at 16:39 UTC
A team of four highly experienced IOTA (Islands On The Air) amateur radio activators are planning to operate from the extremely rare and dangerous Isle of Rockall. Accompanied by an experienced climber, they aim to land and stay for 48 hours in late May 2012, in what will be considered one of the most ambitious island activations the ham radio world has seen.
The four radio operators George Moreno EA2TA, Christian Cabre EA3NT, Simon Gadaleta IZ7ATN and Col McGowan MM0NDX are all part of the larger and highly successful MS0INT IOTA adventure group, which has had previous transmitting success from St. Kilda, the Monach Isles and the Flannan Isles. Completing the team is Nick Hancock, a climber with considerable expedition experience in remote and inhospitable places, increasing the chances of activating the island.

10344. Log Book of The World

Folks,
As we all know, the ham age is getting much older. The majority
of the hams today are
over 50 years of age. One only has to read the Silent Keys in each
issue of 425 DX News
to understand the problem.
This is not an endorsement of the ARRL. LOTW is much more
important that just a way of
obtaining an award from a radio club. If every DX station , Qsl
Manager and all hams uploaded
their logs to LOTW, all contacts made could be confirmed whether
something happens to the
DX station or Qsl Manager. If log books, data are lost by individuals,
a copy would still be in the
LOTW archives. Routine uploads to LOTW would preserve these precious logs.
I would like to encourage everyone to take the time to learn
about and upload your log book
to LOTW. The contact you made with a station just might be the most
important contact for him
or you.

The Board of Directors of The Yasme Foundation (www.yasme.org) became aware that 25 club members were scheduled to take the amateur radio license examination in late July and that the fee for taking the exam was about one month's salary in Ethiopia.
Accordingly, the Board voted unanimously in favor of a grant to cover one-half of the examination fees for all 25 applicants, the remaining one-half having been previously committed from the Radio Society of Great Britain. Yasme Vice-President and Director Fred Laun, K3ZO, was instrumental in making possible this grant. [TNX W6SZN]

I thought members may want to know about the ODXG Dxpedition to
Vanuatu this year. Myself and 5 other VK3s along with 2 operators from
the USA will spend 12 days operating as YJ0VK. Please visit our web site
for further details

http://yj0vk.odxg.org <http://yj0vk.odxg.org/>

We?d be very pleased to work FISTS members and hope that a contact with
us would credit for the FISTS award (as I am a FISTS member). Also, not
relevant for the VK members, but we have received authorisation to
operate on 60 metres, which will certainly be of interest to some members.

All the details of our operation are on our web site, as well as a Guest
book where people can leave questions, comments etc. As usual with such
ventures, we have a fair freight charge we?ll need to pay, so any small
donations will be gratefully received.

Hope to hear you guys from YJ0.

Fall is almost here, which means the opening of CQ WW season with RTTY on
24-25 September. This is arguably the most popular RTTY contest of the year
with over 15,000 stations participating last year and 2681 logs submitted.
There are no significant rules changes but be sure to read through them so
you are not surprised (http://www.cqwwrtty.com/rules.htm).

HOWEVER, prior to this there is the short 75 Baud contest, the second BARTG Sprint 75

of 2011. This takes place as follows:

17:00 - 21:00z Sunday 18th September 2011 Full rules to be found at:

http://www.bartg.org.uk/documents/Contests/sprint75/BARTG%20Sprint%2075%20Rules%20Septembe

Look forward to seeing some of you in this, a nice warm-up, being only 4 hours long, for
the CQ WW.

Please send your logs and also any supporting pictures for the BARTG Web site to:

logs@...

Regards from Roger, G3LDI BARTG Chairman.

4W6A TIMOR-LESTE (EAST TIMOR) DXPEDITION SEPTEMBER 16 ? 26, 2011

PRESS RELEASE NUMBER 6: September 9, 2011

This is the sixth and final press release before the 4W6A DXpedition. The bulk of the equipment, including the linear amplifiers, the Titanex V160E vertical, Hexbeam and other antennas, left Darwin, Australia, on 6 September. It has all arrived safely in Dili, Timor-Leste, and is now awaiting the arrival of the team next week.

9M6DXX and 9M6XRO leave Malaysia on 12 September for a transit stop in Bali, from where they plan to be active 'holiday style' as YB9/G4JVG and YB9/GM3OOK respectively. Unfortunately, due to a late change of airline timetable, they will not now arrive in Dili before the afternoon of Friday 16 September. The chartered boat taking the team and the equipment to Atauro Island has therefore been rescheduled to later that afternoon.

It is likely that only one or two stations will be on the air that day as the team will run out of daylight before all the antennas can be erected. The remainder of the antenna work will commence at first light the following morning (approximately 2115UTC on 16 September) and 4W6A should be fully operational by the morning (UTC) of 17 September.

4W6A will be QRV on all bands 10 to 160 metres, using CW, SSB and RTTY with up to four stations simultaneously. It is hoped that log search will be available, thanks to the Clublog facility (go to www.4w6a.com/qsl-information/log-search), but this is dependent on a reliable Internet connection being available on the island. Col, MM0NDX, is the pilot for 4W6A and is responsible for providing feedback to the team. He may be contacted atdxer59@...

The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Direct or bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS) athttp://m0urx.com/oqrs (there is also a link from the 4W6A website at www.4w6a.com/qsl-information).

We look forward to having fun in the pile-ups and we hope you have fun chasing 4W6A. 73, The 4W6A Team.

4W6A TIMOR-LESTE (EAST TIMOR) DXPEDITION SEPTEMBER 16 - 26, 2011

PRESS RELEASE NUMBER 6: September 9, 2011

This is the sixth and final press release before the 4W6A DXpedition. The bulk of the equipment, including the linear amplifiers, the Titanex V160E vertical, Hexbeam and other antennas, left Darwin, Australia, on 6 September. It has all arrived safely in Dili, Timor-Leste, and is now awaiting the arrival of the team next week.

9M6DXX and 9M6XRO leave Malaysia on 12 September for a transit stop in Bali, from where they plan to be active 'holiday style' as YB9/G4JVG and YB9/GM3OOK respectively. Unfortunately, due to a late change of airline timetable, they will not now arrive in Dili before the afternoon of Friday 16 September. The chartered boat taking the team and the equipment to Atauro Island has therefore been rescheduled to later that afternoon.

It is likely that only one or two stations will be on the air that day as the team will run out of daylight before all the antennas can be

erected. The remainder of the antenna work will commence at first light the following morning (approximately 2115UTC on 16 September) and 4W6A should be fully operational by the morning (UTC) of 17 September.

4W6A will be QRV on all bands 10 to 160 metres, using CW, SSB and RTTY with up to four stations simultaneously. It is hoped that log search will be available, thanks to the Clublog facility (go to www.4w6a.com/qsl-information/log-search), but this is dependent on a reliable Internet connection being available on the island. Col, MM0NDX, is the pilot for 4W6A and is responsible for providing feedback to the team. He may be contacted at dxer59@...

The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Direct or bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS) at http://m0urx.com/oqrs (there is also a link from the 4W6A website at www.4w6a.com/qsl-information).

We look forward to having fun in the pile-ups and we hope you have fun chasing 4W6A. 73, The 4W6A Team.

CASHOTA to hold UK & IRE heritage event -

Castles And Stately Homes On The Air will be holding a UK & IRE Heritage event during the month of September to coincide with the European Heritage Month. This is an opportunity to access locations that may previously have been inaccessible or closed to the public. Details on activations appear on the CASHOTA website, www.cashota.co.uk/ The group has also set the dates for CASHOTA's annual Castles weekend in 2012. The event will be held over two weekends on 18 and 19 May and 25 and 26 May. New and previous participants are encouraged to take part. More details can be found at www.cashota.co.uk/ [GB2RS]

Hello Folks,

There is a very interesting new group of Amateurs on the block.
In the UK and Europe we know RAOTA to be, "The Radio Amateurs Old Timers Association". Well now you also have to think of "RAOTA" as being the "Rest Areas On The Air" Society. Their Founder is Brian K0MCM.
Rest Areas On The Air - RAOTA
The Interstate Highway Rest Area Society was created to promote amateur radio mobile HF operations across the U.S.of A.
Their website (www.ihras.net) is online and accepting "free" memberships from across the country.
They will be coordinating and matching up mobile operators, with others in the ham community, who wish to start making contacts and collecting QSL cards from Rest Areas across the country.
Their Inaugural Event will be "Rest Areas On The Air" November 23 - 27 2011 which is the busiest travel weekend of the year. (Details will follow).

A Yahoo group has been formed to coordinate activities on a regular basis.

DX MAGAZINE MOST WANTED SURVEY ---> The DX Magazine's annual Most Wanted Survey is being conducted now through 15 October. The survey form is available at www.dxpub.com/dx_survey2011.html (please note that it is not a complete list of all DXCC Entities: if you need something that is not listed, simply use the "Additions or Comments" space at the end of the form). The ST0R confirmations are not expected to be available before the deadline for the new Entity to be included in this survey, so South Sudan is not on the form this time.
The overall results will be published in the January-February 2012 issue of The DX Magazine, and the world-wide results will be posted to the web site around 15 January 2012 as well. The breakdown by mode/Low Bands will be published in the March-April 2012 issue of the magazine.

IARU REGION 1 HF BAND PLAN ---> The 22nd General Conference of IARU Region 1, held at Sun City (South Africa) on 13-19 August, made some changes to the Region 1 HF Band Plan. On 40 metres the CW contest preferred segment was withdrawn, and four new 10m FM Repeater channels were introduced which required a shift of the 10m FM Simplex channels. The revised Band Plan can be found at www.iaru-r1.org

As I mentioned in a previous post, I have made two new data file uploads to the web pages.
The last one made just now is GO1109-A2. I have received sufficient info to warrant these
two additional data file uploads.

They way I am collecting data and the new sources of DX info is making these additional uploads
possible. This will give you the info sooner rather than later when a DXpedition is on the air. I am
getting better info on vacation style operations in advance which allows me to have the info in
the data file for you. This week I made three uploads. Monday, Thursday and now Friday. I will not
receive any new info until Monday and I will make the upload either Monday or Tuesday.

Hope that having the info more often will be of good use to you.

Hi folks,
Again I am asking for your assistance.
If you are going on a vacation that includes ham radio, I would
like you to send me the information about your trip. If your operating
call sign is different than your personal call or if your are using "
/P " then it can go into the Golist database. Also be reminded that I
am now working with IOTA islands and their reference numbers. This
data is also requested.
If you plan to be a part of a organized DXpedition, please let me
know the call sign, Qsl manager and any IOTA info and Dates of operation.
As hard as I try, I just can not find, verify, and list all the
DX operations that occur. Your assistance getting valid info to me is
greatly appreciated.
Send any data for the Golist database and DX Alert to my email
golist<at>gmail.com
Thank you for your help and data.

Hi friends
PJ4C // Official Bulletin No 2 :
On the way back from our last dxpedition in Africa, TJ9PF, we already had lots’of ideas for our next trip: Africa, Asia and Pacific.
After a few month of hard work we had to cancel many of them for different reason (mostly security related to the last events in the world). Some others were just too expensive for our team.
Finally we have chosen to go to Bonaire (PJ4) because we found a place to accept all our equipment and operators. Thanks to the help of Peter PJ4NX everything has been organised very fast.
So we will be PJ4C from 12 to 23 January 2012.
This year our goal will be 80 000 Qso in 11 days, and maybe get the rtty world record back home. As usual we will operate 3 modes SSB, CW and RTTY with as least 6 stations, 24 ops, and 24h/day.
Team members are experienced operators: F4AJQ, PJ4NX, K4SV, I2VGW, N2WB, DJ7JC, DJ9RR, OE3GCU, OE3JAG, ON7RN, F1HRE, F1NGP, F4DLM, F5EOT, F5VHQ, F6BIV, F6ENO, F6JMT, F8BJI, F9IE, PA0R, OZ1IKY, F2VX, F5QF, F8ATS.
Your could find all information on our web site _http://www.pj4c.com_ (http://www.pj4c.com/)
All the team hope to hear you in the pileups, welcome in this new dx-pedition by F6KOP'Team.

On behalf of the whole 4W6A team, I am writing to thank you for your sponsorship of this DXpedition. It is thanks to the sponsorship of DX clubs and foundations, as well as donations from many individuals, that we have been able to ship most of the heavy equipment from Australia toEast Timor in advance of the operation. This will allow us to operate with up to four linear amplifiers simultaneously and so allow us to put out a better signal on all bands. Without the sponsorship we would have had to rely on what we could physically carry with us on the aircraft.

Team members leave their homes next week and all are scheduled to arrive onAtauro Island,East Timor, by the afternoon of Friday, 16 September. We hope to have one or two stations on the air that same day and all four stations active by the morning (UTC) of 17 September.

We have noted the conditions under which your support has been offered and will do our absolute best to comply with all those conditions. We will be in touch with you once again after the conclusion of the DXpedition.

Once again, thank you for your kind support and we look forward to putting as many of your members as possible in the 4W6A log.

Helsinki
September 14, 2011

CONTESTING SEASON BEGINS AT RADIO ARCALA

As a refreshing and warm summer now turns to autumn with falling leaves, making room for signal take-offs, the Radio Arcala team is getting ready
for two Nordic contesting highlights - Scandinavian Activity Contest CW September 17-18 and SSB October 8-9, 2011.

On CW, Radio Arcala’s mothership OH8X is to be piloted by Ilkka, OH1WZ while the new Arcala cluster station in Aland, OH0X will be under Toni's, OH2UA
command. Last year’s winner Pasi, OH6UM will be at the helm of OH2BH trying to defend his CW/SSB victories.<http://www.sactest.net/>

Besides preparing for the SSB leg, they are also making efforts to activate OJ0X from Market Reef. A separate release will be issued this week.

The whole Nordic region is up at arms, and you can contact your friends throughout Scandinavia in their fierce annual country-to-country competition.

So, what were the latest methods used by Radio Arcala’s young team to get ready for this season? Go and have a look but don't try it out from your own 50-foot towers. See them in action at<www.radioarcala.com>

It has all arrived safely in Dili, Timor-Leste, and is now awaiting the arrival of the team next week.

9M6DXX and 9M6XRO leave Malaysia on 12 September for a transit stop in Bali, from where they plan to be active 'holiday style' as YB9/G4JVG and YB9/GM3OOK respectively. Unfortunately, due to a late change of airline timetable, they will not now arrive in Dili before the afternoon of Friday 16 September. The chartered boat taking the team and the equipment to Atauro Island has therefore been rescheduled to later that afternoon.

It is likely that only one or two stations will be on the air that day as the team will run out of daylight before all the antennas can be erected. The remainder of the antenna work will commence at first light the following morning (approximately 2115UTC on 16 September) and 4W6A should be fully operational by the morning (UTC) of 17 September.

4W6A will be QRV on all bands 10 to 160 metres, using CW, SSB and RTTY with up to four stations simultaneously. It is hoped that log search will be available, thanks to the Clublog facility (go to www.4w6a.com/qsl-information/log-search), but this is dependent on a reliable Internet connection being available on the island. Col, MM0NDX, is the pilot for 4W6A and is responsible for providing feedback to the team. He may be contacted at dxer59@...

The QSL manager is M0URX, direct (SAE plus 1 IRC / $2), via the bureau, or LoTW. The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Direct or bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS) at http://m0urx.com/oqrs (there is also a link from the 4W6A website at www.4w6a.com/qsl-information).

We look forward to having fun in the pile-ups and we hope you have fun chasing 4W6A. 73, The 4W6A Team.

MARKET REEF, OJ0X, TO BE ACTIVATED FOR THREE WEEKS BY 12 BRAVE MEN

With the kind cooperation of the Finnish Lighthouse Society and their transportation partner, Captain Mats Sjostrom of Aland Islands, Radio Arcala, OH8X and their associates are announcing a 3-week DXpedition to Market Reef - OJ0X - to commence on September 19, 2011, weather permitting.

The operation was originally scheduled to begin this week but with the tail end of Hurricane Katia, the waters of Aland Islands were stormy with waves as high as 5 meters. Challenging the current weather conditions, the group of DL3DXX, DH7SA, DL5CW and SP5XVY is due to arrive in Aland Islands to attempt landing on the morning of September 19.

You can follow the happenings via the Market Reef Diary at<http://www.majakkaseura.fi/eng/market> and observe the latest weather conditions as measured and transmitted from the actual lighthouse at<http://www.g3txf.com/dxtrip/OJ0X/OJ0X.html> Please note that autumn winds should be less than 5 m/s for a comfortable landing.

This first group plans to run three stations, especially on WARC and low bands, but also in the CQWW RTTY Contest.

It will be followed on September 27 by OH1TV, OH2BAD, OH2BO, OH5BM to take up where the previous group left off.

And finally, by October 4, more bands and the SAC SSB Contest will be covered by G3TXF, OH2BH, OH2PM, SM0W, SM6U.

Their announced frequencies are:

CW: 1813 or 1826.5, 3523, 7023, 10123, 14003 or 14033, 18083 or 18083, 21003 or 21033, 24893 or 24903, 28003 or 28033
SSB:1843, 3770, 7070, 14170, 18130, 21280, 24960, 28490
RTTY: 10140, 18108

Log search will be available at<http://www.clublog.org/expeditions.php> but it may not be updated daily due to poor Internet access from Market Reef.

10382. FSDXA Christmas Island DXpedition - Bulletin No.4

FSDXA Christmas Island DXpedition - Bulletin No.4

It’s been one of those years. Spratly and Jarvis had to be postponed and now our own, T32C, expedition has hit some logistical problems in that our container with its 6 tonnes of kit got as far as T30 (Tarawa), but onward shipping to T32 has proved impossible, despite our best efforts and promises from those involved in 3D2, T30 and T32. The ship that was due to bring our container from Tarawa has broken down and is being towed to Fiji for repairs.

WHAT NOW
So what happens now? The answer is that we will go ahead anyway. The team is complete and set to go, the hotel is expecting us, and the sunspots seem to be on the increase.

Thanks to Yaesu, our Global Sponsor, we will have ten FT-450D radios, which we will hand carry to T32, along with several lightweight linears. Yaesu’s support has been absolutely outstanding. We will also take enough hardware to set up verticals and vertical arrays for all bands 160 through 10. It may even be possible to run multiple stations on some bands, though not to the extent that we had previously planned. All our computer equipment was to be hand-carried in any case, so daily log updates to ClubLog (see Bulletin 3) will be unaffected. Unfortunately, unless our container makes an unlikely late arrival on the island, 6m EME will have to be abandoned, and we will not have the 4-square arrays for 30 and 40. But we will do our best to set up phased systems or other antenna configurations to achieve gain, especially towards Europe where will continue to focus our efforts.

TIMINGS
The expedition dates are unaffected, but we cannot realistically expect to have stations running on nine bands by the first weekend, though we will aim to be on some bands, at least. As we will not have everything pre-kitted, there will be a lot of building and configuration work to do once we arrive at Christmas. The good news is that we are there for nearly four weeks and will be operating through four weekends, so there should be plenty of opportunity to get into our log.

WEBSITE
As always, but especially in these new circumstances, the trick is to keep a close eye on our website. Do keep checking it for updates, both before and during the expedition:www.t32c.com You will also find details there of how to interact with us once we start operations – your feedback will be especially important so that we can maximise every band opening.

From: "Ralph Sutton" <zl2aoh@...>
Hi everyone The 2011 Oceania DX contest is now only 2 weeks away, with the Phone SSB section on the first weekend in October and the CW section on the second weekend. This is a great opportunity to work a lot of DX stations in the Oceania area, as well as giving your station a test drive for the new DX contest season and the big CQ WW contest events later in the year. The aim of the contest is to promote HF contacts with stations in the Oceania region. Oceania stations can work other Oceania and non-Oceania stations. Non-Oceania stations can only work Oceania stations. We are expecting a good turn out from VK, ZL and YB stations, as well as stations from some of the rarer South Pacific entities. In particular, the Oceania Amateur Radio DX Group which sponsors two of the contest plaques, is undertaking a major DXpedition to Vanuatu and will be active with the callsign YJ0VK in both the Phone and CW sections – see http://yj0vk.odxg.org/ for more information. The 2011 contest is also recognised as a qualifying event for Oceania contesters that are interested in seeking selection for the next World Radiosport Team Championship (WRTC) in 2014. See http://wrtc2014.org/team-selection/ for more information about the WRTC and team selection. Here is brief summary of the rules for the 2011 contest: PHONE: 08:00 UTC Saturday 1 October to 08:00 UTC Sunday 2 October CW: 08:00 UTC Saturday 8 October to 08:00 UTC Sunday 9 October Bands: 160M to 10M (excluding WARC bands). Exchange: RS(T) + serial number. QSO points: 20 points per QSO on 160M; 10 points on 80M; 5 points on 40M; 1 point on 20M; 2 points on 15M; and 3 points on 10M. Final Score: The sum of the QSO points multiplied by the number of prefixes worked (the same prefix can be counted once on each band). Entry Categories: Single Operator All Band Low Power (max 100W) Single Operator All Band High Power Single Operator Single Band Low Power (max 100W) Single Operator Single Band High Power Multiple Operators and Single Transmitter (only one transmitted signal at any time) Multiple Operators and Two Transmitters (no more than two transmitted signals at any time and on different bands) Multiple Operators and Multiple Transmitters (no more than one transmitted signal at any time on each band) Shortwave Listener (receive only) All Band A range of trophies and plaques will be awarded as listed on the web site at http://www.oceaniadxcontest.com/trophies.htm. Certificates will be awarded to the winning stations in each of the categories above - for each continent and country. A participation certificate will also be awarded to every station that makes at least one valid QSO. Deadline: All logs must be emailed or postmarked NO LATER than 7 November 2011. More information about the contest, including the detailed rules, is available from the Oceania DX Contest web site at http://www.oceaniadxcontest.com/index.html 73 and we look forward to

MARKET REEF - OJ0X - MESSAGE FROM DL3DXX, DH7SA,
DL5CW & SP5XVY

After a one-day delay, we finally made it. Perfect weather
yesterday for our landing; more wind today but in spite of that
you will find the logs uploaded for the first night. We are still in
the process of establishing our stations and antennas. That
means we are quite busy; the SteppIR is working fine, and we
have 30M and 40M dipoles up and running so far. Will erect
the Titanex, weather permitting today. 30M sounded like a lot
of Aurora, with difficult propagation into USA and Japan, and
a huge pileup from Europe on the first night. But we worked
a lot of DX, including the US West Coast and Midwest. No
generator problems so far; with so much power from the six
windmill generators, the diesel generator has not been fired
up yet.

As some of you know we have been forced to postpone our trip to Nauru due to airline problems. The trip to Nauru C21A will now take place sometime in 2012 all being well. So that the trip is not a total disaster we will all still be qrv as 3D2A and 3D2T from Oct26th thru to Nov9……. Then we will all travel to Tuvulu on Nov 10 and be active till Dec 5 as T2T. Unfortunately due to major work commitments Art NJ7N has been forced to pull out so we have a vacancy for a good operator. ……. If your interested send an email to vk4fw@... <mailto:vk4fw@...> . The new web site www.t2t.pacific-dxers.com <http://www.t2t.pacific-dxers.com> has been set up for all news updates.

As with Nauru we have to air freight all equipment into Tuvulu with us and we trust that you will make donations via paypal to dxpedition@... <mailto:dxpedition@...>

."""" I would hope that the above news release is published asap …..
thanks to all dx outlets

- C21A UPDATE -
As some of you know we have been forced to postpone our trip to Nauru
due to airline problems. The trip to Nauru C21A will now take place
sometime in 2012 all being well. So that the trip is not a total
disaster we will all still be qrv as 3D2A and 3D2T from Oct26th thru
to Nov9... Then we will all travel to Tuvulu on Nov 10 and be active
till Dec 5 as T2T. Unfortunately due to major work commitments Art

NJ7N has been forced to pull out so we have a vacancy for a good
operator. .... If your interested send an email to
vk4fw@... <mailto:vk4fw@...> . The new web site
www.t2t.pacific-dxers.com <http://www.t2t.pacific-dxers.com> has been
set up for all news updates.

As with Nauru we have to air freight all equipment into Tuvulu with us
and we trust that you will make donations via paypal to

ON THE AIR: RADIO AMATEURS TAKE TO THE AIR TO SUPPORT NATIONAL
WILDLIFE REFUGE WEEK -
Amateur Radio operators will be on the air in observance of the 2011
National Wildlife Refuge Week, October 8-16. This event will coincide
with festivals and special events at refuges that help connect people
with nature at the country's more than 500 National Wildlife Refuges.
Radio amateurs are helping spread the word about the National Wildlife
Refuge System by operating from refuges during National Wildlife Refuge
Week. This event is a chance to combine Amateur Radio's communication
capabilities with enjoyment of the outdoors, while helping others learn
about the National Wildlife Refuge System (NWRS). Hams will highlight
refuge features, wildlife and geography when making contact with other
stations across North America. Operators will make contact using SSB,
CW and various digital modes, including RTTY and PSK31. Read more here

DL - Markus, DJ4EL will be active as DJ4EL/p from Helgoland-Duene (EU-127) from 30 September to 3 October. He plans to be QRV on 40, 17 and 12 metres. QSL via home call and LoTW. [TNX rsgbiota.org]
DL - DF6LPC, DJ9IE, DL3HBZ, DL8HAL and DL5HAQ will be active as DK0RZ from Hallig Hooge (EU-042) on 5-8 October. They plan to operate CW, SSB and PSK31. QSL via bureau. [TNX rsgbiota.org]

FP - Martin, G3ZAY and others will be active from the island of Miquelon (NA-032) on 24-30 September. Look for FP/G3ZAY, FP/G4EAG, FP/M0BLF, FP/M0TOC, FP/M0VFC and FP/M1BXF to be QRV with four stations on 80-10 metres CW and SSB, possibly with some 160m operation. QSL via home calls.
FR - Willi, DJ7RJ will be operating as FR/DJ7RJ from Reunion Island (AF-016) on 4-26 October. He will operate CW and SSB on 160-10 metres, with a focus on the low bands using a 500 watt amplifier into an inverted L antenna. QSL via home call, direct or bureau. [TNX NG3K]
GM - The MM0RAI/p team will depart for Rockall (EU-189) on 24 September, one day later than previously announced [425DXN 1062]. Look for hem to be signing ON4ATW/mm during the 4-day voyage from Antwerp to the island. Bookmark www.rockall.be for updates.
GM - A group of operators from the Workington Radio Club and the Sands Contest Group will be active as MS0WRC from the Isle of Tiree (EU-008) on 1-8 October. QSL via G0MTD, direct or bureau. [TNX rsgbiota.org]

PA - Ric, DL2VFR will be active as PA/DL2VFR from Ameland Island (EU-038) between 30 September and 6 October. He will operate mainly CW. QSL via home call, direct or bureau. [TNX rsgbiota.org]
SV5 - Villy, LA4GY will be active as SV5/LA4GY from Rhodes (EU-001) between 25 September and 10 October. He plans to operate QRP on 40-6 metres CW, SSB and digital modes. QSL via home call, direct or bureau, and LoTW. [TNX rsgbiota.org]
T2 - The C21A DXpedition to Nauru [425DXN 1049] has been postponed until next year, as the airline "could not guarantee the flight due to internal problems". A new destination has been arranged and now "most of the same team" (namely K4ZLE, NL8F, VK4AN, VK4FW, VK4NEF and W5SL) will be active as T2T from Tuvalu (OC-015) from 11 November to 8 December. They will operate SSB, CW, RTTY and PSK31 on 160-6 metres with 3-4 stations. QSL via VK4FW. The log will be uploaded to LoTW and eQSL within 12 months. Further information can be found at http://t2t.pacific-dxers.com/
T32 - The T32C expedition to Christmas Island "has hit some logistical problems", G3XTT reported on 16 September. The container "with its 6 tonnes of kit got as far as T30 (Tarawa), but onward shipping to T32 has proved impossible, despite our best efforts and promises from those involved in 3D2, T30 and T32. The ship that was due to bring our container from Tarawa has broken down and is being towed to Fiji for repairs".
The team will go ahead anyway. They will have "ten FT-450D radios, which we will hand carry to T32, along with several lightweight linears. We will also take enough hardware to set up verticals and vertical arrays for all bands 160 through 10. It may even be possible to run multiple stations on some bands, though not to the extent that we had previously planned. All our computer equipment was to be hand-carried in any case, so daily log updates to ClubLog will be unaffected. Unfortunately, unless our container makes an unlikely late arrival on the island, 6m EME will have to be abandoned, and we will not have the 4-square arrays for 30 and 40. But we will do our best to set up phased systems or other antenna Configurations to achieve gain, especially towards Europe where will continue to focus our efforts".
The expedition dates (28 September-26 October) are unaffected, "but we cannot realistically expect to have stations running on nine bands by the first weekend, though we will aim to be on some bands, at least. As we will not have everything pre-kitted, there will be a lot of building and configuration work to do once we arrive at Christmas".
Check the expedition's website (www.t32c.com) for updates on the latest happenings and for interacting with the team once they start operations - "your feedback will be especially important so that we can maximise every band opening".

LATEST FROM MARKET REEF

Talking to Market Reef today found happy campers
with everything working well and DL3DXX& SP5XVY
getting ready to run the RTTY Contest multi-single.
This will be the very first time OJ is activated for the CQWW RTTY Contest. Good luck on contacting
OJ0X over the weekend.

The other two operators - DL5CW and DH7LA -
continue to run two more stations, mostly on WARC
bands plus 160M. The 160M Titanex of DL3DXX
fame will be kept up for the next two weeks, and the
follow-up group will keep 160M busy. The change of
operator crew is scheduled for Tuesday, and the weather looks cooperative at this point.
See the weather report:
<http://www.g3txf.com/dxtrip/OJ0X/OJ0X.html>

The lighthouse has a new 3kW wind generator
that keeps sixteen 200Ah batteries charged. When
reaching the low limit, a 5kW generator automatically
starts charging the batteries. The total available
power is three times 5kW, that is 15kW. So this is
why OJ0X is running three stations with amps
without making their hands dirty:
<http://www.oh6vm.org/market/>

Also, the group is supported by a Finnish
Lighthouse Society person who provides hot
meals twice a day. Our DXpeditioners report good
food quality and quantity.

A poor Internet connection eliminated log search
updates last night but they will try again over the
weekend.

It has been a great week of fighting against
Mother Nature and making people happy on
several odd bands and modes, such as 12M, and
a lot of camaraderie among those working on
the barren rock. That's when international
DXpeditioning is always at its best.

10406. Planning for Golist

Folks,
Time has come for me to make a decision about the future of
Golist. With the terrible economy and less than good band conditions,
renewals for Golist products continue to decline. One decision has
been made. I will discontinue the FREE One year subscriptions
to GoWin on DEC 31 2011. This will affect the programs with DX4WIN,
WIN EQF* and the major DX conventions for 2012.
All subscription with ending dates in 2012 will be honored and no
change in service will be made. I now have to decide if I will accept
New Users and Renewals for the year 2013.
This means renewals in January 2012.
I will continue to accept new users and renewals till the end of
Dec 2011 for the 2012 year. If I make the decision to cease business,
I will make that announcement here on or around the middle of Dec 2011.
Most of you have been with me for many years and the Golist has
become a tool you use everyday. I would like to hear from those of you
that use the Golist and learn what you think I should do. I want to
continue to serve everyone as this is the major part of the Amateur
Radio experience for me now. It keeps me in touch with the DXers. It
must pay its way and right now that is a big question. Not many new
DXer's are interested in programs like mine. They internet provides
all their information (a lot of it bad info), but they seem happy with
it. It does not look good for Golist unless renewals pick up and new
users join the Golist family.
Those of you who care, please let me hear from you directly or
via the reflector.

TODAY MONDAY, SEPT.26 ON MARKET REEF, OJ0X

Sorry for the sad news that Nigel, G3TXF cannot make it to OJ0.
Its a magic place - you will miss a lot.

The team is in fine spirit and we have just up-loaded QSOs up to this point
- totally 18,316.
And after all, we had succeeded with 2600 QSOs in CQWW RTTY, after terrible
beginning.

See log search and more on OJ0X at QRZ.com

We were ready to start at 00:00z but with the first CQ the computer crashed
and after restart microham did not work again. Took us hours to re-install everyhting but it did not help and after several hours we decided to go to sleep. In the morning Robert tried again and finally succeeded. We lost about 7 hours in the beginning and another hour when the Alpha 91B died and
during short power cuts.

HIgh bands were in good shape but hard to compete against all the high power
stations in EU. Without internet and the possibility to find and work multipliers and without having a second station for multiplier hunting we do
not have a chance for a top position. We simply could not get the second station working in RTTY.

Learning: Never use borrowed equipment in a contest that have never played together and not has been tested before

Now we are up to the last day. The weather is still fine but more wind is predicted so we hope to meet the next team; Pekka, OH1TV, Miika, OH2BAD, Ilmo, OH2BO and Tapani, OH5BM tomorrow as they have left Finland and should
arrive in
Alands early on Tuesday morning.

73 and greetings from the team
Dietmar

Folks,
My inbox has been full yesterday and today. I have heard from
many subscriber that will not be
due for renewal until late 2012 and they are encouraging me to
continue producing the Golist products.
I will admit this response has picked my spirits up quite a bit. Past
history tells me not to continue, but
it is hard to quit when so many answered my plea for encouragement.
/*GOLIST WILL CONTINUE, No ShutDown

TUESDAY, SEPTEMBER 27 AT OJ0X

It did not look too promising this morning but suddenly the weather changed enough and the contracted skipper Mats Sjostrom decided to attempt an evening landing on Market Reef. As we speak, the landing is in progess at 1600 UTC today, Tuesday.

Captain Mats comes with an Aland Islands sea rescue background and knows exactly how to handle marine operations. We are grateful to Mats for his dedicated work.

As you read this, a new 2nd week team may hit the airwaves and set up shop on Market for another week. The full lineup of antennas and equipment can easily be switched on.

We should applaud the homecoming group for a superb effort of more than 20.000 QSOs, and hopefully we will see them landing safely tonight in Aland Islands, OH0. It's another "rare one" under their belts plus many happy people around the world. The second week of OJ0X activity is now starting. You can follow the proceedings at

6 METRES & UP -

MS Propagation info from MMMonVHF for October -
This month the attention of meteor enthusiasts will be captured by the return of Draconids meteor shower. In fact, several Researchers have forecasted an Outburst of Draconids on October 8th. Even if no meteor storm is expected, there is a general consensus that the evening UT hours of October 8 should produce ramarkable Draconids activity. Many mathematical models predict the outburst around 20h UT, but the ZHR level is hard to predict, though. Usual Orionids shower and a good background of sporadic meteors will ensure good opportunities for MS Dxing the rest of the month. Have a look to shower predictions for October 2011 at our MMM MS-Propagation page: www.MMMonVHF/ms.php [MMMonVHF]

FSDXA Christmas Island DXpedition
Bulletin No.6

This Bulletin is written Friday afternoon Christmas Island time. We have been busy the past two days erecting antennas for all bands 160 through 10, as well as setting up stations and the IT network, which interconnects all logging positions and provides lots of data for helping us plan the operating schedules once we are under way. Everything has gone well during set-up, with great co-operation from the staff of the Captain Cook Hotel. For the record, our advance party (G3NUG, G3USR, DK1II) made around 1800 QSOs on 10 and 20m, using 100 watts (FT-450D) to a small vertical by the sea, so we are confident that we should be able to make a big impression on the bands once we are fully operational.

Our plan is to commence operations at midnight local time today here in Christmas, which is 1000 UTC Friday 30th September. We expect to be active on several bands from the start.

We do, however, have only one station per band for the time being, so for the first few days will probably alternate modes on a (roughly) 24 hour basis. On the non-WARC bands we expect to start on CW and then, at 1200 UTC on Saturday, move to SSB and make a serious multi-multi entry in the Oceania contest (which runs for 24 hours). This should get our SSB operations off to a great start. We are able to work all comers in the contest, so we very much want your call, whether you are taking part or just need a T32 QSO. We will give you a contest report (RS+serial number); if you are taking part please give us your serial number in return.

OTHER DXPEDITIONS
We are very much aware that there are other expeditions active at this time, and will take every care to avoid causing any sort of mutual QRM. This may well mean that we operate on frequencies other than those that we pre-announced. No doubt we will be spotted on the Cluster network, in any case.

ONGOING PLANS
We remain committed to maximising band openings to Europe, but expect the number of callers in the first few days to make this difficult if not impossible. But bear in mind that we will be active for 3 weeks and four weekends, so there should be plenty of opportunities (propagation permitting) for a QSO. We will continue to send out news and photographs when the opportunity arises – our website is being regularly updated by webmaster G3WPH and those of who you who use Twitter can follow us on G7VJR’s Twitter feed (@G7VJR).

T32C ---> This is the FSDXA Christmas Island DXpedition Bulletin No.6, realeased by Don Field (G3XTT) on 30 September.
"This Bulletin is written Friday afternoon Christmas Island time. We have been busy the past two days erecting antennas for all bands 160 through 10, as well as setting up stations and the IT network, which interconnects all logging positions and provides lots of data for helping us plan the operating schedules once we are under way. Everything has gone well during set-up, with great co-operation from the staff of the Captain Cook Hotel. For the record, our advance party (G3NUG, G3USR, DK1II) made around 1800 QSOs on 10 and 20m, using 100 watts (FT-450D) to a small vertical by the sea, so we are confident that we should be able to make a big impression on

the bands once we are fully operational.
Our plan is to commence operations at midnight local time today here in Christmas, which is 1000 UTC Friday 30th September [recte: Saturday 1 October, ed.]. We expect to be active on several bands from the start. We do, however, have only one station per band for the time being, so for the first few days will probably alternate modes on a (roughly) 24 hour basis. On the non-WARC bands we expect to start on CW and then, at 1200 UTC on Saturday, move to SSB and make a serious multi-multi entry in the Oceania contest (which runs for 24 hours). This should get our SSB operations off to a great start. We are able to work all comers in the contest, so we very much want your call, whether you are taking part or just need a T32 QSO. We will give you a contest report (RS + serial number); if you are taking part please give us your serial number in return.
OTHER DXPEDITIONS: We are very much aware that there are other expeditions active at this time, and will take every care to avoid causing any sort of mutual QRM. This may well mean that we operate on frequencies other than those that we pre-announced. No doubt we will be spotted on the Cluster network, in any case.
ONGOING PLANS: We remain committed to maximising band openings to Europe, but expect the number of callers in the first few days to make this difficult if not impossible. But bear in mind that we will be active for 3 weeks and four weekends, so there should be plenty of opportunities (propagation permitting) for a QSO. We will continue to send out news and photographs when the opportunity arises - our website is being regularly updated by webmaster G3WPH and those of who you who use Twitter can follow us on G7VJR's Twitter feed (@G7VJR)".

+ SILENT KEYS + Helio "Carl" Carlota (PY2DBU) passed away on 25 September. A highly respected member of the Brazilian amateur radio community, he was a serious DXer and certificate hunter, and also served an IOTA Checkpoint in the past.

OJ0X SEPTEMBER 1 REPORT

There is no doubt autumn is approaching the North and the weather is becoming rather unstable. The second group - OH1TV, OH2BAD, OH2BO, OH5BM - has experienced the full variety while radio propagation hit the rock bottom. It is not often that Northern Lights are visible on the latitude of Market Reef - now the Aurora Borealis was seen on the last day of the German group but alsothe current second week's Finnish group.There were predictions of a recovery ofband conditions for this weekend – but no signs of it yet.

Worse is expected again on the horizon, andthe forecast for next Tuesday is high winds. Hence the group for the third week will need to travel to Aland Islandsearly to be stand-by fora potential advanced outing.

If you are still in need of some band points, you may watch the weather reports at http://www.g3txf.com/dxtrip/OJ0X/OJ0X.html direct from the Market Reef automatic weather station. There the Titanex 160/80M vertical may be taken down today as preparation for early departure as well as for poor propagation on the low bands.

But the spirits remain high among the group as they have passed 30.000 QSO and

eagerly wait for 10M to open up. Nevertheless, the third week's group - OH1ND, OH2BH, SM0W and SM6U - may take advantage of any 10 & 12M openings to all regions of the world.

OJ0X also experienced some curious magic as UPS delivered a new RF choke for their burned

Alpha 91B amplifier. Thanks to quick action from Acom Bulgaria, the choke arrived in Finlandthe

following day. Unfortunately, UPS’s one-day service anywhere in Europedid not extend to Market

Reef. Hopefully the next group will be able to bring the third amplifier back on line.

Are you guys in the audience having any fun yet? With 60.000 hits at QRZ.COM, some of you are still there. The band slot race is still there with ON7GB and LZ1NG leading Europewith 20 points while Asia's JA4DND is close behind (19).The US East Coast is suffering from poor

propagation with K5EK running far behind at 14 points. Just enjoy the
log search facility operated by Nigel, G3TXF
www.clublog.org/charts/?c=OJ0X but save any queries until the
operation is finished.

T32C Bulletin #7 (Press Release)

We have now been operating for four days and have passed the 50,000 QSO milestone. There is still almost 3 weeks to go, so those who are still needing us on various bands and modes have many opportunities still to come. This bulletin is by way of a summary of what has been done and what is planned.

Bear in mind that this has turned out to be something of an unplanned Field Day style operation, and we now have no expectations of our container of equipment arriving while we are here on Christmas Island. Instead, the team hand carried just over one metric tonne of equipment (poles, cables, radio gear, computers, etc) to the island. We are extremely grateful to all those who loaned equipment at short notice to help enable the expedition to take place and be successful. Inevitably we have had teething problems, as we have a variety of amplifiers, Microham routers, etc. where we would, ideally, like to have standard equipment and interfaces. Fortunately the transceivers are consistent as Yaesu came to our rescue with the loan of ten FT-450D radios at very short notice.

Antenna-wise, we have two-element vertical dipole arrays by the sea for 20 through 10, quarter-wave verticals with elevated radials for 30 and 40, a quarter wave vertical with ground radials for 80 and a 15m high T antenna with ground radials for 160. We also have two Beverage receive antennas for 160 and now have additional vertical dipoles for 10, 15 and 20 to allow us to retask the low band stations as second stations on those bands when LF is closed. We are continually refining our antenna systems within the limits of the wire, poles and coax that we have here, though the second tranche of operators who arrive in a week's time will bring more.

We started our SSB operations at the weekend with an entry in the Oceania SSB contest in which we believe we have comprehensively beaten the previous contest records. We will not, however, be entering the CW leg as this would undoubtedly lead to a lot of unnecessary duplicate contacts as we will by then have been very active on CW on all bands.

There has been high demand for Christmas Island, especially on LF and also on 10 and 12 where, for many years, there has been little or no propagation. So far the sunspots have been helping those bands along, with 10m being our QSO leader to date. We have pretty much been working all comers to clear the decks so that we can begin to focus more on Europe where band openings are much more limited than to the US and Japan. We would appreciate cooperation from those two areas - US and Japanese stations should find plenty of opportunity to work us on all bands. We did have to delay starting our RTTY operations - our original plans would have allowed us to be on RTTY right from the start. The good news is that RTTY is now well under way on several bands. If 10m continues to play well, we may even show up on FM!

On 160, we made our first European contacts last night, Italy and Germany and at our sunset and Russia, Ukraine and Finland at our sunrise. Hopefully these openings will improve over the next week or two. 80m shows a similar pattern but with longer openings, but right now only our topband station has access to the Beverages.

We will continue to make regular updates on our website and Michael G7VJR will no doubt update Twitter while he is here (he leaves with the first group next week). The online log on ClubLog is getting a very high hit rate, as expected - we are uploading logs twice a day, at 7am and 7pm local time here. The Internet connectivity from the hotel is turning out to be better than we had anticipated (since our site visit a year ago the hotel has installed a satellite Internet), and not only does this make log uploading easier but has meant that we have been able to follow everyone's feedback better than expected - we are grateful for that and it feeds into our daily team meetings. There is a feedback facility on the t32c.com website, which is the best way to reach us.

Finally, for that small but enthusiastic group of 6m EMEers, we are still hoping to give this mode a go in the second two weeks of the expedition, but cannot at this time make any guarantees.

Report received from Martti, OH2BH / OJ0X

-- 73 Jarmo OH2BN

MARKET REEF WITH NEW BLOOD - OCTOBER 4

It was at noon on Tuesday when the second and third week teams changed on the fly and quickly put
fresh energy and two signals on the air again, now with a repaired Alpha 91B. It works! From now on OH1ND, OH2BH, SM0W and SM6U are in command.

An exhausted team of OH1TV, OH2BAD, OH2BO and OH5BM was sent home to get on with life as landlubbers again. Their 16.500 QSOs were added to the Log Search facility at QRZ.COM, now totaling some 37.000.

With lots of IT expertise and new data equipment, it still seems that the Internet is not reliable and more work needs to be done. The teams left four people on the small island of Ensk?r between OH0 and OJ0 to install a new cell site so traffic can be boosted for data and news delivery to the outside world.

After running their first thousand QSOs, mostly on 15m SSB to Japan and USA, the ops heated the island sauna behind the breakwater and enjoyd their new remote life.

They now have three complete stations, squeezing all available power from the wind generator charged plant. The overall target is set at 50.000 QSOs, and they have decided not to leave the reef before that goal is accomplished.

The wind is gathering momentum but the team is safe.

MM0RAI/p EU189 QSL policyThursday, 06 October 2011 06:12 | Written by Marc Cosemans | The log has been uploaded to LoTW. All individual sponsors (both 2009 and 2011) will get a “free”direct QSL card via mail, no need to send a SASE to our manager! (provided you worked us of course). Make sure your address is correct on QRZ.COM! Bureau cards will be put in the QSL’ing system in November. Members of the GDXF and MDXC will have their cards a little sooner. The QSL card has to be designed and printed so sit back and wait. If the online log does not show your callsign send an e-mail to ON4ATW . VK - AUSTRALIA
For the month of November 2011 the special callsign VK100ARV will be well sought after and qualifies toward the Amateur Radio Centenary Award. For images visit QRZ.com.
This year is the 100th anniversary of the Amateur Wireless Society of Victoria, formed in 1911, quickly changing its name to the Wireless Institute of Victoria, and today is known as Amateur Radio Victoria.
A special QSL card is on offer for contact with VK100ARV. On the front it features defining words capturing the spirit of the founding of the organisation and a gallery of Presidents and the information panel on the back.
The Amateur Radio Centenary Award certificate has a montage of the organisation over the decades. Both the QSL card and certificate are worth obtaining for display and will show the Centenary logo.
Valid contacts with VK100ARV earn ten bonus points towards the Award.
Contact with VK3WI during the Remembrance Day Contest, International Lighthouse and Lightship Week, and the Oceania DX Phone Contest October 1 & 2, and the Oceania DX CW Contest October 8-9 also gained bonus points.
For Australian stations a total of 100 points are required and DX stations 25 points. Valid contacts with members during the celebratory period August 1 to November 30, 2011, earns two points towards the award.
Also in the celebration are stations set up in Victorian National Parks operating under the Keith Roget Memorial National Parks Award (KRMNPA) rules, on November Friday 18 through to Sunday 20.
The Award Manager Tony Hambling VK3VTH vk3vth@... thanks all who have so registered for VK100ARV or the extended weekend focused on the KRMNPA.
A roster for VK100ARV will appear on the website www.amateurradio.com.au and

a list of National Parks and times also.
The Centenary has already featured the successful world's first DATV QSO Party from the digital amateur television repeater VK3RTV. Peter Cossins VK3BFG gave a presentation of the highlights, which by all accounts went extremely well.

3D2R ---> It went QRT from Rotuma earlier than originally planned, at 11
UTC on 5 October. The team expected to depart the island at 12 UTC, and to
reach Suva (Fiji) on the 8th. The final log update will be uploaded upon
arrival in Suva. The 3D2R log search can be found at
www.qslnet.de/member/yt3w/yt1ad/logsearch.php.

CQ DX MARATHON ---> CQ Magazine has announced "a significant expansion in
the number of DX Marathon plaques to be awarded each year". Presently there
are only two plaques (for the top Unlimited Class and for the top Formula
Class scores); starting with the announcement of the 2011 Marathon results
(June 2012), additional plaques will be awarded for the top CW, top SSB,
top Single Band (10, 12, 15, 17, 20, 30, 40, 80) and top Continental
scores. An additional sponsor for top Digital Mode score is desired.
Please contact the DX Marathon Administrator, K9EL (k9el[@]dxmarathon.com)
if you wish to sponsor this plaque. Details on the new plaques and
qualifying scores can be found on DX Marathon website (www.dxmarathon.com).

MALPELO 2012 ---> The Malpelo 2012 DXpedition's team now consists of 18
operators representing eight countries. Two members of the team will travel
to Malpelo for a reconnaissance visit in late October. The purpose is to
check out possible operating sites and make final decisions on the type and
placement of antennas, as they want to try to have antennas oriented for
all parts of the DX world.
Every effort is being made to extend the length of time available for

operating. It appears that they can get to the island one day earlier and may have the option of staying a few extra days.The current plan has the team QRV on or about 23 January for 12-14 days. Operations are planned on 160 through 6 metres on CW, SSB and one digital mode. N2OO and the SJDXA will handle QSL duties.
The Malpelo team is paying all their transportation expenses to/from Colombia and putting up about one-half of all the DXpedition costs. To cover the remainder of our expenses, contributions are being sought from DX Foundations, DX Clubs and individual DXers. You may contribute directly to DXARC (Colombia), K4UEE (North America), DJ9ZB (Europe) or JA1ELY (Asia/JA). See www.hk0na.com for further information on how you can help. [TNX K4UEE]

ROCKALL ---> Patrick, ON4HIL and Rudi, ON7YT were active on 40m as MM0RAI/p from Rockall (EU-189) from 15.45 UTC on 1 October until 06.52 UTC on the 2nd. The logsearch is now up and running at www.rockall.be

SAC SSB ---> The Scandinavian Activity SSB Contest will be held on 8-9 October, from 12 to 12 UTC. Radio Arcala has set up a special DX Summit sub-page (www.dxsummit.fi/sac) so you can follow the Nordic country-to-country battle and also find exclusively individual Nordic spots. [TNX OH2BN]

T32C ---> The DXpedition to Christmas Island has passed the 60,000 QSO milestone (57% CW, 40% SSB and 3% RTTY, but the team is "making an effort to increase the RTTY percentage").
This "has turned out to be something of an unplanned Field Day style operation", G3XTT reported on 5 October, "and we now have no expectations of our container of equipment arriving while we are here on Christmas Island. Instead, the team hand carried just over one metric tonne of equipment (poles, cables, radio gear, computers, etc) to the island".
Antenna-wise, they have "two-element vertical dipole arrays by the sea for 20 through 10, quarter-wave verticals with elevated radials for 30 and 40, a quarter wave vertical with ground radials for 80 and a 15m high T antenna with ground radials for 160. We also have two Beverage receive antennas for 160 and now have additional vertical dipoles for 10, 15 and 20 to allow us to retask the low band stations as second stations on those bands when LF is closed. We are continually refining our antenna systems within the limits of the wire, poles and coax that we have here, though the second tranche of operators who arrive in a week's time will bring more".
The current continental percentages are 54% NA, 24% AS, 17% EU, 5% others: "we have pretty much been working all comers to clear the decks so that we can begin to focus more on Europe where band openings are much more limited than to the US and Japan". The latest press release, as well as the logsearch and a feedback facility, can be found on the T32C website (www.t32c.com).

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi

3D2RI ---> This is the callsign of the new Rotuma Island High School Club Station, established thanks to the equipment donated by the 3D2R DXpedition team. The new Club Station has been active since 6 October. QSL via KH6CG.

425 DX NEWS MAGAZINE ---> The September 2011 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

FUNDING FOR OPERATIONS FROM RARE IOTA GROUPS ---> "With the 50th Anniversary IOTA Marathon [425DXN 1042, ed.] starting in January it would be great if we could get together a list of organisations who would be prepared in principle to help fund operations from the rarer IOTA groups during this two year period. Without lots of operations from this tier of IOTA groups the marathon will not achieve the success it deserves. For this purpose we have decided that "rarer IOTA groups" means groups worked by less than 33% of record-holders at the start of day 1 of the operation. Would DX funding bodies and individuals who are prepared to contribute to this two year IOTA initiative please let me know on g3kma[@]dsl.pipex.com. The intention is that grants would be made directly by contributors to the operation involved as is current usual practice, not through the IOTA Committee. However if we get a good response, we will consider providing some additional funding from a source of funds available to the IOTA Committee." Full details on the 50th Anniversary Marathon can be found at (www.rsgbiota.org). [TNX G3KMA]

MS0INT (ROCKALL 2012) POSTPONED ---> "With careful consideration and much deliberation, we have decided to postpone our intended activation of the islet for at least one year", Col MM0NDX says (see www.eu189.com for the complete release issued on 8 October). "This decision was not taken easily considering our planning and organisational aspects were going extremely well. Suffice to say, we believe an activation so soon after the Belgian effort [MM0RAI/p, ed.] now makes Rockall a less attractive target - that is the crux of our decision. It is not lost on us that the majority of the world, outwith a proportion of Europe, still require EU-189 for their IOTA scores. With that in mind, this planned activity will not be cancelled, only postponed".
Instead of Rockall, MM0NDX and his team are organizing an operation from "another excellent location", which "involves a rare DXCC and IOTA". Further information will be released "one week before departure, sometime in mid-2012".
Wolf Harranth, OE1WHC reports that "a comprehensive Rockall web page from early plans in the mid-60's (with hinterto unpublished documents) to MM0RAI/p including an interview with Patrick, ON4HIL" has been compiled by Documentary Archives Radio Communications and can be found at www.dokufunk.org/rockall

QSL AT0ULH ---> The QSL cards for the 19-21 August operation from the lighthouse at Uttan Point have been printed and Deepak, VU2CDP is mailing them out. Email requests for bureau cards can be sent to vu2cdp[@]yahoo.co.in. He plans to send out the bureau cards "as part of my annual dispatch to the VU buro in December". [TNX VU2CDP]

SPRINT CONTEST ---> The Michurinsk Contest Group and Tambov division of SRR organize an Autumn Sprint Contest that will be held on 21 October, from 14 to 18 UTC, on 160,80 and 40 metres CW and SSB. Complete details can be found at http://rw3rq.tamb.ru/sprint_eng.htm [TNX RN3RQ]

T32C ---> "We have been asked to be more precise about our 80/160m scheduling at European sunrise", the T32C team wrote on 14 October. "Starting today (Friday 14 October), we will operate CW on 80m for two days at European sunrise, then we will operate 1 day on SSB. The pattern will be repeated, so CW days will be 14, 15, 17, 18, 20, 21, 23, 24 October. SSB days will be 16, 19, 22, 25 October. On 160m we are always on CW from our sunset to Western European sunrise".
T32C now has over 131,000 QSOs in the log, including 70k with North America, 25k with Asia and 30k with Europe: "as the JA and US pile-ups continue to diminish", the team reported on 10 October, "we hope the percentage of EU will increase. However, the decline in solar activity since we first started has not helped. That said, we are on track to set at least a few new records".
They continue "to cover as many band/mode openings as we can, with the equipment we carried here. We are currently able to operate two stations simultaneously on 10, 15 and 20 and are looking at being able to do the same on 12 and 17 to make the most of the main band openings, but with limited coaxial cable
(it's heavy to hand carry!) we are having trouble
achieving the antenna separation we ideally need". Read the latest news

Folks

When emailing the Golist or K1XN, please always put in a SUBJECT and have your call sign somewhere in the body of the message. Also have a Reply To address, this helps me to update my email address book.

Please do not send a message without a SUBJECT or Reply To because my email filter is setup to place "empty" messages in the Trash Box. I receive hundreds of spam messages a day and many have "empty" Subject lines and no Return Address. I want to receive all your messages so please help me with this little thing.

Thanks
John K1XN

Bonjour à tous, Hi guys

Reçu de Toni, EA5RM, QSL manager de ST0R

Received from Toni, ST0R QSL manager.

73

Maurice, F5NQL

ST0R QSL AND LOTW STATUS.
De Antonio, EA5RM,
"As you may know, the distribution of ST0R QSL cards has begun. The
Republic of South Sudan
was recently added to the DXCC entities list, so each QSO confirmed by
our manager will be the confirmation of a new one.
Because of this, the DXCC Desk has expressed the concern that they may
be overwhelmed by thousands of applications to credit the new entity.
Consequently, we have decided to make an exception, and upload to the
LOTW all the individual donor QSOs and OQRS ones, by 1st November.

ST0R TEAM"

Hilbre Island lies 2 miles off The Wirral Peninsula, and has been used over the centuries as a Monastery, a Gentleman's Club, and a decoy in the war to fool aircraft to drop bombs in a safer place! 9N1AA ---> "Satish is back on the air after a very long time of inactivity", Carl N4AA (n4aa[@]dxpub.com) reports. "I have agreed to resume acting as his QSL Manager. I now have his logs for the first few days of his operation in mid-October 2011. I do not have ALL of his old logs. Many of those were lost when his computer was confiscated and are no longer available. If you want me to check for any OLD contacts, email me the data and I'll look, but it is doubtful that I can confirm many, if ANY, of those old contacts. SAE with adequate postage is required for direct response".

JOTA ---> CR2AEP, CR2ARQ, CR2ASM, CR2ASS, CR2BSA, CR2JNT, CR3ASA, CR3EPM, CR5AAE, CR5AAR, CR5ACB, CR5ACE, CR5AEA, CR5AEA, CR5AEC, CR5AED, CR5AEE, CR5AEM, CR5AEO, CR5AER, CR5AEV, CR5ALV, CR5AMF, CR5AMO, CR5APA, CR5APL, CR5APM, CR5APR, CR5AQA, CR5BAE, CR5BJA, CR5BRG, CR5CEO, CR5COR, CR5EAL, CR5EAP, CR5ECC, CR5ECH, CR5ECM, CR5EEC, CR5EMC, CR5EMG, CR5EPA, CR5EPC, CR5EPG, CR5EPM, CR5EPO, CR5ESB, CR5ESC, CR5ESJ, CR5ESS, CR5EVA, CR5FAV, CR5FMG, CR5FOV, CR5FSA, CR5GEU, CR5GPS, CR5JNE, CR5JRA, CR5JRB, CR5JRC, CR5JRP, CR5JRV, CR5JVC, CR5LRS, CR5LUZ, CR5LVT, CR5MAF, CR5MFR, CR5MON, CR5MSP, CR5NGC, CR5NSF, CR5NSL, CR5PAE, CR5PEN, CR5RNC, CR5SAC, CR5SAE, CR5SCD, CR5SJT, CR5SME, CR5SNT, CR5STR, CR5VNT, CR6CNE, CR6DNR, CR6FNA and CR6JAM were reported active during the 54th Jamboree On The Air (15-16 October). QSL via bureau. [TNX CT1END]

QSL NA-089 ---> AB5EB/p, AD6D/5 and K0AP/5 made over 3700 QSOs with 2600 unique calls during thei recent activity from Grand Island [425DXN 1066]. Each of them will have all the logs: "so if you worked more then one of us and would like a card for each contact", Mike AB5EB says, "you can send all the cards to one operator who can answer for all three calls. It does not matter who you send the card to". [TNX islandchaser.com]

ST0R & LOTW ---> "As you may know, the distribution of ST0R QSL cards has begun. The Republic of South Sudan was recently added to the DXCC entities list, so each QSO confirmed by our manager will be the confirmation of a new one.
Because of this, the DXCC Desk has expressed the concern that they may be overwhelmed by thousands of applications to credit the new entity. Consequently, we have decided to make an exception, and upload to the LOTW all the individual donor QSOs and OQRS ones, by 1st November". [TNX EA5RM]

T32C ---> "The QSO count is currently [on 21 October, Ed.] at 188.75k with 49% CW, 41% SSB and 9% RTTY. As you might guess we are working hard to exceed 200k.
During the day (local time) we are running a 6m beacon on 50.102.MHz. If you hear the beacon please put a note on the cluster and we will break the beacon and try for QSOs. So far we have had 99 six metre QSOs, mainly with the West coast USA and Hawaii. The beacon has been heard in Japan and South

America. We have also completed a number of 6m EME QSOs.
With just a few days to go to the end of the DXpedition we are beginning to plan the station close down. There will be a phased shut down beginning at 1600z on Monday 24th October, with the last station closing by 0100z on Tuesday 25th. We will keep the 'high rate' stations running as long as possible.
If you look at the on line log and QSOs that were previously in there appear to be missing, don't despair, query the log a little later, they will be there".

+ SILENT KEYS + David Caouette (N6DAC) was killed in Seal Beach, California on 12 October, when a gunman, driven by a desire to kill his ex-wife, went on a deadly shooting rampage, leaving eight people dead. Other recently reported Silent Keys include Charlie McCrystal (GI6DCC), Elmer W. Schwittek (K2LAF), Donald A. Sereni (KB6KTV), Anatoly M. Sayapin (RW0JB, ex UA0UB), Vladimir A. I am pleased to report that Satish is back on the air after a very long time of inactivity. I have agreed to resume acting as his QSL Manager. I now have his logs for the first few days of his operation in mid-October 2011. *PLEASE*…. I do not have ALL of his old logs. Many of those were lost when his computer was confiscated and are no longer available. If you want me to check for any OLD contacts, email me the data and I'll look, but it is doubtful that I can confirm many, if ANY, of those old contacts. *SAE with adequate postage is required for direct response.*

Carl, N4AA

4W6A FINAL PRESS RELEASE - October 24, 2011

The 4W6A DXpedition is now history. The team of Stuie, VK8NSB (team leader); Oliver, VK8DX; Bernd, VK2IA; Ant, MW0JZE; Tim, M0URX (also QSL manager); John, 9M6XRO; and Steve, 9M6DXX; plus pilot Col, MM0NDX, and assistant QSL manager Kev, M0TNX, would like to take this opportunity to thank all the DXers who made a QSO with 4W6A for their patience during the big pile-ups.

Copies of the licence and other validation material have been sent to both the DXCC desk and the RSGB IOTA Manager and 4W6A has been accepted for DXCC and as OC-232 for IOTA. Logs were uploaded to Logbook of The World a few days after the end of the DXpedition. QSL cards have been ordered and we are awaiting the final proof of the QSL design from the printer. As of 23 October, QSLs for over 11,000 QSOs - 27% of the total log - have already been requested either direct or by OQRS. And this less than a month after the end of the DXpedition! These requests have already been processed and the direct QSLs will be sent as soon as the cards are received from the printers. Bureau cards requested by OQRS will be sent out soon afterwards, with direct mailings to the major QSL bureaus of the world.

A report on the DXpedition with a few photos and videos can be found at www.m0urx.com while 150 more photographs have been uploaded to www.4w6a.com/about-timor-leste/gallery.html More videos taken by VK8DX and MW0JZE can be found on YouTube - search "4W6A" and look for the videos uploaded by "mw0jze".

Finally, we would once again like to publicly thank all the DX groups, companies and individuals that so generously sponsored this DXpedition. All are listed on the 4W6A website at www.4w6a.com/sponsors We look forward to seeing you from the next location - wherever that may be.

73,
Steve, 9M6DXX

RADIO ARCALA TEAM POISED TO STRIKE HARD IN CQWW SSB

It is that great time of the year when the Northern folks typically head South but now increasingly also allow their own hardware to speak for
Nordic supremacy.

MARKET REEF, OJ0X
Challenging the soon-to-be freezing sea, they try to activate Market Reef for the first time as a CQWW SSB Contest multiplier. If lucky on this week's Thursday landing, OJ0X will be aired by Timo, OG9X; Olli, OH0XX; Martti, OH2BH; Harri, OH6VM and Teemu, SM0W in the Multi-2 category. You can follow their adventure atwww.qrz.com/db/OJ0X

AZORES ISLANDS, CR2X
Early Tuesday morning, Toni, OH2UA heads to Radio Arcala's Atlantic outpost to see how improved 10M propagation can push his score to new heights. The Azores station is now furnished with a new dual FTdx5000 setup, with OM Power auto amps at all Radio Arcala stations.

ALAND ISLANDS, OH0X
The world renowned OH0W site in Brando, Aland Islands, is now integrated into the Radio Arcala station network as OH0X, and an old warhorse Pertti, OH2PM will be shooting for Northern Europe SOAB honors. Here the old wisdom is to face the challenge of young energy. OH0X cut the finish line first in the recent Polar Battle (CW) - the Scandinavian Activity Contest - with Toni, OH2UA at the helm.

NORTHERN FINLAND, OH8X
The Radio Arcala mother-ship on the Arctic Circle is to be manned by Kim, OH6KZP amid good prospects for openings with polar propagation on all three higher bands. The station recently won the SSB Polar Battle (SAC) with Tonno, ES5TV at the controls.

SOUTHERN FINLAND, OH2BH
With a slightly different propagation outlook to North and West, Pasi, OH6UM will try to maneuver somewhere in between, aiming to show up as a dark horse in this battle and ride the Northern Lights to another mathematical marvel while Martti is seaboard at OJ0X, now in his 50th consecutive CQWW.

You have five runners from the Polar Region to look for and nail down. Following the CQWW, these serious stations will present their "clean sheets" - their success of staying up for 48 hours, without touching their bed sheets! All four are true all-band single-ops committed to following the newly promoted Contesting Code of Conduct due to be released after the race in the upcoming Contest Club Finland's PileUP! magazine, themed "The Last Blast".

All CQWW QSOs, SSB and CW, by Radio Arcala stations will be confirmed on a single X-rated QSL card and via LoTW.

It is contesting time again at Radio Arcala.

VU hams have received permission from the authorities to suffix /F1 at the end of their callsigns to mark the first ever Formula 1 race in India this weekend. Use of the suffix is allowed till 31st October.

Note that this might confuse stations as it could also mean a VU ham QRV from France. That is surely not the case!

Each operator is responsible for his own activities and QSLs will be as per operator's instructions.

This information was received from Gopal Madhavan, VU2GMN - President, ARSI.

It seems that wehave very good conditions this morning. All the bands have many signals and most are quite loud. The rain we had this morning and cleaned away the noise and the bands are noise free for me today. Really nice conditions.

Good DX folks.

BITS & PIECES -

5P12EU - Denmark EU Presidency
Denmark has the Presidency of European Union from 1 January to 30 June 2012. The call sign 5P12EU will be activated during this period. See the 5P12EU website (www.5p12eu.dk/) for further information (awards, online log, etc...). [UBA DX News]

VU - INDIA -
VU hams have received permission from the authorities to suffix /F1 at the end of their callsigns to mark the first ever Formula 1 race in India this weekend. Use of the suffix is allowed till 31st October.
Note that this might confuse stations as it could also mean a VU ham QRV from France. That is surely not the case!
Each operator is responsible for his own activities and QSLs will be as per operator's instructions.
This information was received from Gopal Madhavan, VU2GMN - President, ARSI. Indian Grand Prix - formula1.airtel.in/ [Deepak]

4W6A ---> Logs were uploaded to LoTW a few days after the end of the DXpedition and QSL cards have been ordered. As of 23 October, QSLs for over 11,000 QSOs have already been requested either direct or by OQRS. These requests have already been processed and the direct QSLs will be sent as soon as the cards are received from the printers. Bureau cards requested by OQRS will be sent out soon afterwards, with direct mailings to the major QSL bureaux of the world.
A report on the DXpedition with a few photos and videos can be found at www.m0urx.com, while 150 more photographs have been uploaded to the Gallery on www.4w6a.com. More videos taken by VK8DX and MW0JZE can be found on YouTube - search "4W6A" and look for the videos uploaded by "mw0jze". [TNX 9M6DXX]

DXCC NEWS: SPECIAL PAPER APPLICATION OFFER FOR ST0R ---> The cards for the 2011 ST0R operation from the new DXCC entity of South Sudan are now being received by DXers around the world. With next year's publishing deadline for 2011 results fast approaching on 31 December 2011, the ARRL will offer a special, reduced-price option for those DXCC participants who have already made at least one application during 2011.

You MUST have already made a submission in the 2011 calendar year via either LoTW or via a traditional, paper application. If you have made an application already in 2011, then you may submit a paper ST0R QSL (no other cards, just the ST0R South Sudan card) following these rules:
* Enclose $5.00 (check, money order, CC#, or cash at your risk) for USA amateurs;
* Enclose $6.00 (check, money order, CC#, or cash at your risk) for non-USA amateurs;
* Enclose an SASE for the return of the ST0R card;
* This special submission is ONLY for the ST0R card;
* If ANY other card(s) are included this will be considered a full submission subject to full fees, even if you already submitted in 2011;
* These submission conditions apply ONLY if you have already made a submission in 2011;
* This offer DOES NOT apply if you have not yet made your 2011 submission. All DXCC fees are in effect as you can include this card with your regular submission;
* This special offer expires on December 31, 2011 and is NOT extended into 2012. [TNX Bill Moore NC1L, ARRL Awards Branch Manager]

EARTHQUAKE EMERGENCY ---> Radio Amateurs in Turkey remain active in the response to the earthquake that struck Van province on 23 October. Assistance has been given by TRAC in setting up VHF/UHF networks to relief agencies and some traffic is being carried on the 144 MHz band. The need for HF operations is reducing, however there is still a government station which may operate on 7.092 MHz USB. Amateurs are still requested to be careful when operating between 7.092 and 7.095 MHz to avoid interference to ongoing relief operations. [TNX IARU Region 1]

IOTA EU-155 ---> The retention of EU-155 in IOTA list is in doubt. "The IOTA Manager was informed at Ham Radio 2011 Friedrichshafen that the two barrier islands listed as qualifying for EU-155, Baron and Scanno di Piallazza, no longer exist. Authoritative information has now been provided by a local operator to show this probably to be the case. It is worth noting that the Po Delta is a remarkably fragile natural environment with barrier reefs, as and when they occur, subject to change by tide and storm. IOTA rules require that, in the absence of qualifying islands, the group concerned should be suppressed. One final check will be made on the latest satellite pictures expected shortly following which a decision will be taken and a notice issued. In the meantime, no new operations claiming to take place from EU-155 will be regarded as qualifying for credit". [TNX Roger Balister, G3KMA, RSGB IOTA Manager]

RADIO ARCALA & CQWW SSB CONTEST ---> Radio Arcala (www.radioarcala.com) will deploy five stations in this year's event:
CR2X from the Azores operated by OH2UA;
OH0X from the Aland Islands operated by OH2PM;
OH2BH from Southern Finland operated by OH6UM;
OH8X from Northern Finland operated by OH6KZP;
OJ0X from Market Reef operated by OG9X, OH0XX, OH2BH, OH6VM and SM0W.
All CQWW QSOs, SSB and CW, by Radio Arcala stations will be confirmed on a

single X-rated QSL card and via LoTW. [TNX OH2BN]

+ SILENT KEYS + Recently reported Silent Keys include Claudio Cateni (I1IIO), Alexei K. Ryabchikov (UA9CM), Mikhail V. Netrebyuk (UR5YN) and Bill Leavitt (W3AZ).

QSLs received direct or through managers: 3A/IZ7EVZ, 3Y0E, 4K8M, 4L1MA, 4L1UN, 4S7KM, 5H3VB/5 (AF-074), 5H9PD, 5N7M, 5V7CC, 5X0CW, 6W/RK4FF, 8P9AA, 8P9NX, 9H4JX, 9H5BZ, 9K2HN, A61ZX, A71CM, AH0J, C31BO, C31CT, C91KHN, C91R, CO6RD, CU2AF, CX7CO, DL2RNS/HI8, DU1GM, E21EJC, EA9IB, EK6GB, EX9T, EZ75R, FG5FR, FG5LA, FO/N6JA, GU3UOQ, HG1S, HH3/N3BNA, HI3K, HI3TEJ, HI8SAR, HS0ZCW, J28RO, JW7QIA, KL7RRC (NA-232), MD0CCE, MD9Y, NH0J, NH0Z, OA4TT, OD5NJ, OH0GG, OH0RJ, OX6YL, OY6FRA, PJ4LS, RI1ANC, RI1FJ, RI1FJA, S79DO, ST0R, ST2AR, SV2ASP/A, SV5BYR, T30AQ, T6MO, T6TL, TI2MEF, TK5MH, TU5JD, TY1KS, UW8I, V63DX, VK0KEV, VK9HR, VP2MNK, VP9/N0JK, W6HGF/KH0, XX9LT, YB0NFL, YL2BJ, Z22CW, ZC4MIS, ZD9AH, ZK2A, ZK2AB, ZS8M.

Do any of you have experience with lighted keyboards? Did you like it?
What brand do you recommend?
Are you using one now?

Last week when in Bhutan, I met Pradhan, A51PN, who was very active from 1972 to 1983 when he worked in the Wireless Dept of the Bhutan government. He gave me his stack of log books to digitize and upload to LOTW, about 30,000 estimated contacts. Pradhan is now 73 and in good health and living a quiet retired life.
I will be able to answer QSL requests for anyone needing a card for A51PN. He has meticulous notes in his logs about QSLs that were returned.

NEWS FLASH - 3D2 AND T2T de VK4FW
Over the last several weeks, as many would know, there have been numerous problems on some Pacific Islands with water shortages.
When we came to Fiji we immediately saw the necessary persons to get assurance that all our equipment would be able to go to Tuvulu. We were assured as best we could get, and told to come back on November 1 to book it all in. Well, that day came and MURPHY struck yet again.....
Because of major back logs of very urgent freight (especially water) there are some 600kgs currently waiting to go. This continually rises daily. We immediately searched for shipping by boat with no joy, then tried to charter a vessel and again with no joy.
So here is what will now take place..... All operators are permitted just 23kgs of luggage and nil oversize so we will take as many antennas as possible and 2 only complete Elecraft K3 and KPA500 stations.
If there are any positive changes then we will, of course, send more equipment as it is all in Fiji with us.
We would request the DX community have patience and try to understand that we have absolutely no choice unless we cancel the operation totally.
Meantime 3D2A by Eddie, VK4AN did a single op low power 10m in the CQWW with some 2822 QSO's.
We have also amassed over 5,500 QSO's as 3D2T. Eric, VK4NEF arrived today so that gives us 3 ops to continue here.
We have been very surprised at the 10m opening, but extremely disappointed with nil on 160 and very little on 80.

Cheers, Bill, VK4FW

FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012
Nov. 2, 2011
Three members of the Malpelo 2012 team have just completed a seven day reconnaissance visit to Malpelo.
To see a short written summary of their observations and view some very revealing pictures, go tohttp://hk0na.com/hk0na-reconnaissance-trip-oct-2330/
This will be a very demanding DXpedition for several reasons. The terrain is particularly difficult, near vertical at times. And in order to have a clear radio view of Asia, the Pacific region and W6/W7; it will be necessary to locate operating site(s) and antennas at the top of the mountain. This further complicates the difficulties and physical risks to the team.
Team members vary in age from 25 to 73. But under the leadership and constant urging of our team’s medical doctors, K9SG and W0GJ, we have all embarked on a physical training regimen.

We should all be ready for the challenges come early 2012.
Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia Nov.5-8 for a planning meeting with team leader, Jorge HK1R and other team members. The purpose of the meeting is to review all the checklists and responsibilities for each team member. With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition.
One critical decision to be made concerns the duration of the operation. We have permission to stay on site for 17 days versus the 14 days now planned. We will be reviewing the DXpedition budget to determine if we can afford the extra $15,000 expense for 3 additional days.
Contributions are gratefully accepted at:www.hk0na.com/sponsors
We plan periodic press releases with information of interest. Also, watch the website for breaking news.

Thanks,
Jorge Prieto, HK1R-DXpedition leader
Bob Allphin, K4UEE-co-leader

*FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012
Nov. 2, 2011
Contact: bob@...

Three members of the Malpelo 2012 team have just completed a seven day
reconnaissance visit to Malpelo.

To see a short written summary of their observations and view some very
revealing pictures, go to
http://hk0na.com/hk0na-reconnaissance-trip-oct-2330/

This will be a very demanding DXpedition for several reasons. The
terrain is
particularly difficult, near vertical at times. And in order to have a
clear
radio view of Asia, the Pacific region and W6/W7; it will be necessary to
locate operating site(s) and antennas at the top of the mountain. This
further complicates the difficulties and physical risks to the team.

Team members vary in age from 25 to 73. But under the leadership and
constant urging of our team's medical doctors, K9SG and W0GJ, we have all
embarked on a physical training regimen. We should all be ready for the
challenges come early 2012.

Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia
Nov. 5-8 for a planning meeting with team leader, Jorge HK1R and other
team
members. The puFOR IMMEDIATE RELEASE-Malpelo DXpedition 2012

Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia Nov. 5-8 for a planning meeting with team leader, Jorge HK1R and other team
members. The purpose of the meeting is to review all the checklists and responsibilities for each team member. With the information gained on the
recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other
critical decisions necessary to the ultimate success for the DXpedition.

One critical decision to be made concerns the duration of the operation. We
have permission to stay on site for 17 days versus the 14 days now planned.
We will be reviewing the DXpedition budget to determine if we can afford the
extra $15,000 expense for 3 additional days.

Contributions are gratefully accepted at: www.hk0na.com/sponsors

We plan periodic press releases with information of interest. Also, watch
the website for breaking news.

Thanks,

Last week when in Bhutan, I met Pradhan, A51PN, who was very active from
1972 to 1983 when he worked in the Wireless Dept of the Bhutan government.
He gave me his stack of log books to digitize and upload to LOTW, about
30,000 estimated contacts. Pradhan is now 73 and in good health and
living a quiet retired life.

I will be able to answer QSL requests for anyone needing a card for A51PN.
He has meticulous notes in his logs about QSLs that were returned.

FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012
Nov. 2, 2011
Contact: bob@k4uee.com

Three members of the Malpelo 2012 team have just completed a seven day
reconnaissance visit to Malpelo.

To see a short written summary of their observations and view some very
revealing pictures, go to
http://hk0na.com/hk0na-reconnaissance-trip-oct-2330/

This will be a very demanding DXpedition for several reasons. The terrain is
particularly difficult, near vertical at times. And in order to have a clear
radio view of Asia, the Pacific region and W6/W7; it will be necessary to
locate operating site(s) and antennas at the top of the mountain. This

further complicates the difficulties and physical risks to the team.

Team members vary in age from 25 to 73. But under the leadership and constant urging of our team's medical doctors, K9SG and W0GJ, we have all embarked on a physical training regimen. We should all be ready for the challenges come early 2012.

Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia Nov. 5-8 for a planning meeting with team leader, Jorge HK1R and other team members. The purpose of the meeting is to review all the checklists and responsibilities for each team member. With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition.

One critical decision to be made concerns the duration of the operation. We have permission to stay on site for 17 days versus the 14 days now planned. We will be reviewing the DXpedition budget to determine if we can afford the extra $15,000 expense for 3 additional days.

Contributions are gratefully accepted at: www.hk0na.com/sponsors

We plan periodic press releases with information of interest. Also, watch the website for breaking news.

Thanks,
Jorge Prieto, HK1R
DXpedition leader

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW (i2eow[@]fastwebnet.it).

MALPELO 2012 ---> Three members of the HK0NA team have just completed a seven day reconnaissance visit to the island. This will be a very demanding DXpedition for several reasons - read the summary of their observations and view some very revealing pictures on www.hk0na.com. K4UEE, N4GRN and W6IZT will travel to Colombia on 5-8 November for a planning meeting with team leader, Jorge HK1R and other team members. With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition. One critical decision to be made concerns the duration of the operation, as they have permission to stay on site for 17 days versus the 14 days now planned. They will be reviewing the DXpedition budget to determine if they can afford the extra $15,000 expense for three additional days.

Contributions are gratefully accepted at www.hk0na.com/sponsors [TNX K4UEE]

QSL A51PN ---> "Last week when in Bhutan, I met Pradhan, A51PN", Glenn Johnson (W0GJ/A51B) says. Pradhan "is now 73 and in good health and living a quiet retired life", but he "was very active from 1972 to 1983 when he worked in the Wireless Dept of the Bhutan government. He gave me his stack of log books to digitize and upload to LOTW, about 30,000 estimated contacts. I will be able to answer QSL requests for anyone needing a card for A51PN. He has meticulous notes in his logs about QSLs that were returned". QSL to Glenn R. Johnson, 207 Bear Creek Ln NW, Bemidji MN 56601, USA.

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fourteen different galleries include more than 9500 cards for the ten Most Wanted DXCC Entities, the 60 deleted DXCC Entities, obsolete prefixes, stations from Magrebh from 1947 to 1962, D5 and DL5 stations from 1945 to 1962, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS. plus a gallery for cards not accepted by DXCC. Several cards are still needed and your participation is encouraged - please visit www.LesNouvellesdx.fr and send your comments to lesnouvellesdx[@]free.fr [TNX F6AJA]

OJ0X DXPEDITION CAME TO AN END WITH 66.000+ QSO's

With record warm temperatures and calm seas, the last OJ0X sub-group of Timo, OG9X; Olli, OH0XX; Martti, OH2BH and Teemu, SM0W got back to Aland Islands with 10.000 CQWW QSO's in the books, bringing the total to more than 66.000 in the OJ0X log. The updated log search page is now online at <www.qrz.com/db/OJ0X> with the latest pictures to be added soon.

The OJ0X operating team comprised these fourteen (14) operators: Salvatore, DH7SA; Dietmar, DL3DXX; Frank, DL5CW; Timo, OG9X; Olli, OH0XX; Juha, OH1ND; Pekka, OH1TV; Miika, OH2BAD; Martti, OH2BH; Ilmo, OH2BO; Tapani, OH5BM; Teemu, SM0W; Rick, SM6U and Robert, SP5XVY.

While the gang experienced all kinds of weather in fighting for their landings and departures, they were satisfied in being able to catch some good high-band openings, offering OJ0 on those bands and modes for the first time. They managed the four weeks without a glitch among the rotating groups.

Here, they offer a score card listing those with the highest number of band points in various
geographical areas, such as Japan: JA6BZI and JA4DND (21) and JA4EPE, JR4FYW and JA0FSB (19). In the United States, top honors go to K5EK (17) followed by W4CHA, W4DXA and N8RR. The U.S. West Coast is led by W7AL (11), followed by N6ED (10). In Europe, OK2PAY and LZ1NG are credited with 23 band points, followed by EA1SB and ON7GB (22) and DF3QG and
PA1PVH (21). Oceania's best score (15) comes from VK7ZE and South America's from YV8AD (13).

All in all, OJ0X contacted 26.873 individuals, and 141 stations made it on all 9 bands offered.

The background team offering help and performing several support functions consisted of:
Mario, 9H5QB; Nigel, G3TXF; Jarmo, OH2BN; Pertti, OH2PM; Harri, OH6VM; Tore, SM0DZB; Vlad, UA6LV and the boat captain, Mats Sjostrom, plus the Finnish Lighthouse Society’s chairman, Pekka Vaisanen, and Market Reef chairperson, Angela Eriksson, who did their utmost to make everything jell.

If you are interested in operating from Market Reef in 2012, you may
contact Pekka or Angela for more information at
<http://www.majakkaseura.fi/eng/market/>. Harri, OH6VM/OJ0VM is also
offering you a complete tour of the lighthouse facilities at
<http://www.oh6vm.org/market/>.

OJ0X QSL cards are available from OH2BH in December and soon via LoTW.

As of this writing, I have not received confirmation of my RAC order.
This is very unusual. I have not had any contact with RAC for some
time now, but that in itself is not unusual.

I will keep you posted as to when confirmation is received and any

*Friends-

John N7CQQ and I will be doing a modest DXpedition to Clipperton in March 2012. This is the next Cordell Expedition, after some others you might know about (3Y0PI, XR0Y/Z, VK0IR, XR0X, K7C, etc). We will also implement version 2 of DXA, the real-time website that automatically displayed your QSOs with K7C within a minute or so after you made them (remember the “greenies”?).

We are looking for a doctor/DXpeditioner to act as informal medic for the trip. The entire project is described at http://www.theclippertonproject.com <http://www.theclippertonproject.com/> . Details about the DXpedition (we expect to use TX5Q) are at http://www.cordell.org/CI .

Want to go, or know someone you can recommend?

It has come to my attention that rumors are going about I am planning an expedition to Eritrea using the call sign E35X.

These rumors have no basis in any real situation.

The E35X call sign was issued to the LA5X Ham Forum group, headed by me, and used in June 1994 just a week after their declared independence. This was the first amateur radio activity licensed by the Eritrean authorities.

A possible cause for the rumor may be that I am working on updating the QRZ.com profile for LA6VM, to include my recent A52VM activity, and to include all my previous expedition call signs. At the same time, I have updated the profile to include responsibility for our E35X expedition, as the former QSL manager, Ruth LA6ZH, and her husband Thor, passed away some time ago.

As far as I am informed, the current political situation that Eritrea is in makes it unlikely that any permission for amateur radio activity will be granted in the near future. We can only hope that this situation will be eased; firstly for the benefit of the Eritrean people.

In an eased situation, I would guess that permissions for operation amateur radio in Eritrea will be granted.

With the LOTW slowdown, it will probably been a while before contacts are confirmed by LOTW. This system is in extra overload. Glad to know the logs are at LOTW.

Thanks Mike.

RADIO ARCALA TEAM GOING FOR CQWW CW BOOTS ON

For the past several years, the discussion about operating 48 hours nonstop has prompted many initiatives of doing so. Radio Arcala's team doctor, Ville, OH2MM has specialized in food consumption prior to and during the contest. Several lectures were given on this vital aspect of contesting.

As CQWW SSB worked out fine with a new claimed overall SOAB European record (CR2X by OH2UA), approaching 10.000 QSOs, and a Finnish record (OH8X by OH6KZP), it was discovered that several team members struggled to stay afloat for the entire 48 hours. Some came close to a knockout.

CQWW CW will now be used semi-scientifically to record those ups and downs and to seek ways of hanging on and avoiding a meltdown.

OH8X, Northern Finland:
Radio Arcala, OH8X has invited Toivo, ES2RR, a 2010 WRTC medallist, to drive their contest machine for 48 hours nonstop, seriously, boots on.

CR2X, Azores:
Toni, OH2UA is due for some unexpected undertakings at CR2X, but also determined to balance the effort needed to stay in the ring for 48 hours.

OH0X, Aland Islands:
Radio Arcala's new associated station, OH0X will be operated by Pekka, OH2TA, and he is ready to do 48 hours for the first time, with some reservations and doubts.

TC2X, Asiatic Turkey:
Another new associated station, TC2X manned by Pertti, OH2PM, will try to offer Turkey (Asiatic) with maximum efficiency, with a modest setup but now with boots on, in a 48-hour effort.

OH2BH, Southern Finland:
Will be piloted by Pasi, OH2IW who has been sleeping for the past weeks so as not to need any nap time when the race starts. Can one sleep in advance? Maybe to some extent, with no boots.

9H9BH, Republic of Malta:
For his 50th straight year in CQWW, Martti, OH2BH will be watching the bedlam poolside, maybe not boots on, but dipping his toe in deep water to provide a semi-rare mult.

Why boots on? There's an old Finnish wisdom which holds that going to sleep boots on may cause headache and mental disorder in the morning. More Finnish wisdoms after CQWW CW. Until then, good luck in contacting Radio Arcala's boots-on team.

RADIO ARCALA TEAM GOING FOR CQWW CW BOOTS ON

For the past several years, the discussion about operating 48 hours nonstop has prompted many initiatives of doing so. Radio Arcala's team doctor, Ville, OH2MM has specialized in food consumption prior to and during the contest. Several lectures were given on this vital aspect of contesting.

As CQWW SSB worked out fine with a new claimed overall SOAB European record (CR2X by OH2UA), approaching 10.000 QSOs, and a Finnish record (OH8X by OH6KZP), it was discovered that several team members struggled to stay afloat for the entire 48 hours. Some came close to a knockout.

CQWW CW will now be used semi-scientifically to record those ups and downs and to seek ways of hanging on and avoiding a meltdown.

OH8X, Northern Finland:
Radio Arcala, OH8X has invited Toivo, ES2RR, a 2010 WRTC medallist, to drive their contest machine for 48 hours nonstop, seriously, boots on.

CR2X, Azores:
Toni, OH2UA is due for some unexpected undertakings at CR2X, but also determined to balance the effort needed to stay in the ring for 48 hours.

OH0X, Aland Islands:
Radio Arcala's new associated station, OH0X will be operated by Pekka, OH2TA, and he is ready to do 48 hours for the first time, with some reservations and doubts.

TC2X, Asiatic Turkey:
Another new associated station, TC2X manned by Pertti, OH2PM, will try to offer Turkey (Asiatic) with maximum efficiency, with a modest setup but now with boots on, in a 48-hour effort.

OH2BH, Southern Finland:
Will be piloted by Pasi, OH2IW who has been sleeping for the past weeks so as not to need any nap time when the race starts. Can one sleep in advance? Maybe to some extent, with no boots.

9H9BH, Republic of Malta:
For his 50th straight year in CQWW, Martti, OH2BH will be watching the bedlam poolside, maybe not boots on, but dipping his toe in deep water to provide a semi-rare mult.

Why boots on? There's an old Finnish wisdom which holds that going to sleep boots on may cause headache and mental disorder in the morning. More Finnish wisdoms after CQWW CW. Until then, good luck in contacting Radio Arcala's boots-on team.

COMMONWEALTH CONTEST 2012 PRIZE DRAW.

2012 will be the 75th Commonwealth Contest (March 10th and 11th 2012) and to celebrate this we are going to have a prize draw which every entrant making more than 75 valid QSOs will be entered. And what a prize for the lucky winner - a RFSPACE SDR-IQ Software Defined Radio generously donated by Martin Lynch of ML&S.

The SDR-IQ is a 14-bit software defined radio receiver. It offers a broad range of spectrum analyzer and demodulation capabilities over the whole 0.0001-30 MHz band. The SDR-IQ can be used as a short wave receiver, as a spectrum analyser, as a panadaptor and as a precision measuring instrument.

All stations located in one of the Commonwealth Contest Call areas are eligible for this prize draw - making this a truly Commonwealth event.

What do you have to do to get into the prize draw?
All the entrants to the 2012 Commonwealth Contest who have, after adjudication, 75 or more valid QSOs will automatically be entered for the draw. The full rules for the 2012 contest are at www.beru.org.uk and you are urged to read them carefully. Make sure that you work more than 75 QSOs to leave some margin in case some of your QSOs are disallowed for some reason.

More information at http://www.beru.org.uk/2012prizedraw/prizedraw.html and on the Commonwealth Contest website at http://www.beru.org.uk/ [G3PJT]

WORLD CASTLES AWARD PROGRAM
After a few months of testing the WCA E-log is up and running now. The author and manager is Jiri, OK5NN (ex-OK2SJI). The WCA E-Log allows an easy QSO check for the World Castles Award Program. [DX Newsletter]

XW3DT - LAOS
Alex, RK3DT, is again active as XW3DT from Laos. He was last QRV in January this year. Currently XW3DT is licensed for three bands; 40, 30 and 20m. When sending a QSL card, make sure it's to the following address before December 3, 2011. P.O. BOX 11, Lamma Island, Hong Kong (see QRZ.com). [dx-world.net]

425 DX NEWS MAGAZINE ---> The October 2011 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

E35X ---> "It has come to my attention that rumors are going that I am planning an expedition to Eritrea using the call sign E35X", Erling LA6VM says. "These rumors have no basis in any real situation".
E35X was the callsign used by LA6VM (along with LA1EE, LA7XK, LA9DL and JF1IST) back in June 1993, soon after Eritrea declared its independence and gained international recognition.

ID9DXC ---> This is the callsign the DXCoffee IOTA team will use from various islands in the Eolie group (EU-017) in 2011 and 2012. The first activity was expected to take place on 18 November from Panarea Island. QSL via IT9YVO, direct or bureau. Information at www.dxcoffee.com/id9dxc/

RADIO ARCALA & CQWW CW CONTEST ---> Radio Arcala (www.radioarcala.com) will deploy five six stations in this year's event: 9H9BH from Malta (operated by OH2BH), CR2X from the Azores (operated by OH2UA), OH0X from the Aland Islands (operated by OH2TA), OH2BH from Southern Finland (operated by OH2IW), OH8X from Northern Finland (operated by ES2RR) and TC2X from Asiatic Turkey (operated by OH2PM). [TNX OH2BN]

VQ9JC ---> Jim, ND9M is back at Diego Garcia (AF-006), Chagos Islands and expects to be QRV at least until 1 March 2012. The local licensing office renewed his regular license (VQ9JC) for two years and also issued another short-term special prefix callsign (VQ91JC) for him to use from 19 November through 4 December. This will include a SOAB Low Power entry in the CQ WW CW Contest.
His usual QRV hours are 12.00-16.30 UTC on most days. He operates from the club station, where the current situation is far from being optimal.
"Visitors over the last few months disconnected a number of coax and other cables without labeling them first", he says, "so I'm doing a lot of cable tracing (and labeling!). Much of the cabling work that VQ9LA did over the years has been removed for no apparent reason.
The finals in both amps (Alpha 99 and AL80B) have failed, so I'll be running barefoot for the foreseeable future. The amps are owned by the Navy, but the Navy hasn't provided any equipment repair support for several years, and I'll have to buy the replacement finals out of pocket, but that won't happen for several months.

Also, the log periodic (10-30 MHz) works well, but the rotator binds around 020 degrees when turning clockwise (from north towards east). There's an apparent issue with strain on the coax caused by turning the rotator and maybe even the connection at the top of the 30-meter tower; the SWR skyrockets when the rotator is turned beyond 020 degrees as it moves to the east.
For now, the antenna will be left facing northwest rather than risk causing permanent damage until I can get up there. This heading favors the path to Europe and the Americas, but obviously hurts the paths to JA and VK/ZL to the east as well as Long Path to NA to the south, but it can't be helped at this point.
The single remaining HF rig is an IC-760 which has a lot of years and miles on it, but its performance is still adequate. (There's an FT-920 that's barely good enough for QRP on a couple bands.) I brought an FT-857 from home which I'm using to work the LEO satellites. It will also serve as a back up for HF should the 760 come into hard times.
I'll be putting up a 5-element 6M beam. That antenna won't be on the tower, but should still be high enough to take advantage of the openings that have finally started appearing. I'll use the FT-857 for working 6M as well as the satellites".

First trip will be from the Panama Cannal to Huelva, Spain (EA7), and then to Brunsbuttel, Germany (From there, he will inform us later). Yuri is reportedly a crew member on the ship, so activity will be during his free time. Operations are expected on all amateur radio bands, 160m-70cm, and also the satellites. His activities will be mainly through the satellites, but also look for him on the HF bands. He will also be active on 6 metres, conditions permitting. Dear OM,

I am very sad to tell you that Jean Pierre F9RM is dead.

He was licensed in 1948 and REF member 5570.
He was a real DXer as DXCC Mixed 338/380 and Phone 338/379
long time at the first place at the IOTA Honor Roll.

We left a really great OM.

10550. Malpelo DXpedition 2012

FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012
Nov. 28, 2011
Contact: bob@... EDITORS: email k4uee to request high res. pictures !

Recently three US members (K4UEE, N4GRN and W6IZT) of the Malpelo 2012 DXpedition flew to Cartagena, Colombia and met with six of their Colombian counterparts. The purpose of the two day meeting was to make some critical decisions about the upcoming DXpedition to Malpelo Island. Also, checklists and inventories were finalized and all team members' responsibilities were assigned.

Since it is highly unlikely that the various Colombian authorities will permit another DXpedition to Malpelo anytime soon; a decision was made to extend the DXpedition to 16-17 days from the previous 12-14 day plan. The approximate dates of operations will be January 21, 2012 through February 5/6, 2012.
Four team members will travel with all equipment, radios, antennas and infrastructure to Malpelo in early January. They will be transported by the Colombian Navy. They will arrive about two weeks prior to the rest of the Team and will set up camp, the two operating sites, radios and antennas. They will spend about 30 days on the island. This will allow the rest of the team to begin radio operations immediately upon arrival by chartered vessel.

As mentioned there will be two operating sites, each with a complete complement of antennas and radios with amplifiers. The first operating site will be co-located with the Colombian marine's camp on the east side of the island. It is clear to East Coast USA, EU and Africa. In order to have a clear shot at JA/Asia, the Pacific region and W6/W7; the second operating site will be located near the top of the highest mountain peak on the island. However, to lessen the physical risks to the team members, the operating site will be located on platforms situated below the actual peak. Still, it will be a 45 minute uphill climb to reach the platforms. The antennas for that site will be on the top of the mountain peak. At times, there will be as many as nine stations QRV with the capability of dual mode operations on all bands.

Safety of the team is paramount. We will be installing a winch system to hoist team members and all of our equipment from our chartered ship's Zodiac onto the island. From there, manpower will carry the equipment the 300 meters straight uphill to the marine camp. The trail to the elevated operating site is extremely dangerous. We will utilize harnesses and safety ropes to minimize the risks. This is

going to be a difficult and expensive DXpedition. Every effort will be made to maximize QSOs while protecting the safety of the team members. It is a delicate balance.

Your financial support is necessary and gratefully accepted. Contributions can be made via our website at: www.hk0na.com/sponsors

We plan periodic press releases with information of interest. Also, watch the website for breaking news.

Thanks,
Jorge Prieto, HK1R

Hi John,

Buzz, NI5*_DX_*, has assumed the duties of QSL manager for A71CV, Abdulla, whose previous manager (A71AN) is now a SK. Abdulla will soon send Buzz his logs and the two will work on the design of a new QSL card. Once the design is complete it will be sent to UX5UO for printing. This process could take as long as 6-8 weeks, so no cards should be expected from NI5*_DX_*until the cards are received from the printer.

73,

Buzz

6 METRES & UP -

- Meteorscatter Propagations in December 2011 -
December is, as usual, characterized by the return of one of the most active (and probably the most reliable) major annual showers: the Geminids. Geminids maximum is expected to occur on December

14th, 17h30m UT, with ZHR = 120 hr-1 at peak. The Geminids peak
is typically quite broad (thus ensuring a several-days-long period
of good MS activity) , although the rates sometimes decay fairly
quickly after the maximum. Have a look to Geminids predictions and
tips, as well as those for other minor showers in December 2011

ARRL 10 METER CONTEST ---> The annual ARRL 10 Meter Contest will be held on
10-11 December. Complete details can be found at www.arrl.org/10-meter

DXCC NEWS ---> ARRL Awards Branch Manager Bill Moore, NC1L reports that
5X1VJ (Uganda, 2011 operation) has been approved for DXCC credit.

MALPELO 2012 ---> This is the latest information released by the HK0NA
DXpediton organizers on 28 November.
"Recently three US members (K4UEE, N4GRN and W6IZT) of the Malpelo 2012
DXpedition flew to Cartagena, Colombia and met with six of their Colombian
counterparts. The purpose of the two day meeting was to make some critical
decisions about the upcoming DXpedition to Malpelo Island. Also, checklists
and inventories were finalized and all team members' responsibilities were
assigned.
Since it is highly unlikely that the various Colombian authorities will
permit another DXpedition to Malpelo anytime soon; a decision was made to
extend the DXpedition to 16-17 days from the previous 12-14 day plan. The
approximate dates of operations will be January 21, 2012 through February
5/6, 2012.
Four team members will travel with all equipment, radios, antennas and
infrastructure to Malpelo in early January. They will be transported by
the Colombian Navy. They will arrive about two weeks prior to the rest of
the team and will set up camp, the two operating sites, radios and
antennas. They will spend about 30 days on the island. This will allow the
rest of the team to begin radio operations immediately upon arrival by
chartered vessel.
As mentioned there will be two operating sites, each with a complete
complement of antennas and radios with amplifiers. The first operating

site will be co-located with the Colombian marine's camp on the east side of the island. It is clear to East Coast USA, EU and Africa. In order to have a clear shot at JA/Asia, the Pacific region and W6/W7; the second operating site will be located near the top of the highest mountain peak on the island. However, to lessen the physical risks to the team members, the operating site will be located on platforms situated below the actual peak. Still, it will be a 45 minute uphill climb to reach the platforms. The antennas for that site will be on the top of the mountain peak. At times, there will be as many as nine stations QRV with the capability of dual mode operations on all bands.
Safety of the team is paramount. We will be installing a winch system to hoist team members and all of our equipment from our chartered ship's Zodiac onto the island. From there, manpower will carry the equipment the 300 meters straight uphill to the marine camp. The trail to the elevated operating site is extremely dangerous. We will utilize harnesses and safety ropes to minimize the risks. This is going to be a difficult and expensive DXpedition. Every effort will be made to maximize QSOs while protecting the safety of the team members. It is a delicate balance.
Your financial support is necessary and gratefully accepted. Contributions can be made via our website at: www.hk0na.com/sponsors

QSL A71CV ---> Buzz, NI5DX, has assumed the duties of QSL manager for Abdulla A71CV, whose previous manager (A71AN) is now a SK. Abdulla will soon send Buzz his logs and the two will work on the design of a new QSL card. No cards should be expected from NI5DX until the new QSLs are received from the printer (the process could take as long as 6-8 weeks). [TNX The Golist]

QSL ET3AA ---> The QSL route for contacts made with ET3AA and ET3SID on 8-13 December [425DXN 1071] is via N2OO. Either direct and bureau cards can be requested online by going to www.qsl.net/n2oo/history/qsl-n2oo.htm

T2T ---> The T2T DXpedition to Tuvalu (www.t2t.pacific-dxers.com/T2T.html) will go QRT on 3 December, a few days earlier than planned. "We have been doing everything possible to avert this", VK4FW says, "but realistically have no choice due to persistent power problems". The T2T online log totals (on 30 November there were 39347 QSOs) also include contacts made by T2V during the CQ WW DX CW Contest. Speaking of which, during the contest "we inadvertently sent 32 as our zone. So if you put that in your log, then you copied our exchange Correctly. We have since realised that it should have been 31... and have advised the contest committee. How this error will be managed will be up to them. We sincerely apologise for this mistake!"

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW (i2eow[@]fastwebnet.it).

Hello DXers:

In case you have not yet worked T2T on Tuvalu, you still have a chance. When I notice spots for T2T on the cluster, I decided to see if they were real. Sure enough T2T was operating simplex on 21295 with Bill Horner, VK4FW operating. Bill acknowledged my call right away and I asked why they were still on the air... his response was.
"NO AIRPLANE." I had to chuckle at his response. He said they expected the plane "tomorrow" and would be on the air for several more hours at least.

Keep watching the cluster as they will stay on the air as long as possible.

73,
Carl, N4AA

John,

I have been trying to get the new DATA files off the web site. When I tell the program to Unzip the file I get an error window that appears and says: Can't create output file: C:\GOLIST\GOWIN.exe.

Any idea what's happening?

I ran into the same problem. This version won't unzip unless the GoWin application is shut down first. I didn't take time to investigate what is different with this version.

So, close down the application; unzip the files; then, restart the application. The new database will then be available.

Folks,

The latest Godata data file on the download page contains a new
version GoWin.exe. In order to install this
latest download, you MUST close the GoWin program running on your PC.
It will not install the new EXE file if GoWin is running, but will
give you an error message***"Can?t create output file
C:\GOLIST\GOWIN.exe"*.

The new version is 2.24

- MS - Contest 2011 - LY4U MEMORIAL CONTEST -
The Bavarian Contest Club (BCC) invites all active meteor scatter enthusiasts to join the MS contest hold during the Geminids shower 2010. The aim of the contest is to generate more activity on the random frequency and make MS random operation more popular. It will

also provide interesting information about MS propagation at various
times of the shower. And it will give the little pistols a chance
to work the big guns, who are usually just out for square hunting.
Contest period: 11 Dec. 2011, 20:00 UTC to 15 Dec. 2011, 02:00 UTC.

From the VP6T Web Site

VP6T Pitcairn Island 2012
January 20 - February 4 2012

This DX operation from Pitcairn has a target of more than 30,000 QSOs. With good propagation forecast for early 2012, efforts will be made to give this extremely rare entity to deserving DXers on as many bands as possible, but especially on the low bands. The rarity of VP6 ensures that all operators will be kept fully occupied during our nine full days on the island. We will be travelling there by boat. We are planning to have three stations active round-the-clock.

Once the log transfer is made, Buzz will able to confirm all past contacts with KG4AJ. Norm is scheduled to be in KG4 land for 2 years.

I am hopeful that most of you have received your RAC cd by now. I have heard from several of you, so I know they are being received. Any stateside orders not received by Monday 12/19 drop me an email note please.

DX users, you probably still have some travel time yet to come.

425 DX NEWS MAGAZINE ---> The November 2011 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

DXPEDITION OF THE YEAR ---> The poll for the "DXpedition of the Year" as voted by readers of DX World.net can be found at http://dx-world.net/2011/dx-world-dxpedition-of-the-year-2011/. The criteria behind the poll is to remind operators of the many notable DXpeditions which occurred during the last 12 months and to vote for their favourites (*five* choices overall). Poll closes on 15 January 2012. [TNX MM0NDX]

ET3AA: STUDENT LICENSE PROJECT RESULTS ---> The results of the US FCC Amateur Radio License examinations administered for 62 students at the Institute of Technology of the University of Addis Ababa on 10-13 December are as follows: 5 Extra Class, 36 General Class and 16 Technician Class Licenses issued; five did not receive a license.
"After we get our logs combined", K3LP says, "we'll upload the results to the Logbook of the World plus post the results as a search function. Thanks to everyone for their understanding regarding the low bands. A future goal will be set to operate from a remote location with exceptional receive antennas". QSL ET3AA and ET3SID via N2OO for 8-13 December 2011 only.

HS0AC ---> "After over five weeks of inundation by flood water at the Asian Institute of Technology campus at Kilometre 42 on Phaholyothin Road, a team of RAST members led by station manager Finn, OZ1HET and President Chaiyong, HS1QVD visited the club station there on Saturday, December 10". Finn describes the situation as follows: "The club station was completely destroyed, everything in there spoiled so we could only 'scrap' all out as garbage. All furniture had fallen apart and everything was full of mud and

smelling very bad". The "HS0AC Horror Story", along with several impressive pictures, can be found at www.qsl.net/rast/

IOTA ANNUAL UPDATE ---> The deadline for the 2012 Honour Roll and Annual Listing approaches. Applications and updates submitted online on or before 31 January will count for the 2012 tables so long as the supporting cards sent to checkpoints are postmarked no later than that date. Updates postmarked after 31 January will be processed in the normal way but scores will be held over to 2013. Listing in the tables is restricted to those participants who have updated their scores at least once in the previous five years (in the case of the 2012 tables this means since the 2007 annual listings). Please submit online and not on paper - card volumes are now such that paper applications place an unacceptable burden on checkpoints. The 2012 tables will appear on www.rsgbiota.org in the Spring.

QSL 3B7C & 3B9C ---> T32C has prompted renewed interest in getting missing cards from those trips. The following have taken over QSLing responsibilities for the 3B7C (2007) and 3B9C (2004) DXpeditions: 3B7C QSLs should now be sent to M0ZAK (Jim Steel, 6 Central Avenue, Shepshed, Leics LE12 9HP, United Kingdom) and 3B9C QSLs should now be sent to G3RAU (Derek Moffatt, Mill House, Middle Street, Glentworth, Gainsborough, Lincs DN21 5BZ, United Kingdom).

QSL KG4AJ ---> Buzz, NI5DX, has assumed the duties of QSL manager for Norm, KG4AJ, who expects to be at Guantanamo Bay for two years. A new QSL card will be designed, and it will take about 4 weeks to receive the cards once the order has been placed. Buzz is awaiting a log transfer from Norm, then he will able to confirm all past contacts with KG4AJ.

QSL T32C ---> "The card design has been finalised and we plan to start mailing cards in January after the Christmas postal rush", G3XTT stated in the latest press release dated 11 December (see www.t32c.com). "We have a team of 10 QSL managers ready to start processing the T32C cards and we estimate that we will eventually confirm around 140,000 QSOs". As for LoTW, "we promised an upload within six months and, in practice, it will be very much earlier. We wanted to upload as clean a log as possible and have made some 500+ editorial changes to the log as a result of feedback from the log uploads to Club Log and notes received from many of the Deserving. But we are very conscious that many of you want to do a DXCC update before year-end. Therefore, LoTW permitting, we plan to start the upload on 15 December, just over six frenetic weeks after our return from T32C. Uploading 213k QSOs is a huge task and we don't necessarily expect it to go smoothly first time (D68C, 3B9C and 3B7C all experienced problems), so the upload may take several days to complete".

+ SILENT KEYS + Harry Berry, G0JMU (7Q7HB) died of a massive heart attack on 12 December. He was regularly active from Malawi for a few months every year. "All of his logs are in my possession", his QSL manager (G0IAS) says, "any outstanding cards will be answered".
Other recently reported Silent Keys include Benjamin Alfonza Shaver Jr (AA4XU), Derek Nicholls (G0GTC), Giulio Biagini (I5HUE), George J. Wesley

(KB2VO), Don Schmidt (N8AC), Robert H. Ekleberry (W4CKD), John E. Hamlet Jr (W4ZW), Frank James Connelly (W7ND), W. H. Deverall (ZL1VS) and Bert Howes (ZS6HS).

IOTA 50TH ANNIVERSARY MARATHON ---> The 50th Anniversary Marathon starts on
1 January 2012 [425DXN 1042]. For a two-year period (from 00.00 UTC 1
January 2012 until 23.59 UTC 31 December 2013), IOTA chasers are encouraged

to contact as many different IOTA groups as possible, and IOTA activators to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones. As participants will need the island name, not just the IOTA reference number, for the island station worked, those who post spots on the clusters are encouraged to include the island name in their postings where there is more than one IOTA group possibility. Full details of the Marathon are available on www.rsgbiota.org.

NOT THE MANAGER ---> Al, VE1AL has received two cards for contacts made with 3V8S during the CQ WW DX CW Contest 2009. "I am not and never have been the QSL manager for this operation", Al says, and adds: "also, I still receive cards for ZK2DD and VA1S. I have the logs for the ZK2DD operation for only July 1979. If the call was re-issued, I cannot help. The VA1S logs are no longer available. I won't return the QSLs to the senders because of new, onerous, charges by RAC for membership and use of its outgoing bureau".

ON5NT ---> Ghis reports that as of 20 December his new mailing address is: Ghis Penny, P.O.Box 6, 9700 Oudenaarde, Belgium (mail sent to his old POB 93 will be forwarded). The operations Ghis is the QSL manager for are listed on qrz.com

he following operation has been on hold pending a review of the status
of their location (In accordance with DXCC rule 8 regarding it being

They're at it again!!!!
Just a last minute reminder that the 3 Steve's (Steve- KF2TI,

young men, Andrew-N2IFB and Eric-K2EMZ will be guest op'ing
at the ARRL station, W1AW, Wednesday December 28, from
1700 - 2045 UTC. Alas and alack..dear Kurt aka Steve-W2MW
will be MIA as he has his priorities all screwed up
This is our 21th annual(give or take one or two) WAS DX-pedition
to Newington and we will be operating the following bands:
15, 20 and 40M SSB (Steve, Steve and Steve) Andrew-N2IFB
and Eric-K2EMZ will also be operating as "Steves" on 10 and 17M
and possibly 80M
Hopefully condx will improve and we will try to listen for outside
the US.
Packet spots will be posted.
If you work any 3 operators, we will send you a beautiful, full color
WAS (Worked All Steve's) certificate (suitable for framing). No
QSL is needed, as we will have copies of the log and send out a
certificate to all those who qualify. QSL cards to us are not
necessary for the WAS. If you want a W1AW QSL Card, please
send to them direct or via the buro.
The logs will be posted (hopefully) after January 1st on our
website:
http://the3stevesarc.org/
This is not an officially sanctioned ARRL event. It is run for fun by
the 3 Steves Amateur Radio Association (TSARC) - WK3SS (all
rights reserved) and we are responsible for the printing and
sending of the Worked All Steve's certificate (suitable for framing)
We would like to thank the ARRL for allowing us to play with their
great toys and putting up with us each year. Hope to work you

Hello DXers:

As I indicated earlier, I would NOT be publishing anything this week …
UNLESS … something happened that would justify it… I believe the
following concerning SABLE ISLAND justifies a SPECIAL BULLETIN…

Regular issue of QRZ DX will be out one week from today … Wednesday,
January 4th.

Hi Everyone-

We just got an update from Al Wilson, the Officer-in-Charge on Sable
Island. Waves this afternoon and evening will approach levels that may
breach the dunes and cause significant flooding of the landing area.
Al will do a visual observation tomorrow morning at 1200Z.

We met with Debbie, our pilot with Maritime Air this morning. We did a
weather assessment for the period Wednesday - Friday.

The winds are very strong in Halifax. It is very difficult to walk
outside with this strong winter gale. Rain and snow are blowing
sideways! A commercial airline crew is staying at our hotel and they
commented on how rough it was even in a large airliner. No doubt the
right call was made today.

Since we have a lot of free time, we will keep everyone posted via
www.cy0dxpedition.com

10611. RAC Orders in 2012

Folks,

As most all of you know, the US Post Office is raising its postage domestic and International. As far as I can determine, shipping on the cd will go up a good bit. At this time, I believe I can still hold the pricing of the RAC cd without change. I can absorb this increase, but should the USPS raise it rates another time, I will have to adjust the RAC pricing to cover the additional expense.

For the year 2012, the Pricing for the RAC CD will REMAIN THE SAME.

I still have several copies in stock if you or a friend need a new copy.

The following operation has been on hold pending a review of the status
of their location (In accordance with DXCC rule 8 regarding it being
"land-based"). After a brief review it was determined that this was, in
fact, a land based operation so it is now approved for DXCC credit:

If you had credit for this operation rejected in the past, send a note

CY0 - Sable Island DXpedition (Dec 28, 2011)
DELAYED
Flight to Sable Island delayed. Severe winds on the flight path to Sable made it unsafe to fly this morning. They will try again at 1200 UTC on Thursday morning. Even though conditions look better, a new concern is forecast for winds from the South in combination with high seas which could bring water onto the "beach runway". If this were to happen and the "beach runway" is lost due to standing water, there could potentially be no access to Sable Island for the next 4-5 weeks. Continue to monitor this website for the latest updates:

HK0NA - Malpelo Island (Dec 27, 2011)
LATEST NEWS
Four members from the HK0NA Team, namely Jaime HK1N, Sal HK1T, Faber HK6F and Bolmar HK1MW have departed from the pier at the Bahia Malaga Navy Base. They are aboard the Patrol Boat Jose Maria Palas. The target of this advanced team called The Fantastic Four is to set up all 11 stations, 2 camps and wireless network in order to have everything ready for the main group arriving on January 21, 2012. To these four brave men - who are going to spend more than 40 days on Malpelo and have sacrificed their holidays away from family - we have to express our admiration and gratitude. [dx-world.net]

KH3 - JOHNSTON ATOLL (Dec 24, 2011)
POSTPONED
Yesterday Susan W7KFI confirms rumours that her KH3 Johnston Island planned

operation has been postponed for 4-6 weeks. This is primarily due to USF&W (Fish & Wildlife) requiring that Susan pulls her boat out of the water and has the hull scraped, then repainted. Permission [to land] would then be granted. The shipyard who would do this work cannot get Susan an appointment until approx four weeks from now, so shove off date will be beginning February at earliest. Susan reaffirms she will definitely be going, and KH3 will happen, but now no firm date for the moment. Her permission to operate is through February. It's worth noting USF&W would prefer Susan to have the hull scraped and push off date within two weeks from now, however as already mentioned the shipyard cannot do the required work until four weeks time. Hello DXers:

Once again, I have received information that is important enough to justify a SPECIAL BULLETIN.....

73,
Carl, N4AA
****
UPDATE: 30 December 2011 - 0400 UTC

CY0 DXpedition - Delayed

The "beach runway" still has standing water. A Friday landing is not possible.

Due to the uncertainty of when the runway will be suitable for landing, we decided to delay the dxpedition and return to the US. We will announce any future dates via the various DX bulletins.

We are obviously disappointed, but have come to recognize that there is no perfect time to attempt travel to Sable Island.

Thanks for your interest in this dxpedition.

Murray, WA4DAN and Ron, AA4VK

3DA - 3DA0PW is the callsign issued to Phil, G3SWH and John, EA5ARC (G3OLU) for their 21-29 February activity from Swaziland [425DXN 1076]. They will operate CW only on 80-10 metres with two stations. They have a webpage at www.g3swh.org.uk/3da0pw.html. QSL via G3SWH and LoTW. [TNX G3SWH]
9A - The 9A prefix was issued to Croatia (previously YU2) twenty years ago. To celebrate this anniversary, several Croatian individual and club stations have been granted permission to add "20" to their prefixes (e.g. 9A0Z = 9A200Z, 9A1MM = 9A201MM, 9A2AA = 9A202AA, etc) from 1 January through 31 December 2012. Information on the relevant award can be found at www.hamradio.hr
CY0 - AA4VK and WA4DAN arrived in Halifax, Nova Scotia on 27 December in preparation for the Sable Island DXpedition [425DXN 1077]. Severe winds made it unsafe to fly on 28 December, and the "beach runway" on the island has been covered with water since the 29th. "Due to the uncertainty of when the runway will be suitable for landing", they reported on the 30th, "we decided to delay the DXpedition and return to the US".
FO - The VP6T team will be active as TX6T from Tahiti (OC-046) [425DXN 1076] both on their way to and returning from Pitcairn. The tentative dates are 15-16 January and 8-10 February. There might be a short operation as TX6T/p from Mangareva (OC-063) on 6-7 February, but that activity will depend on the early arrival of the return boat from Pitcairn. QSL via G3TXF. [TNX DX World]
FW - Laci, HA0NAR (www.ha0nar.hu) and other two operators will be active as FW0R from Wallis Island (OC-054) between 25 January and 23 February 2012. They will run two stations with amplifiers on 160-6 metres CW, SSB and RTTY, with a focus on 160, 80, 40 and 30m. On 5-10 February they will operate as TW0F from Futuna Island - same DXCC Entity but a different (and rarer) IOTA group, OC-118. QSL for both callsigns via HA0NAR.
HK0 - On 26 December four HK0NA team members (HK1N, HK1T, HK6F and HK1MW) departed from the Colombian Navy Base Bahia Malaga, destination Malpelo Island. The advanced team will set up two operating sites, 11 stations, 18 antennas and the wireless network in order to allow the main group to begin radio operations

immediately upon their arrival on 21 January. Bookmark
http://hk0na.com for updates.
KH3 - Susan, W7KFI has to postpone her operation from Johnston Atoll
[425DXN 1071] for 4-6 weeks. The US Fish & Wildlife Service
requires the she "pulls her boat out of the water and has the hull
scraped, then repainted. The shipyard who would do this work
cannot get Susan an appointment until approx four weeks from now",
her QSL manager (KH6CG) reported on 24 December, "so shove off
date will be beginning February at earliest". [TNX DX World]
PJ2 - Ron, N6EE and Chet, W6XK will be active as PJ2N from Curacao
(SA-099) during the ARRL RTTY Round-Up (7-8 January). QSL via LoTW
or direct to NN6NN. They also plan to operate digital modes as
PJ2/N6EE and PJ2/W6XK before and after the contest. [TNX DX World]
PJ4 - Peter, PA8A will be active holiday tyle as PJ4B from Bonaire
(SA-006) on 8-22 January. QSL via PA8A, direct only. [TNX NG3K]
PJ7 - Paolo, IK2QPR reports he will be active as PJ7/IK2QPR from Sint
Maarten (NA-105) on 8-16 January. QSL via home call.
T8 - Mike JA6EGL, Yasu JA6UBY, Masa JH6KXG and Yu JE6DND will be active
as T88SM, T88CP, T88BI and T88HK from Palau (OC-009) on 11-19
January. They plan to be QRV on 80-10 metres CW and SSB. QSL
direct to home calls. [TNX JN6RZM]
VK - Peter VK3ZPF, Matt VK2ADF and Kevin VK3KAB will be active as
VK3SAT from French Island (OC-136) on 7-8 January. It will be a
lightweight, battery powered operation on 80, 40, 20, 15 and 10
metres. Further information can be found at qrz.com under VK3SAT.
VP9 - Jamie, WW3S will be active as VP9/WW3S from Bermuda (NA-005) on
5-10 January, including activity in the ARRL RTTY Roundup. QSL via
home call and LoTW. [TNX The Daily DX]
W - The Baton Rouge ARC (W5GIX) will be active from Grand Isle
(NA-168) on 6-8 January. Operators mentioned are AD5VC, K5DF,
K5DFD, N5IB, W5AJD and W5XU; they plan to be QRV on 80-10 metres
and possibly 6m SSB, CW, and digital modes. [TNX rsgbiota.org]
XU - Alex, UA9YAB and Alex, UA9YPS will be active as XU7YAB and XU7YPS
from Cambodia on 3-6 January. A side trip to IOTA group AS-133 is
also planned. QSL via home calls. [TNX DX World]
YV - A team of Venezuelan operators will be active as YX6AJ from Angel
Falls, the world's highest waterfall, in the Canaima National Park
on on 3-6 January. QSL via YV5AJ.

ANTARCTICA ---> Mika, OH2FFP will operate from a few bases in Antarctica
between mid-January and mid-February. Callsigns to be used are OH2FFP/p from
Nordenskiold multinational camp, OJ1ABOA from the Finnish station Aboa and
SM/OH2FFP from the Swedish station Wasa.
Bhagwati, VU3BPZ expects to arrive at Bharati, India's new reasearch
station located in the Larsemann Hills on Princess Elizabeth Land in early
January. He will remain at the base until March 2013, and he plans to be QRV
on the HF bands in his spare time, possibily with a special callsign. QSL
via I1HYW. [TNX DX World]

DIAMOND DXCC CHALLENGE ---> To celebrating the 75th anniversary of the DXCC Award, the ARRL has created the Diamond DXCC Challenge, which will run from 1 January through 31 December 2012. The country list to be used for the Diamond DXCC Challenge is based upon the list of 231 places shown in 1937. The idea is to work nowadays entities (not only traditional DXCC entities, but also cities, IOTA groups, and various sub-political entities inside DXCC entities) that represent the places listed 75 years ago. Complete details can be found on the dedicated web pages at www.arrl.org/diamond-dxcc

CONTEST UNIVERSITY ---> Early bird registration is now open for 2012 Dayton Contest University (CTU) will be held on 17 May at the Crowne Plaza in Dayton, Ohio. It will be the sixth year for CTU Dayton. Topics, professors and registration form can be found on http://contestuniversity.com

DX UNIVERSITY ---> DX University (DXU) is the twin to the very successful Contest University (CTU), providing high-caliber offerings for beginning and experienced DXers alike. The first session will be held on 20 April 2012 at the Holiday Inn in Visalia, California. Among the lecturers are AA7A, G3SXW, K4UEE, K9LA, N7NG, W3UR, W6OAT, W9KNI and XE1KK, many of whom are inductees of the CQ DX Hall of Fame. Learn the secrets of operating techniques for working DX, optimizing stations & antennas for DXing, about propagation, information sources, awards, and ethics, remote operating, QSLing and much more. You will also get the DXpeditioner's view of how DXers should operate to get into the log. Complete information can be found at www.dxuniversity.com; registration will begin on 2 January 2012. [TNX G3SXW]

DXCC NEWS ---> E44PM (Palestine, 2011 operation) and 5N6/YL2SW (Nigeria) have been approved for DXCC credit. The latter had been on hold pending a review of the status of the location (in accordance with DXCC rule 8 regarding it being "land-based"). If you had credit for 5N6/YL2SW rejected

in the past, send a note to bmoore[@]arrl.org to have your record updated. You can see the results when the change has been done to your record by checking your LoTW account or, the DXCC daily numbers. [TNX NC1L]

HS0AC ---> The Northern California DX Foundation announced a "Christmas gift" of $500 to help rebuild and re-equip the Radio Amateur Society of Thailand's HS0AC Club station that was destroyed by recent flooding [425DXN 1076].
The three towers and multi-band yagis were not harmed, the clubhouse itself can be refurbished and used again, and the HS0AC computer logs are safe. However, there are no surviving radios: 14 rigs were lost along with amplifiers and all other devices (read the "HS0AC Horror Story" at www.qsl.net/rast/)
HS0AC is appealing to the world to help re-build. The goal is to get at least one complete station replaced as soon as possible, but replacement will expand as funding is available. This station is open for operation by any licensed amateur, from anywhere, and for decades has represented Thailand in contests and as a first HS DX contact. Please help Thailand hams by donating any amount via PayPal (donate[@]rast.or.th). All donations will go entirely to rebuilding the station.

Toute l’équipe de PJ4C vous souhaite une bonne et heureuse année 2012
Nous sommes à 11 jours du départ, tous remontés à bloc.
Le 12 décembre dernier, nous avons expédié une palette de 600 kg de

Je tiens à remercier toute l’équipe du radio club de Provins F6KOP qui a
permis de préparer, d’emballer et d’envoyer en temps et en heures la
palette de matériel. Un grand merci également a ON7RN, Eric et Peter PJ4NX, pour
leur aide avec le transporteur hollandais.

PILEUP! ---> The latest issue of Contest Club Finland's newsletter, "PileUP!", is now available at http://www.helsinki.fi/~korpela/PU/PU.html. "It is in English for the most part and includes fresh air from the Far North", Martti OH2BH says, and it is quite worth a look.

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fourteen different galleries include nearly 9700 cards for the ten Most Wanted DXCC Entities (2004-10), the 60 deleted DXCC Entities, obsolete prefixes, stations from Magrebh from 1947 to 1962, D5 and DL5 stations from 1945 to 1962, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS. plus a gallery for cards not accepted by DXCC. Several cards are still needed and your participation is encouraged - please visit www.LesNouvellesdx.fr and send your comments to lesnouvellesdx[@]free.fr [TNX F6AJA]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Erminio Pandocchi I2EOW (i2eow[@]fastwebnet.it).

YASME EXCELLENCE AWARDS ---> In 2008 The Yasme Foundation (www.yasme.org) established the Yasme Excellence Awards, to be awarded "to individuals who through their service, creativity, effort and dedication have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement as all three are necessary for amateur radio to grow and prosper". The latest recipients, announced on 2 January, are Roger Balister (G3KMA) and Martin Atherton (G3ZAY), for their many years of dedicated service to the Islands on the Air (IOTA) awards programme.
The YASME Board of Directors also announced supporting grants to The DX Summit, HS0AC (Radio Society of Thailand's Headquarters Club Station), ClubLog, NCDXF Beacon Project and N4MC's VanityHQ callsign database project. [TNX W6SZN]

FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012
Jan. 9, 2012
Contact: bob@...
The advance team to Malpelo, commonly referred to as the "Fantastic Four", are working very hard and doing a great job on the Island, despite several days of heavy rain and wind. All of the camp infrastructure and antennas for OP.B (bajo) is now complete and the guys have tested all the antennas. They appear to be working as planned with good signal reports from around the world, including Asia long path.
The next step in the project is to make safe the climb to the top of the mountain where OP. A (alto) will be situated. Safety lines are being installed along the most treacherous sections of the trail. Once in place, construction will begin. There will be an operating tent with four radios and 500 W amps and six antennas. There will also be a sleeping tent, as the decision has been made to send crews to the top for 48 hour shifts. This is to minimize the risks of transit up and down.
Under the current scheduling plan devised by W0GJ, each team member will serve on four 48 hour shifts during our stay on the island. Beginning at 0001 Zulu, January 10, 2012 the advance team will begin using the HK0NA call sign.
Please understand that their primary purpose on the island is to prepare everything for the team arriving in about 10-12 days. In their off time, they may be QRV.

Any contacts made with the men using their home calls should count as valid contacts with Malpelo and will be confirmed through the team's QSL manager N2OO. Keep in mind their logs won't be sent to N2OO until after the DXpedition and those QSOs will not show in the HK0NA "log lookup".
The team has asked two experienced DXers to act as team "Pilots". San, K5YY is chief pilot and all communications to the team will go through him. Col, MM0NDX will act as the European Pilot. Please check the website for their "guidelines." And please, do not contact them prior to the beginning of the DXpedition which should be on the afternoon of January 21 st if all goes well.
We want to thank all of our sponsors for their generosity. This includes DX Foundations, DX Clubs and hundreds and hundreds of individual DXers who have contributed toward our expenses. Contributions can be made via our website at: www.hk0na.com/sponsors

We plan periodic uploads of pictures and updates from the island.
Watch the website for ongoing news.

Thanks,
Jorge Prieto, HK1R Co-leaders:
DXpedition leader Bob Allphin, K4UEE, and
Gregg Marco, W6IZT

Hi,

I have got a bad news from Pista HA5AO.

He and HA5UK are at Brisbane 1 airport and waiting to the next step.
They lost one driving-gear of one of their SteppIR antenna. Some one has stolen
on route of Budapest- Frankfurt-2 - Hong Kong - Brisbane-1.

10639. Success rate of $2 bill vs. IRC ?

Yahoo group: GOLIST (2011 — 2012)

From: Jim Reisert AD1C

Does anyone have actual statistics comparing the success rate of $2 vs. one IRC for direct QSL card return postage? With the price of an international postage stamp in the USA going up to $1.05 on January 22 (and the subsequent price increase for a new IRC), $2 seems more and more like a better option. There is still competition from used IRCs priced below $2.

What got me thinking about this was seeing a $2 bill in some donation box in the Frankfurt (DL) airport yesterday.

Every couple of years I go to the bank and order two hundred-bill wraps of uncirculated two dollar bills. Bills taken out of circulation can often be felt thorough the envelope, but uncirculated bills are crisp and unwrinkled and feel like just another piece of paper. Even uncirculated one dollar bills can be felt if you include two or more of them. Two-dollar bills are a great QSL tool.

HA South Pacific Tour 2012

Press Release II

For immediate release

We had two focuses on our announced January/February 2012 South Pacific DX
Tour: T2 and T30 with possible operation from T33. We are regret to advice
that we had to cancel the operation from T2 and T30. That was the bad news.
The good one is that our new target is C2, Nauru.

The reasons of these very last minute changes, which are out of our control,
are as follows:

1.. We had to cancel the T30 as the flights from Fiji to Tarawa has been
suspended since 12 September 2011, due to the air traffic dispute between
Kiribati and Fiji. There is high risk to extend the flight disruption for
even longer period. After the consultation with the airlines and our
consulate in Canberra, we were advised that "there is high risk of not to
get to Tarawa or can not leave Tarawa for a long, undefined period of time.
This situation does not affect the flights to Tuvalu and Nauru."
We were waiting until the very last minute hoping that the air traffic
dispute between Fiji-Tarawa-Fiji will be solved, but the flights has not
been restarted, yet.
2.. Tuvalu government declared a nation-wide state of emergency on 28
September 2011 due to critical shortage of drinking water. The state of
emergency was declared after existing desalination plants broke,
exacerbating an already dire situation. The water crisis is still serious on
two of the worse affected islands, the capital island of Funafuti and
Nukulaelae. The airlines till do not accept excess baggage at all, including
hand luggages, because of the loads of drinking water containers by Red

Cross. We could check in less than the third of our technical stuff, resulting significant and unreasonable limitation of the station set up. Due to this restriction we decided to cancel the T2HA Tuvalu operation, as well.
3.. Due to the above detailed situation, we decided to change the target our DX pedition to C2, Nauru. Operation is planned between 10 January and 6 February 2012 as C21HA with two stations on all HF bands. Log search and further info: http://ha5ao.novolab.hu
It was the first time that we asked support and received contribution from DX Foundations, DX Organizations and individuals. We appreciate these supports very much. However we will contact all organizations and individuals who supported us, and will pay the donations back if these changes would make them disappointed, despite Nauru is much better ranked on the most wanted DXCC list.

Hello;Yesterday the DXCC desk confirmed that QSOs made by the advance team , when they used their individual calls, will count for DXCC purposes. Those logs will not be available until after the DXpedition concludes. May we suggest that you work HK0NA also.We intend to upload the HK0NA logs to ClubLog soon after the arrival of the main operating team. Don't bother checking the "Log Online" until then.Lastly, our volunteer pilots kindly request that you not contact them until after the main operation begins!

YL International Meet 03-09 May 2012 Update -
We have 47 YLs and 26 others registered for the Meet. If you are going to join us it is time to register. I will have to close registrations by the end of February for the Ghan and early March for the Adelaide Meet.

Unfortunately we have had to change the Ghan trip at what I consider the last minute. I had a call from our travel agent, Lyn. Great Southern Rail (the Ghan train operator) has just rung her to say that all Wednesday trains have been cancelled including our trip from Adelaide to Alice Springs! Yes, we are now doing something, but not overnighting on the train to Alice Springs. We will still be able to do the Alice Springs to Darwin on the train with a stop at

Katherine Gorge and everything else. Lyn could not convince them that they should change their minds for us. After all we have only been planning this trip for 4 years!

At the moment, I do not know exactly what the changes will be, but the plan is to fly to Alice Springs on the morning of the 9th of May and have an extra day and night in Alice Springs with a bush dinner under the stars. We will also have a little more free time in "The Alice" to nvestigate the town. The cost of the trip will probably come down.
I will post the changes on the meet website http://www.ylinternational2012.com/ and send out amended invoices just as soon as I get it.

And just to make life more interesting we are changing our Internet provider and therefore my email address. Please send all emails to vk5tmc[at]internode.on.net

I will keep you informed. If these changes mean you no longer wish to do the Ghan trip, you will get a full refund of the deposits paid etc.

Thankfully everything else seems to be falling. Please get your registrations in so you can join the fun in Adelaide.

3D2_cr - Hrane, YT1AD and a multi-national team of operators (AA4NN, AD6E, AH6HY, EA1IR, I2VGW, K3LP, K6SRZ, N6PSE, PY5EG, RW4NW, UA4HOX and WD5COV so far) will be active on all bands and modes as 3D2C from Conway Reef (OC-112) between 25 September and 6 October. QSL via YT1AD. Two more operators are being sought. Further information can be found at www.yt1ad.info/3d2c/index.html [TNX YT3W]
C2 - Pista, HA5AO and George, HA5UK have been forced to cancel their announced South Pacific Tour (T2HA, 3D2HA, T30HA and T33HA) [425DXN 1060] owing to reasons beyond their control (read the details on http://ha5ao.novolab.hu/). Their new target is Nauru (OC-031), and they will be active as C21HA until 6 February, with two stations on the HF bands. Being unable to use their SteppIR BigIR (its stepper drive motor has been stolen!), they have set up "an inverted L antenna for the second station, but it means strong limitation in signal strength. It is good for NA/SA but unlikly for EU. The two verticals are doing the job well, especially on the higher bands". QSL via HA5UK. [TNX HA0HW]
CE - Roberto CE3CT, Pedro CE3FZ and Luc LU1FAM will be active as 3G7C from Chiloe Island (SA-018) on 15-18 April. They will have two stations active on CW, SSB and RTTY, with a focus on 30 metres and the low bands. QSL direct to CE3FZ (Pedro Barroso, P.O. Box 3159, Santiago, Chile). Further information can be found at http://3g7c.blogspot.es/ [TNX LU1FAM]
EI - Special callsign EI80IRTS will be in use throughout 2012 to celebrate the 80th anniversary of the Irish Radio Transmitters Society (IRTS). QSL via EI4GXB.

FH - Hartwig, DL7BC will be active as TO7BC from Mayotte (AF-027) from 23 March to 6 April, including an entry in the CQ WW WPX SSB Contest. On 20-22 March he will be operating under his CEPT licence as FH/DL7BC. QSL via home call, direct or bureau. [TNX rsgbiota.org]

GM - The Orkney Amateur Radio Club (http://eu009.webplus.net/) will Operate three special event stations on 21-29 January in support of the Royal National Lifeboat Institution's fundraising day. Look for GB1OL (QSL via MM5DWW), GB2OL (QSL via GM0WED) and GB4OL (QSL via GM0IFM) to be active on most bands SSB, with some CW and data. [TNX VA3RJ]
HK0 - The advance team on Malpelo (HK1N, HK1T, HK6F and HK1MW) continue their hard work of setting up the HK0NA operating sites [425DXN 1078]. Their primary purpose on the island is to prepare everything for the main group arriving on 21 January, and they are QRV in their spare time. They have been using HK0NA since 10 January (logs to be uploaded to ClubLog after the arrival of the main operating team). QSOs made with the four men using their home calls will count as valid contacts with Malpelo and will be confirmed through the team's QSL manager (N2OO). Those logs will not be available until after the DXpedition, and those QSOs will not show in the HK0NA "log lookup". [TNX K4UEE]
KL - Rick, K6VVA is in the planning stages of a "North Slope IOTA Extravaganza" including operations from three rare groups in July. Tentative dates, subject to change owing to local weather conditions, are:
19-21 July K6VVA/KL7 Crescent Island (NA-172)
23-24 July K6VVA/KL7 Barter Island (NA-050)
25-26 July K6VVA/KL7 Endeavor Island (NA-004)
QSL via N6AWD, direct or bureau. Mike, K9AJ will join Rick for NA-172, and maybe also for the other two islands. Bookmark www.k6vva.com/iota/na172 for updates.
LX - Special callsign LX75RL will be in use throughout 2012 to celebrate the 75th anniversary of the foundation of the Reseau Luxembourgeois des Amateurs d'Ondes Courtes (the Luxembourg Amateur Radio Society affiliated with IARU). QSL via LX2A. Information on the relevant award can be found at www.rlx.lu
PJ2 - Tom, AA9A will be active as PJ2/AA9A from Curacao (SA-099) from 21 January to 4 February. He will operate holiday style on 40-10 metres CW and SSB. QSL via AA9A and LoTW. [TNX The Daily DX]
PJ4 - After participating in the PJ4C DXpedition, Norbert DJ7JC will remain on the island for a few more days. Look for him to operate as PJ4M from Bonaire (SA-006) on 23-30 January. QSL via home call.
SM - ON4AWT, ON5RZ and ON7DS will be active from SI9AM (the King Chulalongkorn Memorial Amateur Radio Society, www.si9am.se) in Ragunda on 25-30 January, including an entry in the UBA DX Contest. QSL via SM3CVM, direct or via bureau. [TNX SM3CVM]

VP8 - Zorro, JH1AJT will be visiting the Falkland Islands (SA-002) on 21-28 January, and will operate holiday-style as VP8DNT on 80-10

metres from the QTH of VP8LP. QSL via JH1AJT. [TNX DX World]
W - Bodo, DF8DX will operate mostly CW as KT3Q/6 from Santa Catalina Island (NA-066) on 14-15 January, from around 1 UTC on Saturday until 22 UTC on Sunday. QSL via DF8DX. [TNX The Daily DX]

Col McGowan, MM0NDX (Europe) and San Hutson, K5YY (rest of the world) will act as pilots for the Malpelo DXpedition. The team on the island will be getting daily updates from the pilots. They "will not be relaying personal requests for special bands, modes, times or why not in the log or changing a log, etc. The purpose of the updates is to assist the HK0NA team in specific operational 'refinements' to their basic operational plan". Please please read and follow the basic guidelines on the website (http://hk0na.com/) and do not contact the pilots prior to the beginning of the DXpedition, which should be on the afternoon of 21 January if all goes well.

NCDXA AWARDS ---> The National Capitol DX Association (www.ncdxa.org) is pleased to announce that its "DX-Pedition of the Year Award 2011" has been given to Hrane Milosevic, (YT1AD) for 3D2R, an "Outstanding DX-Pedition Operation and Amateur Radio Youth Development Program with Rotuma High School". VP6T ---> "6m operation from Pitcairn has not been on our agenda since the early planning stage", the VP6T clarified on 11 January, "as well as all others bands/modes that are not specified on www.vp6t.org". If time permits, they will try to locate an old 5-element Yagi 6m antenna (left by OH2BR probably), and "if it is still in good shape after 12 years spent on the island, then we may install it and make some tests on 6m, using conventional modes (CW and/or SSB)". In that case, it will be announced on the website, or on air by the HF operators.

VK0TH QRT

Operator behaviour has become a problem. JA and EU stations
constantly calling over other stations, don’t hear or jam and have
turned a fun hobby into a stressful environment. I worked over 200
JA stations today (13/14 January) and when sending “NO JA” in the
call it all got very ugly. *I will be QRT for the next few days*
while I re-evaulate how much radio I will continue doing while on
Macquarie Island and how it is done. My apologies to those that
wanted VK0/M. I can’t see this behaviour changing and I’m not
willing to spend my free time doing something that is no longer
fun. My apologies. Trevor.

Unfortunately Bruno IK2PZG is silent key ... Years ago has activated
many islands in Campania and in the Venetian lagoon. Now look at and
hear us from the sky. No more QRM, no more pile up...

18000 Qos (http://www.pj4c.com/pj4c/joomla/77-news/106-18000-qos)

After the first weekend more than 18 000 Qso are in the log.

All equipment is installed except the second antenna for 80m, but it will
be soon.
Last night they had some difficulties with HF disturbing computers on
160m, that's why they sometimes disapear, it is now fixed.
We also have many difficulties with HK0NA pileups for 2 reasons :
1) they were not supposed to be active now, so we did not arranged qrg
with them before departure
2) people do not understand CW and spot wrong calls on the cluster.
So from today we change all *.024 qrg to *.018 on CW. We have also asked
the ops to give their callsign every qso to prevent any mistake.
Logs are uploaded real time on clublog for CW and SSB. The RTTY qso are
uploaded manually 1 or 2 times per day.
If you are not in the log please work us again. If you cannot, send an
email to the qsl manager AFTER the expedition.
Everything is going fine, Bonaire is a nice place, and ops have a lot's of
pleasure to work you !

18000 QSO (http://www.pj4c.com/pj4c/joomla/77-news/106-18000-qos)
QSO sont enregistrés après le premier week-end.
Tout est installé à l'exception de la deuxième antenne 80m qui le sera
très prochainement.
Les difficultés apparues la nuit dernière sur 160m (interférences avec
les PC) ont maintenant disparu.

Nous avons des difficultés avec les pile-ups de HK0NA pour deux raisons :
1) Ils ne devaient pas être actifs maintenant aussi n'y avait il pas eu
de concertation avec eux avant notre départ.
2) Beaucoup lisent mal ou pas du tout la W ce qui ne les empêche pas
de signaler des indicatifs erronés sur les clusters.
Décision : Toutes les fréquences *.024 qrg passent à *.018 en CW.
Nous avons demandé aux opérateurs de passer leur indicatif après chaque
QSO.
Les carnets de trafic sint chargés sur en temps réel pour la CW et la SSB.
Pour les Data, c'est une à deux fois par jour.
Si vous n'êtes pas dans le log, essayez de nous recontacter.
Si vous n'avez pas pu le faire, envoyez un message au QSL manager APRES le

retour d’expédition.
Tout va pour le mieux et Bonaire est un endroit agréable d’où les opérateurs prennent beaucoup de plaisir à vous contacter.

Subject: TN2T expedition

hello all,

just to remind you that we will be leaving for TN next Saturday
January 21st .
We will be staying at the Malonda Lodge in Pointe Noire, near the
Atlantic Ocean so we hope to have a good signal
in the most populated areas . Of course we will pay special attention
to 160 as this is my favourite band .

We suffered from very high noise level at 9Q50ON so we have also
packed a HI Z 4 square receive array,
hoping that this system will improve S/N ratio . We will be able to
use this system on 80 and 160 at the same time in different directions .
If we have enough space available we might put up some beverage
antennas .

When you would like to get in touch with us during the dxpedition you
can do this via email to ON4ATW .
If internet permits I will try to login on ON4KST lowband chat for
realtime feedback .

We will finish packing shortly and it looks like we will not be
travelling lightweight

73 and hope to work you from TN2T

Hi friends :
All the stations are full operating. 45000 QSO logged now.
New pictures posted at _www.pj4c.com_ (http://www.pj4c.com)
From Japan , Taka, JA2JPA says that 160M is still difficult , but everyone is looking for 160M QSO . 80m signals are goods but 75m need huge antennas .
Jeff, F6AOL, located near Paris, says at 0300z this morning, that 160m signals are very more weaks as they were yesterday so he thinks that there were no good chances in Europe to work the top band on SSB.
On 6, according to the spots, only South America (PY, YV, LU,..), seems to be able to make contacts with PJ4C, with good chance; sometimes the beacon is said very strong.
Someones are hunting for Grid Locators, especially for CQ DX Field award and some other on 6, so know that the stations are all set up in FK52VC.
Have fun, be lucky, 73

Bonjour à tous
Tout continue pour le mieux, 45000 SO sont déjà dans le log.
De nouvelles photos ont été postées sur _www.pj4c.com_ (http://www.pj4c.com)
Du Japon, Taka, JA2JPA indique que le 160m est toujours très difficile, mais que les opérateurs restent à l'affût et recherchent PJ4C sur la Top Band. Les signaux 80m sont bons mais sur 75m ça se gâte et seules les grosses installations d'antennes semblent arriver à contacter PJ4C.
Jeff, F6AOL, situé près de Paris, indique à 0300z ce matin, que les signaux 160m sont beaucoup plus faibles qu'hier et qu'il semble impossible en EU de contacter PJ4C en SSB sur cette bande.
Sur 6m, selon les spots, il semble que seule l'Amérique du Sud (PY, YV, LU,..), ait de bonnes chances de faire QSO. Sur cette zone la valise est parfois reçue avec de forts signaux.
Pour ceux qui chassent les Locators spécialement pour les diplômes CQ DX Field et quelques autres sur 6, sachez que toutes les stations sont incluse dans le carré FK52VC.
Prenez du plaisir, bonne chance et 73
L'équipe PJ4C

Retransmis avec ses amitiés par

10670. Malyj Vysotskij Deletion from DXCC

The day of deletion has now been confirmed: Finnish and Russian ambassadors met January 17th and exchanged the documents signed by the presidents of both countries. The new agreement of the lease of Saimaa Channel will be in force one month from today – February 17th. As the new agreement does not include Malyj Vysotskij, the island will be deleted from the DXCC-list the day before, February 16th 2012.

This is, of course, subject to the decision of ARRL DXCC Committee.

It’s unlikely that any DXpedition will come on from the island before the deletion, although our Russian friends would have a possibility to do it.

It is our sad duty to report the passing of Johan (Joop) Box at
approximately 17:00 GMT today, Thursday, January 19, 2012.

He had a severely infected kidney. When the doctors tried to remove it,
they found the area surrounding it full of infection, so they could not
remove the kidney.

His wife, Yvonne, and daughter, Barbara, Sue, myself and Lisandro, P43L,
were with him when he passed away.

He was a hell of a guy and will be sorely missed.

Services are pending.

Please include this announcement in all of the appropriate reflectors.

SPECIAL EVENTS -

DL, GERMANY
- The sinking of the passenger liner Titanic has its 100th anniversary on 15 April, 2012. After hitting an iceberg the ship sank 300 nautical miles southeast of Newfoundland. Unfortunately, only about 700 of the 2200 passengers and crew members were rescued. It was one of the worst maritime disasters of civilian shipping. This resulted in numerous measures to accelerate the rescue of people at high seas. An international radio distress frequency was introduced and the duty to its constant monitoring. Even today these decisions are still valid and are written down in the SOLAS treaty, adapted to the technical possibilities of today. The local DARC club in Schoenau (S65) commemorates this historic event and the beginning of coordinated emergency communications with the special callsign DM100MGY until 31 December, 2012. BITS & PIECES -

Cuban Radio Amateur Service Regulations Have Been Modified -
Cuban radio amateur service regulations have been modified to provide

the use of segments of the 80 and 40 meter ham bands to the third class operators license holders, that before these new rules could only operate on segments of the 160 and 2 meter bands. The news was much welcomed by the more than two thousand operators that hold a CL prefix callsign... the first step in a Cuban radio amateur career... By the way, *the CL prefix holders do not need to pass a CW Morse Code radiotelegraphy test*, but they do have to take a 5 words per minute receiving and also transmitting test in order to upgrade towards a second class operators certificate that opens the way to obtain a CM prefix callsign, that provides access to many more operating privileges...
So, if you start hearing stations on the 40 meter band from *7100 to 7125 kiloHertz* using a CL prefix, be aware that they are a new generation of Cuban radio amateurs that for the first time ever are having access to working DX on 40 meters... The segment assigned to the CL stations on 80 meters span from *3550 to 3750 kiloHertz*, but very probably you will hear them much more often on 40 meters because the seven megaHertz ham band is open for long distance contacts much more frequently than the 80 meters band. The maximum power allowed to the CL prefix stations, the Cuban beginners license has been set at *10 Watts*, that they can use on *CW, Single Side band and double sideband voice*.

UK Radio Amateurs Special Callsigns -

The Radio Society of Great Britain and Ofcom have reached agreement on the optional use of special callsigns for two significant events during 2012. This will add or substitute the letter "Q" in the place of the Regional identifier in the callsign. Deletion Of Malyj Vysotskij -

The day of deletion has now been confirmed: Finnish and Russian ambassadors met January 17th and exchanged the documents signed by the presidents of both countries. The new agreement of the lease of Saimaa Channel will be in force one month from today - February 17th. As the new agreement does not include Malyj Vysotskij, the island will be deleted from the DXCC-list the day before, February 16th 2012. This is, of course, subject to the decision of ARRL DXCC Committee. It's unlikely that any DXpedition will come on from the island before the deletion, although our Russian friends would have a possibility to do it.

Hi friends
The crew continues to appear on 6 but exclusively SA stations seem to be lucky. Watch at the beacon signals which are received 559 to 599 or 55 to 59 throughout the SA continent.
From far Asia (Japan area), on the morning, the conditions are unstable but PJ4C is heard on 10,12,17,20 during UTC 22:00 to 23:00,
On low bands, 40, 80M are heard - UTC 09:00 to 10:30 time. On 75M still many station puzzling the signal exchange and not clear signal.(this is only the time opening JA including 160M)
On 160M everyone is watching the band and many USA web showing the signal is great but nothing heard in JA.
Sidely , at 11:00 UTC time HK0 160M signal is coming up to JA and over 30 stations made a contact with them already.
Information from Far East thanks to Taka JA2JPA,
From Europe, Jeff, F6AOJ - (_http://f6aoj.ao-journal.com/crbst_808.html_ (http://f6aoj.ao-journal.com/crbst_808.html))- is still watching the top band and 80m, from his QRA located near Paris.
These are his observations this early morning.
20-01-12 ,
- 05:00z, 80ssb good signal, so it could be possible on 160, so wait & see.
- 06:00z, 160ssb , 45 & 50 are QRL by local QSO’s fm EU. Statics level is very high .
- 06:15z , 46 down 4, band clear but no signal, and nobody more.
- 06:30z, nobody on the band.
Thanks Jeff, F6AOJ.
Be lucky and have fun

Bonjour à tous
L’équipe apparaît toujours sur 6m, mais seules les stations de SA semblent pouvoir contacter PJ4C . Surveillez les clusters.
D’Extrême Orient, (Japon), :
Ce matin (2200/2300 utc), les conditions sont instables mais les signaux sont entendus sur les bandes 12/15/17/20m.
Sur 40 et 80m, les signaux ont été entendus de 0900 à 1030 utc.
Sur 75m il a toujours autant de stations indisciplinées et beaucoup trop d ’interférences. (Noter que c’est la seule fenêtre possible PJ/JA, y compris pour le 160m)
Sur 160m, beaucoup de stations US signalent de forts signaux, mais au Japon pas de signaux clairs, il semble bien que rien ne passe.

Parallèlement, à 1100 utc, Malpelo, HK0NA , passait sur le Japon et une trentaine de QSO HK0/JA, ont été réalisés .
Ces informations nous ont été transmises par Taka , JA2JPA, Merci Taka..
Côté Europe, Jeff, F6AOJ (_http://f6aoj.ao-journal.com/crbst_808.html_ (http://f6aoj.ao-journal.com/crbst_808.html)), depuis son QRA situé près de Paris, continue de surveiller les bandes basses. Voici ses commentaires de ce matin :
20-01-12 :
- 05:00z : 80ssb le signal est très bon, ça devrait être possible sur 160ssb, SR F 07:36z, so wait & see.
- 06:00z : 160ssb 45 et 50 sont occupées par des qso locaux EU..., niveau de « static » très élevé.
- 06:15z 46 down 4, là cest clair, mais pas de signal ici. split quasi désertique.
- 06:30z : plus personne.
Merci Jeff.
Bonne Chance à tous
L’équipe PJ4C.

CUBA ---> Cuban radio amateur service regulations have been modified to permit access to the 80 and 40m bands to the third class operator licensees, holders of CL prefixed callsigns. They are allowed to operate on 3550-3750 kHz and 7100-7125 kHz, running a maximum of 10 watts on CW and phone. [TNX CO8ZZ]

DX DINNER ---> The Southwest Ohio DX Association (SWODXA) is pleased to again sponsor the DX Dinner, to be held in conjunction with the 2012 Dayton Hamvention on Friday, 18 May at the Dayton Marriott Hotel. Details can be found at www.swodxa.org [TNX W8GEX]

MALYJ VYSOTSKIJ TO BE DELETED ---> Back in 2010 a new agreement on the lease of the Russian part of the Saimaa Canal zone to Finland was signed by the Prime Ministers of the Republic of Finland and the Russian Federation. The exchange of the instruments of ratification finally took place on 17 January, and the the new agreement will come into force one month later. The new lease no longer includes Malyj Vysotskij Island, which therefore no longer satisfies the criteria under under which it was added to the DXCC List. "It's unlikely that any DX pedition will come on from the island before the deletion", OH2BU says.

QSL VIA RU3SD ---> The late Vladimir Ulyanov, UA5DX (ex UA3FDX) was the QSL manager for quite a number of stations. The following have been taken over by RU3SD: 4J0AUM, 4J0DX, 4J0DX, 4J1S, 4J56V, 4J57V, 4J60AA, 4K1AZI, 4K1V, 4K49V, 4K50V, 4K51V, 4K52V, 4K53V, 4K60AA, 4K6OF, 4K70DWZ, 4K7DWZ, 4K7Z, 4K80ADR, 4KP7Z, 9A/EW6MR, ES5FDX, EU5F, EU5ROPE, EU5RUB, EU6MM (for C.I.S), EU940OR, EV3DP, EV5V, EV5ZK, EV60BR, EV60GO, EV60OG (operator EW8ZZ),

EV65ZK, EV6DX, EV6ZK, EV7DP, EV8DP, EV9P, EW6MR, EW8ZZ, RC1X, RC4L/UC2WAY, RW3SR, RW3SR/1, SO9DX, SV9/UA3FDX, T9/RW3SR, UA3FDX and UC2WAY. [TNX The Daily DX]

SABLE ISLAND ---> "We are in the process of rescheduling the operation", the CY0 team reported on 14 January. "The goal is to select a time after the winter weather conditions to increase the certainty next time of being able to travel to Sable Island without delay from a winter storm". They also plan "to recruit a CW operator, with DXpedition or contest experience, to 'round out' the team". The plan is for WA4DAN to operate 70% SSB and 30% CW, AA4VK to operate 100% SSB and the third team member to operate 70% CW and 30% SSB. Bookmark www.cy0dxpedition.com for updates.

VISALIA 2012 ---> The 63rd Annual International DX Convention, sponsored by the Southern California DX Club, will be held at The Holiday Inn and Conference Center in Visalia, California on 20-22 April. Online registration and further information can be found at www.dxconvention.org

This morning they are very active on 80 to 20m, incl Warc, in the three mods.
On Jan 23, the team will begin to dismantle fthe stations, for all the gear should be packed late in the afternoon.
PJ4C will be aired as long as possible. However, the last two days of traffic have begun.
Stay tuned and be lucky .
Our good friend, Jeff/F6AOJ continues to monitor the low bands, frim near Paris ; these are his observation for this morning.
“
22-01-12
05:15z
160 rtty signal is very very weak, , UP. Some bursts in the QSB, typical on this band, but the frequency is clear without statics.
We can copy PJ4C even on the vertical antenna.
05:30z
The EU SSB QSO begin - à 59++ - even on the QRL PJ4C frequency. That’s the death for us. And it’s the last day!!
06:04z
I’ve sent 5 times my report , - in the QRM, skimmer says - "F6AOJ tu now k8..."
“
Thanks Jeff/F6AOJ

Bonjour à tous
Les deux derniers jours pour PJ4C.
Les pile ups sont toujours très importants, comme ce fut le cas hier sur 10m.
Ce matin, l’équipe est très active de 80 à 20m, Warc incl. , dans les trois modes.
Le 23, l’équipe commencera à démonter les stations, car tout doit être emballé, tard dans l’après midi. Ils resteront sur l’air aussi longtemps qu’ils le pourront.
Donc nous avons entamé les deux derniers jours de trafic.

Notre ami Jeff/F6AOJ, près de Paris, continue de surveiller les bandes basses, voici ses observations de ce matin :
«
22-01-12
05:15z
160rtty signal ultra faible, UP, des bursts dans le QSB typique du 160

mais la fréquence est très claire et sans statiques, on copie aussi sur la verticale

05:30z
début des QSO locaux EU ssb à 59++ ; c'est mort...
et c'était le dernier jour...

06:00z
le QSO local est fini, le signal a monté, l'espoir renaît

06:04z
après avoir envoyé 5 fois le report, ma fréquence étant QRM, skimmer en est témoin,
F6AOJ tu now k8...
»
Merci Jeff/F6AOJ.

10684. Limited future activity at Jan Mayen

Limited future activity at Jan Mayen
<http://dx-world.net/2012/limited-future-activity-at-jan-mayen/>

tags: Jan Mayen <http://dx-world.net/tag/jan-mayen/>, JX5O
<http://dx-world.net/tag/jx5o/>

Recently the Norwegian government declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators no longer visit since the main landing area is part of the Reserve.

The only places left on the island which could be used as landing and camp sites are in Kvalross-bukta and in B?tvika, in the very extreme (weather-wise) southern part of Jan Mayen. This will mean that most visits to the north part of the island (where previous landings occurred) will soon be impossible.

Whilst radio amateur operations may still be possible from these two locations, which are difficult to get to (rough landing, very strong winds with sand storms, no access to any shelters or resources etc), it now appears JX5O was probably the last major expedition to Jan Mayen and may well be for the coming years. It also seems that only professional, licensed staff members at the Olonkin base will be able to activate the island, with that in itself a rare occurrence.

The five VP6T operators are
now in full DX-pedition operating mode: i.e making QSOs, having a quick
bite to eat, then making more QSOs, then having a quick snooze before
making yet more QSOs. There are up to four stations on the air at any
one time, however with just five operators it’s not easy to keep them
all fully manned all the time.Today
(Monday 23 January) is a national holiday on Pitcairn. It’s called
Bounty Day. The five VP6T operators will be taking part in the
celebrations on Monday evening local-time [and hence expect to be QRT
from about 01z to 05z on Tuesday 24 January].VP6T logs with over 14,000 QSOs have already
been loaded to both ClubLog and LoTW.73 – The VP6T Team.

FOR IMMEDIATE RELEASE: January 24, 2012

*ARRL & CQ Sign Agreement to Provide
ARRL’s Logbook of The World Support for CQ’s Awards
*

(Hicksville, NY and Newington, CT - Jan. 24, 2012) – CQ Communications, Inc. (CQ) and ARRL – the national association for Amateur Radio, have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system.. The agreement was announced jointly today by ARRL Chief Operating Officer Harold Kramer, WJ1B, and CQ Communications President Richard Ross, K2MGA.

CQ's awards will be the first non-ARRL awards supported by LoTW and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow. The ARRL’s LoTW system, an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47,500 radio “hams” worldwide. It already has records of 400 million contacts and grows weekly. The target date for beginning LoTW support for WPX is April 1, 2012. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply.

ARRL Chief Executive Officer David Sumner, K1ZZ, observed that this step gives radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ’s popular operating

awards. “LoTW has significantly increased interest and participation in the ARRL’s DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards.”

CQ President Richard Ross, K2MGA, said he is very pleased to be able to move forward with Logbook support for CQ awards. "We have had excellent results with electronic confirmations for several years," he said, "and I am glad that we are now able to begin expanding that convenience to those participants in our award programs who use Logbook of the World. We look forward to a smooth launch for WPX, and to the expansion of LoTW support to include the rest of our award programs as well."

ARRL (www.arrl.org <http://www.arrl.org/>) is the national association for Amateur Radio in the United States and publisher of its membership journal /QST/. CQ Communications, Inc. (www.cqcomm.com <http://www.cqcomm.com/>) is publisher of /CQ Amateur Radio /and several other magazines. There are currently over 700,000 Amateur Radio licensees in the USA and approximately 2.5 million worldwide.

3B8FA, Patrice “Pat” Momple, has been inactive for a long time and is now QRV again. He has chosen Buzz, NI5*_DX_*, as his QSL manager. Pat has only begun using a computer about a month ago and Buzz has recommended a few logging programs for Pat to use. There will be a learning curve for computer logging, but Pat will master it quickly.

Buzz will be able to confirm only those contacts made with 3B8FA from January 23, 2012 forward. Buzz will be designing a card and having it printed. It will take about 5 weeks for Buzz to receive the cards from the printer.

6 METRES & UP -

- PSK2k, New Meteorscatter Software Available -
The software is still in development and there was a lot of feedback and this resulted in some changes in the software. Main reason were some issues with non-decodable bursts. This is not caused by the signalstrenght or the decoder but is a software packed synchronisation issue.
A solution is being worked out at the moment and will be released in the next couple of weeks when the testing period is finished. As the new version will use a different packetlenght and therefore the current verion 4.7 or earlier will not be able to decode the new code. Advised is to keep version 4.7 in a seperate folder so you will be able to decode data received with version 4.7 or earlier.
Klaus, DJ5HG, is working hard to work on the new concept and is running short on free time to do this. It is expected to take a week or two before hearing more.

QSL INFORMATION -

3B8FA, Patrice "Pat" Momple, has been inactive for a long time and is now QRV again. He has chosen Buzz, NI5*_DX_*, as his QSL manager. Pat has only begun using a computer about a month ago and Buzz has recommended a few logging programs for Pat to use. There will be a learning curve for computer logging, but Pat will master it quickly.
Buzz will be able to confirm only those contacts made with 3B8FA from January 23, 2012 forward. Buzz will be designing a card and having it printed. It will take about 5 weeks for Buzz to receive the cards from the printer. [K1XN]

3D2T and T2T QSL cards are at the printers now.
I expect to begin QSLing by the end of January.

FOR IMMEDIATE RELEASE: January 24, 2012

ARRL & CQ Sign Agreement to Provide ARRL’s Logbook of The World Support for CQ’s Awards

(Hicksville, NY and Newington, CT - Jan. 24, 2012) - CQ Communications, Inc. (CQ) and ARRL - the national association for Amateur Radio, have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system. The agreement was announced jointly today by ARRL Chief Operating Officer Harold Kramer, WJ1B, and CQ Communications President Richard Ross, K2MGA.

CQ's awards will be the first non-ARRL awards supported by LoTW and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow. The ARRL’s LoTW system, an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47,500 radio "hams" worldwide. It already has records of 400 million contacts and grows weekly. The target date for beginning LoTW support for WPX is April 1, 2012. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply.

ARRL Chief Executive Officer David Sumner, K1ZZ, observed that this step gives radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ's popular operating awards. "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards."

CQ President Richard Ross, K2MGA, said he is very pleased to be able to move forward with Logbook support for CQ awards. "We have had excellent results with electronic confirmations for several years," he said, "and I am glad that we are now able to begin expanding that convenience to those participants in our award programs who use Logbook of the World. We look forward to a smooth launch for WPX, and to the expansion of LoTW support to include the rest of our award programs as well."

Limited Future Activity From Jan Mayen -

Recently the Norwegian government declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators no longer visit since the main landing area is part of the Reserve. The only places left on the island which could be used as landing and camp sites are in Kvalross-bukta and in Båtvika, in the very extreme (weather-wise) southern part of Jan Mayen. This will mean that most visits to the north part of the island (where previous landings occurred) will soon be impossible. Whilst radio amateur operations may still be possible from these two locations, which are difficult to get to (rough landing, very strong winds with sand storms, no access to any shelters or resources etc), it now appears JX5O was probably the last major expedition to Jan Mayen and may well be for the coming years. It also seems that only professional, licensed staff members at the Olonkin base will be able to activate the island, with that in itself a rare occurrence. [dx-world.net]

R1/M will be deleted DXCC by Feb. 17th 2012 -

R1MV, MALYJ VYSOTSKI ISLAND (Deletion of MVI Coming!). Jari, OH2BU, reports: "The day of deletion has now been confirmed: Finnish and Russian ambassadors met today, January 17th, and exchanged the documents signed by the presidents of both countries. The new agreement of the lease of Saimaa Channel will be in force one month from today - February 17th. As the new agreement does not include Malyj Vysotskij (R1MV ...), the island will be deleted from the DXCC-list the day before, February 16th, 2012. This is, of course, subject to the decision of ARRL DXCC Committee. It's unlikely that any DXpedition will come on from the island before the deletion, although our Russian friends would have a possibility to do it." [MMMonVHF]

JX - Jan Mayen
Following recent news that operations from Jan Mayen would become rare by visiting ham groups, and likely activity only by professional, licensed staff members at the Olonkin base, Svein LA9JKA will be based on the island beginning March 22, 2012 for one year, using the callsign JX9JKA. QSL direct only to Svein Rabbevag, Brendlia 12, N-6013 Alesund, Norway. No eQSL. [dx-world.net]

V63 - State of Yap, Micronesia
William, V63YWR, is a new resident operator on Federai Island, Ulithi Atoll, (OC-078), in the State of Yap, Micronesia. He is using an IC-718 and longwire, but will soon have a Hexbeam sent from Hawaii. He uses amateur radio mainly for family phone patches with AH7G in Hawaii but will happily exchange reports in a relaxed fashion (not pile-up style) with callers after the phone patch business is over. There are apparently no telephone lines on the island and local inhabitants cannot afford to use satellite phones. This is amateur radio as it used to be - I don't remember hearing phone patches in operation since the 1970s! Phone patches in operation at 0730, worked at 0900, on 14245 kHz with Dick, AH7G, and John, KH6DLK, also in the QSO. John also holds the callsign V63JB and is helping them install an HF radio system on Federai. Dick, AH7G, will be getting QSL cards printed for V63YWR later. [dx-world.net]

Be advised that Op A logs from the top of the mountain arrive late and some QSO's therefore may not be in the current online log until the next upload. Overall, logs are uploaded about once a day. If you notice that your QSO is not showing up before the "last" QSO in the database date/time posted here, wait for the next upload. If still not there, you may want to work them again. We do realize that there are some log gaps and the team is doing everything they can to correct the situation. The gaps seem to be related to a software issue with their logging program. These gaps should not reoccur since the log collection process has been changed. At this time we cannot guarantee that we can recover the missing log data. We hope that this is not the case. But we probably will not know for sure until well after the DXpedition is over. If you have any missing QSO's from before January 27, we suggest that you try to work them again. The HK0NA team apologizes for the inconvenience. If anyone has any inquiries for any QSO's made AFTER Jan 27, and you waited one log upload past the last QSO date, please drop an email to me and I will research for you.n2oo@... will work. NOTE: I will not make any corrections to the log until I process QSL cards. If you think that there was a busted call, include a note with your QSL request. TNX! 73 de N2OO

For Immediate Release

FROZEN NEWS FROM RADIO ARCALA, CR2X, OH8X AND OH0X

It is today, February 1st, when the Northern Village of Arcala is gripped by an arctic frost weighing down on the massive antenna structures. The thermometer has hit a 2012 low - an icy reading of minus 27 C (minus 16.6 F) which makes the towers turn rather slowly. Slow are the movements of those frozen people as well.

Radio Arcala has decided to send the Frozen Four (FF) of OH2BH, OH2MM, OH2PM and OH8NC to more southerly latitudes as their balancing act. FF will soon embark on a three week long operating stint taking them to the Azores to activate CR2A and CR2X along with CU2KG and CU2KH in a variety of configurations in the ARRL CW & SSB Contests, in addition to the CQWW 160M SSB Contest.

Up in the Frozen North, their mothership OH8X will be piloted by OH6KZP in the ARRL CW Contest and by OH6UM in the ARRL SSB Contest. Moreover, the team of OH6CT, OH8WW, OH8KTN and OH8GDU will be at the controls in the WPX RTTY Contest on February 11-12. Please note that Kim, OH6KZP, 33, is the latest addition to the team at Radio Arcala. See <www.radioarcala.com>

Additionally, their associate station OH0X from Aland Islands will be activated by Pekka, OH2TA in the ARRL CW Contest.

As Radio Arcala is now celebrating their 5th anniversary, the WPX SSB Contest of March 24-25 is scheduled to be featured as an all-out team effort when OH8X members, local and overseas, will be gathering at the Northern Village of Arcala to set their strategy for the next few years, using a special callsign to be released at a later date. OH8/CU2CE and OH8/CU2DX will also be activated.

Please note that Radio Arcala is in the process of including a remote station section along with discussing the future of Amateur Radio through their Mission X, both tentatively presented at their website. <www.radioarcala.com>

And finally, QSLing for the 2011 Market Reef, OJ0X activities is well underway and 80 percent of direct QSL requests have been answered. With the completion of this phase, over the next few weeks, the OJ0X log will be posted at LoTW.

OG8X/OH8X QSL via OH2UA
OH0X QSL via OH2TA

VP6T going QRT at 1700z on Wednesday 1 Feb.After
11.5 days of continuous operation the VP6T Pitcairn DX-pedition will
now go QRT at around 17z on Wednesday 1 February. This is one day
earlier than previously expected. Our skipper has advised that it would
be better to set sail from Pitcairn earlier in order to avoid the
deteriorating weather expected on the three-day sail back to Mangareva
(FO). There will be no 160m during the final night of operation.Logs
with 53,400 QSOs have been loaded to both ClubLog and LoTW. We hope to
make the final log uploads before setting sail.73 – The VP6T Team :

FROZEN NEWS FROM RADIO ARCALA, CR2X, OH8X AND OH0X

It is today, February 1st, when the Northern Village of Arcala is gripped by an arctic frost weighing down on the massive antenna structures. The thermometer has hit a 2012 low - an icy reading of minus 27 C (minus 16.6 F) which makes the towers turn rather slowly. Slow are the movements of those frozen people as well.

Radio Arcala has decided to send the Frozen Four (FF) of OH2BH, OH2MM, OH2PM and OH8NC to more southerly latitudes as their balancing act. FF will soon embark on a three week long operating stint taking them to the Azores to activate CR2A and CR2X along with CU2KG and CU2KH in a variety of configurations in the ARRL CW & SSB Contests, in addition to the CQWW 160M SSB Contest.

Up in the Frozen North, their mothership OH8X will be piloted by OH6KZP in the ARRL CW Contest and by OH6UM in the ARRL SSB Contest. Moreover, the team of OH6CT, OH8WW, OH8KTN and OH8GDU will be at the controls in the WPX RTTY Contest on February 11-12. Please note that Kim, OH6KZP, 33, is the latest addition to the team at Radio Arcala. See <www.radioarcala.com>

Additionally, their associate station OH0X from Aland Islands will be activated by Pekka, OH2TA in the ARRL CW Contest.

As Radio Arcala is now celebrating their 5th anniversary, the WPX SSB Contest of March 24-25 is scheduled to be featured as an all-out team effort when OH8X members, local and overseas, will be gathering at the Northern Village of Arcala

to set their strategy for the next few years, using a special callsign to be released at a later date. OH8/CU2CE and OH8/CU2DX will also be activated.

Please note that Radio Arcala is in the process of including a remote station section along with discussing the future of Amateur Radio through their Mission X, both tentatively presented at their website. <www.radioarcala.com>

And finally, QSLing for the 2011 Market Reef, OJ0X activities is well underway and 80 percent of direct QSL requests have been answered. With the completion of this phase, over the next few weeks, the OJ0X log will be posted at LoTW.

10715. Press release from J28RO & XV4Y

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-02-07 10:31:17 UTC
From: F5nql@aol.com
Topic: 10715 Message: 10715

Press release :
Hi all
We, Freddy J28RO (_http://j28ro.blogspot.com_ (http://j28ro.blogspot.com/)
) and Yan XV4Y (_http://xv4y.radioclub.asia_ (http://xv4y.radioclub.asia/))
are glad to announce you the launch of a new website that we are wishing
will offer a new kind of service to the internation radioamateurs community
and the Dxers.
(http://www.qslwatch.com/) Some months ago, we share an idea about making
a website where should be published not the QSL routing informations (many
websites already serve well this purpose) but informations about the
quality of QSL answers from OM or QSL Managers.
It is true that during last decade with the increasing number of
Mega-DXpeditions, some OM (a minority) thought they could find in QSL cards a way to
finance their projects. We both agree that this is getting significantly
far from the HAM spirit, since as we do understand one OM or a group of OM
don't like to loose money answering QSL cards (2$ per QSL sent multiplied by
tens of thousands of QSO quickly make a huge amount of money), we think
that earning money with this is another story. What makes us feel better is
that many major expeditions (4W6A, T32C, VP6T and many more) have confirmed
their QSO through Logbook of the World in a matter of weeks if not hours!
QSLWatch.com (_http://www.qslwatch.com/)_ (http://www.qslwatch.com/)) is
fairly simple. You tell from what station or QSL manager you received a
card, you give it a mark and you add a comment if you want it.
The technical infrastructure is simple and is already working for a couple
of weeks, but spare time has been missing to Freddy and me in order to put
all our QSL infos in the database. As time is running we would like to
share this idea with you anyway. We hope you will help us to make this website
better sharing your QSLing experiences.
Wishing you all the best, Good DX and happy QSLing!
Fredy and Yan.

Press release:

Hi all

We, Freddy J28RO (http://j28ro.blogspot.com) and Yan XV4Y (http://xv4y.radioclub.asia) are glad to announce you the launch of a new website that we are wishing will offer a new kind of service to the internation radioamateurs community and the Dxers.
Some months ago, we share an idea about making a website where should be published not the QSL routing informations (many websites already serve well this purpose) but informations about the quality of QSL answers from OM or QSL Managers.

It is true that during last decade with the increasing number of Mega-DXpeditions, some OM (a minority) thought they could find in QSL cards a way to finance their projects. We both agree that this is getting significantly far from the HAM spirit, since as we do understand one OM or a group of OM don't like to loose money answering QSL cards (2$ per QSL sent multiplied by tens of thousands of QSO quickly make a huge amount of money), we think that earning money with this is another story. What makes us feel better is that many major expeditions (4W6A, T32C, VP6T and many more) have confirmed their QSO through Logbook of the World in a matter of weeks if not hours!

QSLWatch.com (http://www.qslwatch.com/) is fairly simple. You tell from what station or QSL manager you received a card, you give it a mark and you add a comment if you want it.

The technical infrastructure is simple and is already working for a couple of weeks, but spare time has been missing to Freddy and me in order to put all our QSL infos in the database. As time is running we would like to share this idea with you anyway. We hope you will help us to make this website better sharing your QSLing experiences.

Wishing you all the best, Good DX and happy QSLing!

Fredy and Yan.

Halley 5 QRT -

Hi guys,
The antennas and masts at Halley 5 were removed yesterday, so the base is now officially QRT. I'll be flying back north in about a week and a half. I'd like to put Halley 6 on air again over the next two weekends, but can't make any promises at the moment.

425 DX NEWS MAGAZINE ---> The January 2012 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

4W0VB ---> Vlad, UA4WHX is now QRT from Timor Leste. He was QRV as 4W0VB from the main island of Timor (OC-148) between 11 January and 8 February, with a brief activity as 4W0VB/p from Atauro Island (OC-232). All of the QSOs have been uploaded to LoTW. QSLling instructions for paper cards can be found at www.qrz.com/db/4W0VB

HK0NA ---> Malpelo 2012 went QRT around 17 UTC on 5 February, after breaking the "tent and generator" DXpedition record set by VP6DX back in 2008 (183,686 QSOs). The preliminary QSO total for HK0NA is 192,089, but "we expect this number to rise a little as we sort things out". The OQRS at at www.hk0na.com has been turned on since 6 February; OQRS direct requests will be processed first, but the cards "won't be ready for some months". You can request your QSLs one of four ways: OQRS Direct, OQRS Bureau, via N2OO direct (Bob Schenck, P.O. Box 345, Tuckerton NJ 08087-0345, USA) or bureau. The HK0NA log is expected to be uploaded to LoTW "about 6 months after the conclusion of the DXpedition".

IOTA BASH ---> The eighth annual IOTA Bash will be held on 23-24 March in Boerne, Texas, about 20 miles northwest of San Antonio. The agenda will include presentations on some of the most recent IOTA expeditions and a nice social programme. Details and registration form are available on the IREF website (www.islandradio.org). [TNX AB5EB]

QSL 7Q7HB ---> "I have been the QSL manager for quite a few 7Q7 stations in the past 21 years", Allan G0IAS says. "With the death of Harry (7Q7HB) there is no one else active now in 7Q that I am the manager for. From 12 December 2012, the anniversary of the death of Harry, I will no longer send out any QSL cards, for any of the 7Q7 stations I manage. I think that if an operator does not send for a card, he does not need it". QSL direct only to Allan Hickman, The Conifers, High Street, Elkesley, Retford, DN22 8AJ, United Kingdom. The Malawi stations managed by G0IAS are 7Q7AH, 7Q7BW, 7Q7BX, 7Q7FM, 7Q7HB, 7Q7JL, 7Q7LA, 7Q7MH, 7Q7RL and 7Q7RM.

VE3LYC ---> The RAC Board of Directors has announced the selection of Dr. Cezar Trifu, VE3LYC as the Canadian Radio Amateur of the Year for 2011. "Dr. Trifu exemplifies the Canadian Amateur with numerous IOTA DXpeditions

since 2008 covering Canadian Islands and recently overseas islands. He has raised the profile of Canadian Amateur operations world-wide with thousands of QSOs with DXCCs covering over six continents".

+ SILENT KEYS + NASA astronaut Janice Voss, KC5BTK passed away on 7 February at 55 years of age. She flew in space five times between 1993 and 2000, and participated in making amateur radio contacts via the Space Shuttle Amateur Radio Experiment (SAREX), the precursor to the ARISS programme.

10723. CQWW WPX Contest on RTTY

Yahoo group: GOLIST (2011 — 2012)
Date: 2012-02-10 21:26:35 UTC
From: GOLIST
Topic: 10723 Message: 10723

Hello DXers/Contesters:

With the upswing in propagation in recent months, and the obvious increased interest in the Digital Modes, this weekend should be interesting and a lot of fun for DXers and contesters alike. This is the weekend for the CQWW WPX Contest on RTTY. Rather than give you ALL of the rules (3 pages long) I'm going to give you the highlights and if you're interested you can go to the CQ web site and get the whole thing<www.cqwpxrtty.com>. Here are the basic rules….

****
**
I. Objective: For amateurs worldwide contact as many amateurs and prefixes as possible during the contest period.

II. Period of Operation: 48 hours - 0000 UTC Saturday, February 11 to 2359 UTC Sunday, February 12, 2012. Single Operator stations may operate 30 of the 48 hours–off times must be a minimum of 60 minutes during which no QSO is logged. Multi-operator stations may operate the full 48 hours.

III. Bands: Only the 3.5, 7, 14, 21, and 28 MHz bands may be used. Observance of established band plans is strongly encouraged.

IV. Terms of Competition for All Categories:
(a) All entrants must operate within the limits of their chosen category when performing any activity that could affect their submitted score. Only the entrant’s callsign may be used to aid the entrant’s score.
(b) A different callsign must be used for each entry
**
(d) Self-spotting or asking other stations to spot you is not allowed.
(e) Use of QSO alerting assistance is permitted in all categories.
**
V. Entry Categories:
A. Single Operator Categories: All operating and logging functions are performed by one person (the operator). Only one transmitted signal is permitted at any time.
(a) Single Operator High (All Band or Single Band): Total output power must not exceed 1500 watts.
(b) Single Operator Low (All Band or Single Band): Total output power must not exceed 100 watts.
(c) Single Operator QRP (All Band or Single Band): Total output power must not exceed 5 watts.
B. Single Operator Overlay Categories:
Single Operator entrants may submit their log for one of the following categories by adding a line in the Cabrillo log file header called CATEGORY-OVERLAY. Overlay entries are grouped into high power& low power in the results.
(a) Tribander/Single Element (TB-WIRES): During the contest an entrant shall use only one (1) tribander (any type, with a single feed line) for 10, 15, and 20 meters and single-element antennas on 40 and 80 meters.

(b) Rookie (ROOKIE): To enter the operator must have been licensed three (3) years or less on the date of the contest. Indicate the date first licensed in the SOAPBOX field.
C. Multi-Operator Categories (All Band, High power only):
(a) Single-Transmitter (MULTI-ONE): Only one transmitted signal is permitted at any time. A maximum of ten (10) band changes may be made in any clock hour (00 through 59 minutes).
(b) Two-Transmitter (MULTI-TWO): A maximum of two transmitted signals is permitted at any time on different bands.. The log must indicate which transmitter made each QSO. Each transmitter may make a maximum of eight (8) band changes in any clock hour (00 through 59 minutes).
(c) Multi-Transmitter (MULTI-UNLIMITED): No limit to transmitters, but only one transmitted signal (and running station) allowed per band at any time. Use a separate serial number sequence for each band.
VI. Exchange: RS(T) report plus a progressive contact serial number starting with 001 for the first contact.
Note: Multi-Two and Multi-Unlimited entrants use separate serial number sequences on each band.

VII. Contact Points:
(a) Contacts between stations on different continents are worth three points on 28, 21, and 14 MHz and six points on 7 and 3.5 MHz.
(b) Contacts between stations on the same continent, but different countries, are worth two points on 28, 21, and 14 MHz and four points on 7 and 3.5 MHz.
(c) Contacts between stations in the same country are worth one point on 28, 21, and 14 MHz and two points on 7 and 3.5 MHz.

VIII. Prefix Multipliers: The prefix multiplier is the number of valid prefixes worked. Each PREFIX is counted only once regardless of the band or number of times the same prefix is worked.
(a) A PREFIX is the letter/numeral combination which forms the first part of the amateur call. Examples: N8, W8, WD8, HG1, HG19, KC2, OE2, OE25, LY1000, etc. Any difference in the numbering, lettering, or order of same shall count as a separate prefix.
(b) Special event, commemorative, and other unique prefix stations are encouraged to participate. Prefixes must be assigned by the licensing authority of the country of operation.

IX. Scoring: SEE THE CQ WEB SITE.

X. AWARDS: SEE THE CQ WEB SITE

XI. CLUB COMPETITION: SEE THE CQ WEB SITE

XII. Instructions for Submission of Logs: We would appreciate receiving all logs in electronic format. Electronic submission of logs is required for anyone competing for an award and for all who use a computer to log the contest or prepare contest logs.
(a) The log MUST show the following for each contact: correct time in UTC, frequency (or band), call, serial number sent, and serial number received. A log without all required information may be reclassified to Checklog.
(b) Single-band entrants are required to include all contacts made during the contest period, even if on other bands. Only contacts made on the band specified in the Cabrillo header or summary sheet will be Considered for scoring purposes. Logs with contacts only on one band will be classified as single band entries.
(c) The CABRILLO file format is the standard for logs. For detailed instructions on filling

out the CABRILLO file header, see the WPX RTTY Contest Web site<www.cqwpxrtty.com>. Failure to fill out the header correctly may result in your entry being placed in the wrong category or reclassified as a Checklog.
Note: U.S. stations must indicate the location of where you operated from in the CABRILLO header (e.g., LOCATION: OH).
(d) E-mail or Web upload is the expected method of log submission. Logs in CABRILLO format should be sent to<rtty@...>. Include only your callsign in the “Subject:” line of your email. Web upload of logs is available on the CQ WPX Web site at<www. cqwpxrtty.com>. All logs received via email will be confirmed via e-mail. A listing of logs received can be found on the CQ WPX RTTY Web Site.

AGAIN, This is NOT a complete set of the rules.

Enjoy the weekend, HAVE FUN, and I'll see you on the air ! ! !

73,
Carl, N4AA

10724. St Paul Island DX NEWS

Press Release #1
St Paul Island is called the Graveyard of the Gulf and that is where an international, seasoned team of DXers will be heading to later this year.

Plans are well under way for a 10-man team to activate this now wanted DXCC entity, which was last on air in 2005. When you consider most needed entities (perhaps out with the Top 10) are activated every five years or so, it is now time to mount a serious effort from CY9.

Most operators will be unaware that in 2010, St Paul Island became the highest mover on DX Magazines most wanted list; from #77 to #47. Today, according to that list and ClubLog, CY9 is more needed than entities such as Tokelau (ZK3) or PY0T (Trindade& Martim Vaz).

The team consists of Mike AB5EB, Oscar EA1DR, George EA2TA, Christian EA3NT, Simon IZ7ATN, Col MM0NDX, Bjorn SM0MDG, Vicky SV2KBS, Steve VA3FM and Kevin VE3EN

From late July to early August, IOTA contest included, the group will be active all bands, modes (160-2m) with special attention on 6m and 160m if propagation allows.
A website is currently under construction and will be ready in a few short weeks where much more info can be found.
QSL manager for the expedition is M0URX.

*A new data file has been uploaded to the Golist download page. This is the FEBRUARY 1202-A data file. Use the Download button in your GoWin program for quick access to the download page. The link is http://golist.net/dlauth.cfm

It is recommended that you close your GoWin program before installing the new data file. This just helps prevent any errors from happening.

Just a gentle reminder that Phil, G3SWH and John, G3OLU aka EA5ARC
will be active as 3DA0PW from the Hawane Resort in western Swaziland
(3DA) between 21st and 29th February 2012.
The Hawane Resort has a well equipped station with Elecraft K3
transceivers, ICOM IC2KL amplifiers, an A4S at 24m, an A3WS at 20m, a
wire 4 square for 40m and a vertical for 80m complete with 30 x 20m
long radials
Activity will be on CW only on all bands 80-10 metres. There will be
no 160, 60, 6 metres or EME activity.
Propagation permitting, we plan to have two stations on the air for as
many hours every day as is possible. Our main objective is to work as
many European, North American and ROTW stations on as many different
bands as possible and hope to make at least 15,000 QSOs.
QSL via G3SWH, either via the OQRS facility on Phil's web site
www.g3swh.org.uk <http://www.g3swh.org.uk> (preferred), direct with
SAE and adequate return postage, or via the bureau.
Subject to a good Internet connection, there will be on-line log on
Phil's web site and on Clublog as well as daily uploads to LoTW.

73 for now and TIA

Hello DXers/Contesters:

Although the propagation numbers aren't all that super this morning, there is some good DX being reported…..

3B9 from RODRIGUES on 17 CW
6O3A from SOMALIA on 17 CW
H40FN from TEMOTU on 80 CW
ZK2C from NIUE on 80 CW and 20 RTTY

This coming weekend is the ARRL DX Contest on CW…..
I'll be sending you a list of those ANNOUNCED OPERATIONS from Bill, NG3K. It appears those solar number are improving over the next several days, so we can look for decent high frequency propagation for the contest.

I got a call this week about Marv, W2FGD. Marv has had a heart attack/stroke. Perhaps it would give him some comfort to know his friends are thinking of him, if we filled his mail box with QSL cards, wishing him well. His address is: MARV FRICKLAS, 814 S. OCEAN AVE, FREEPORT, NY 11520-6327.

Until next time, enjoy the chase, but HAVE FUN ! !

*Hi folks
Had a bad weekend here, I went blind due to capillaries leaking in my good eye. After some work at the Doc's office I am improving. I am able to spend a few hours each day now on the pc. It is taking me a long time to make updates and I may not be able to produce a new data file Monday. If the changes to my eye occur faster than expected, there is hope.

Please keep all the information coming and I will get it caught up, it just may take longer than normal.

Thanks

Italian National Antarctic Museum of Genova: On October 2, 1998 the Exhibit Centre was inaugurated in the area of the Ancient Port, a new pole of cultural and tourist attraction of Genova. The Museum aims to inform the public about the Antarctic continent and the research activities, especially the ones related to the biological sector, carried out during the expeditions to Antarctica.
Italian National Antarctic Museum of Siena: Situated at the Didactical Complex of Laterino, the exhibit has the aim to promote the knowledge of Antarctic continent and connected research activities with special emphasis on the geological, climatological and environmental evolution of the icy Continent.
Italian National Antarctic Museum of Trieste: Situated at the Comprensorio San Giovanni, the exhibit site made available by the Department of Geology of the University of Trieste, has the aim to promote the knowledge of any documentation of the history of exploration of the continent. Its objectives are the conservation, study and enhancement of Antarctic materials relating to the marine geology and marine geophysics research fields, as well as of the history

of the explorations of the continent.

[IARU-R2-News 162] Special WRC Report Number Three - The Amateur Radio Service Gains A Band Near 500 kHz
2012-02-15

[Editors note: Subject to approval by Industry Canada, operation on this band is not permitted in Canada at this time. Radio Amateurs of Canada will be working with Industry Canada through the Radio Advisory Board of Canada (RABC) to work out the various details on amateur usage of this band in Canada.]
472-479 kHz. The worldwide amateur radio service has a new frequency band, 472 to 479 kHz. It is a secondary allocation. There are other services in that portion of the spectrum that must not be interfered with by the amateur operation.

The aeronautical radionavigation service is a primary service in the band 415-495 kHz in the following areas: Australia, China, the French overseas communities of Region 3, Korea (Rep. of), India, Iran (Islamic Republic of), Japan, Pakistan, Papua New Guinea and Sri Lanka.

The aeronautical radionavigation service is a primary service in the band 435-495 kHz in the following areas: Armenia, Azerbaijan, Belarus, the Russian Federation, Kazakhstan, Latvia, Uzbekistan and Kyrgyzstan.

The amateurs are allowed to use the band so long as it does not cause interference to this primary service or the maritime mobile service operating in the 472-479 kHz band. There are some countries that will not allow amateur radio operation in the 472-479 kHz band. The use of the frequency band 472-479 kHz in Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia and Yemen is limited to the maritime mobile and aeronautical radionavigation services. The

amateur service shall not be used in the above-mentioned countries in this frequency band, and this should be taken into account by the countries authorizing such use.

The ITU Radio Regulations provide that radio amateurs are limited to 1 watt (e.i.r.p.) however administrations whose territory is beyond 800 kilometers from the borders of the following countries may increase the operating power to 5 watts (e.i.r.p.): Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iran (Islamic Republic of), Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Morocco, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia, Ukraine and Yemen.

The change becomes effective with the adoption of the Final Acts of the Conference. Of course, it will be determined by each administration around the world as to what modes and bandwidths will be used in this portion of the spectrum and when hams in that country will have access to the spectrum.

More activities from the WRC-12 will be reported at the end of the WRC. The WRC continues until 17 February. There is an effort underway to place an amateur radio agenda item on the agenda for the next WRC which will take place in 2015.

3DA0PW – Swaziland
Monday Feb 20, 2012

Phil, G3SWH and John, EA5ARC will be active as 3DA0PW from the Hawane Resort in western Swaziland between February 21-29, 2012.

The Hawane Resort has a well equipped station with K3 transceivers, IC2KL amplifiers, an A4S at 24m and an A3WS at 20m, a wire 4 square for 40m and a vertical for 80m complete with 30 x 20m long radials, courtesy of Daniel ZS6JR and his company CQ-DX African Safaris.

Activity will be on CW only on all bands 80-10 meters. There will be no 160, 60, 6 metres or EME operation. Propagation permitting, they plan to have two stations on air for as many hours every day as is possible. Main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs.

Subject to a good Internet connection, there will be an on-line log as well as daily uploads to LoTW.

QSL via G3SWH.

They will operate 160-10m running a minimum of three stations 24/7. Dates of the expedition have had to change because of a motor sport event taking all the accomodation so new dates will be from 23 November to 3 December. This will include an entry in the CQWW CW contest. You can follow progress on their website at:
www.zs2dl.co.za/7P8D.html [dx-world.net]

9K2F - Failaka Island

VK8BI - Bremer Islets
By Craig VK4LDX
It’s been six months since I announced that I’d be conducting another IOTA DXpedition, this time to Bremer Island OC-185. I’m delighted to say that everything is going to plan. The flights are booked and paid for. The charter boat, accommodation and generator have all been arranged and confirmed. Full info at: oc185.blogspot.com/ [dx-world.net]

Deleted Country -
According to the Finnish Ministry of Transportation and Communication, the Saimaa Canal Treaty between Finland and Russia has been finalized by relevant Finnish and Russian authorities through ratification.
The Treaty has entered into effect with a date of February 17, 2012.
Malyj Vysotskij Island (MVI), R1M, is no longer included in the Treaty.
Thus, MVI will be deleted from the DXCC list as of February 17, 2012, and added to the Deleted Entities List.
Administratively at HQ, we will not make the necessary changes to the DXCC system until after the final data processing for 2011 is complete -- this includes the tables shown in Logbook of The World.
DXCC members will see their current entity totals drop by one on their Mixed awards, and on the bands and modes where MVI credit is given. They will also see their DXCC Challenge totals drop commensurately. [ARRL]

Pirate Alert!
Message from John Mclinden ZS1LF/ZD9GI -
I don't operate CW, but I see there has Pirate using ZD9GI call sign, he was busy on 40m. ZD9GI Gough Island (WAP ZAF-Ø5) is no longer operational as I am QRT from the 15 September 2011. Any new contacts will be a pirate operating and QSL cards will not be honored. I have updated my QRZ page as well putting the alert on it. It was ON5NT , that warned my about the pirate. Actually there is no Hams on Gohgh Island at all; it will take a few years for one to go down again. [I1HYW]

South Sudan assigned Z8 call block
The Republic of South Sudan has received the prefix block Z8A-Z8Z from the ITU.

Mixed awards, and on the bands and modes where MVI credit is given.
They will also see their DXCC Challenge totals drop commensurately.

Look out for GI100MGY, From Titanics Home City of Belfast During the
Month of
April - MGY was the Callsign of the Ill-fated ship, which had been
launched in
Belfast in May 1911. The GI100 is a very special prefix, kindly
allocated to the
"Project WhiteStar" special event team by Ofcom, the UK regulator. We
plan to be
active all modes, 80m - 10m, with a 2 minute station silence at
01:47am on 15th
April, the exact time when the vessel sank, in memory of all those who
lost
their lives that night. On the evening of 14th/15th, most operation
will be on
CW. QSL will be via Buro, or direct to GI4FUE, details will be in QRZ.com

Hello DXers:

Announcements come at odd times, so here are a few items just in this afternoon that should be of interest to many of you…….

6 METERS IN SENEGAL
Francois now reports: "6V7SIX: 6m band in Senegal, it's a go!
As of March 1st, 2012, the Saly Amateur Radio Club station (ADRASEC Senegal) will be allowed to operate with the callsign *6V7SIX* on the band 50-51 MHz. This is a temporary authorization valid until the new ITU Radio Regulations (WRC-12) come into force, normally by the end of 2012. A dual watch of 50.110 MHz (Intercontinental calling frequency) and 50.210 MHz (French calling frequency) will be performed by the Radio Club operators. Watch for the next opening on the Magic Band and call us!
Francois Normant, 6W7RT"

Joe, W8GEX released an announcement this afternoon on his latest DXpedition plans.
"Joe, W8GEX and Craig K9CT are pleased to announce they are planning another DXpedition to a rare DX entity. Joe and Craig were the co-leaders of the very successful PJ7E DXpedition on 10-10-10. Before that, they were part of the team that re-activated Midway K4M in 2009.

This DXpedition will be to Swains Island in September 2012. Swains ranks number 31 on the DX Magazine Most Wanted Survey and number 30 on Club Log's Most Wanted list. Because of the anticipated demand, a highly experienced team of 20 operators has been formed. The team will operate six stations over a 14 day period, from 160 to 6 meters on all modes, using the callsign NH8S. Great emphasis will be put on Europe where it is most needed.

Team members include AA4NN, DJ7JC, DL3DXX, I8NHJ, K5AB, K6MM, K6TD, K9CT, KH7Y, N2TU, N6HC, NA6M, ND2T, NI6T, SM5AQD, W4BUW, W6KK, W8GEX, WB4JTT, and WB9Z.

Swains is a privately owned island and the only way to get there is from American Samoa via ship. The time frame of this operation may not be the best for the low bands, but dates are dictated by transportation and weather. The team of international operators will first gather in Honolulu and then travel to American Samoa together. Landing permission has been granted for the tent and generator operation by the owner for this timeframe.

Our website, (http://www.nh8s.org/) developed by team member John, K6MM, will provide updates as they become available. There are no communication systems on Swains, but logs will be uploaded daily via

satellite phone. Later, the group will also have an OQSL link on the website for easy QSLing.

All equipment must be sent from the US via cargo ship in June. Location, transportation, island costs, and other logistics make this a costly trip. Therefore, donations are very much appreciated. Details of how to donate to help defray our expenses are on the website.

We want to thank ICOM, who will be supplying IC7600s for our use. Thanks also to Joe, AA4NN, who will be the QSL manager, and to Carl, N4AA of the DX Magazine who will sponsor the log search.

73,
Carl, N4AA

SPECIAL EVENTS -

Special Event Station - VO1AA - April, 25, 2012
2012-02-26

The Society of Newfoundland Radio Amateurs (SONRA) will make history on April 25, 2012

April 25th each year marks the birthday of Guglielmo Marconi, who received the first wireless signal at Signal Hill, Newfoundland. This April 25th, SONRA will celebrate the event with making an Amateur Radio contact with Princess Elettra (Marconi) who will be in Bologna Italy to celebrate her father's birthday. It is planned to have the Canadian Heritage Minister, the NL Premier, the City of St. John's Mayor along with the NL Lieutenant Governor, exchange greetings with the Princess via Amateur Radio from VO1AA at Cabot Tower.

This is the first time that this event has been attempted, and it is anticipated that it will be a high level media exposure for Amateur Radio in Canada.

SONRA appreciates the wonderful relationship that it enjoys with Parks Canada, Signal Hill National Historic Site, and looks forward to many years of commemorating this important event.

RAC Bulletin 2012-015E - Earle Smith, VE6NM - SK
2012-02-25

It is with regret that Radio Amateurs of Canada has learned that Earle Smith, VE6NM, a RAC past President, passed away peacefully after an illness on Friday, February 24th.

Earle had served as President of RAC from late 2004 to the end of 2007 and was well respected by amateur radio operators both within Canada and Internationally. He was a gentleman and friend to all hams and a strong advocate for amateur radio and for the Radio Amateurs of Canada.

All who knew Earle respected him as a leader, a friend and a force for good in the amateur radio community. We will miss him. The amateur community can post condolences which will be forwarded to the family at http://earlesmith.rac.ca.

Geoff Bawden, VE4BAW
President and Chairman of Radio Amateurs of Canada

ANTARCTICA -
Neumayer Station III will continue to be on the air throughout the upcoming Antarctic winter: Lars, DL1LLL, is the radio operator of the 32nd wintering team, and he is active until February 2013, using the call sign DP0GVN. His main operating mode is PSK31, but he wants to try other modes later. QSL cards will be handled by Dominik, DL5EBE. Lars' online logbook is available at http://www.hrdlog.net/ViewLogbook.aspx?user=DP0GVN [antarctic list]

SWAINS ISLAND DXPEDITION
Joe, W8GEX released an announcement this afternoon on his latest DXpedition plans.

"Joe, W8GEX and Craig K9CT are pleased to announce they are planning another DXpedition to a rare DX entity. Joe and Craig were the co-leaders of the very successful PJ7E DXpedition on 10-10-10. Before that, they were part of the team that re-activated Midway K4M in 2009.

This DXpedition will be to Swains Island in September 2012. Swains ranks number 31 on the DX Magazine Most Wanted Survey and number 30 on Club Log's Most Wanted list. Because of the anticipated demand, a highly experienced team of 20 operators has been formed. The team will operate six stations over a 14 day period, from 160 to 6 meters on all modes, using the callsign NH8S. Great emphasis will be put on Europe where it is most needed.

Team members include AA4NN, DJ7JC, DL3DXX, I8NHJ, K5AB, K6MM, K6TD, K9CT, KH7Y, N2TU, N6HC, NA6M, ND2T, NI6T, SM5AQD, W4BUW, W6KK, W8GEX, WB4JTT, and WB9Z.

Swains is a privately owned island and the only way to get there is from American Samoa via ship. The time frame of this operation may not be the best for the low bands, but dates are dictated by transportation and weather. The team of international operators will first gather in Honolulu and then travel to American Samoa together. Landing permission has been granted for the tent and generator operation by the owner for this timeframe.

Our website, (http://www.nh8s.org/) developed by team member John, K6MM, will provide updates as they become available. There are no communication systems on Swains, but logs will be uploaded daily via satellite phone. Later, the group will also have an OQSL link on the website for easy QSLing.

All equipment must be sent from the US via cargo ship in June. Location, transportation, island costs, and other logistics make this a costly trip. Therefore, donations are very much appreciated. Details of how to donate to help defray our expenses are on the website.

We want to thank ICOM, who will be supplying IC7600s for our use. Thanks also to Joe, AA4NN, who will be the QSL manager, and to Carl, N4AA of the DX Magazine who will sponsor the log search.

73, Carl, N4AA [K1XN]

*Hi John

Yes sadly it's true....Ron ZL1AMO passed away last night New Zealand Time 6 March. He was in Palliative Care. More details will follow. He was certainly well known and liked. A real legend in our time for the Dxpeditions he did around the Pacific since the 80's.

Looking at the humorous side of things I was privileged to some info in the past few days and one of his last wishes was to work 3C0E on CW...Ron needed that one! There was chatter about getting a schedule going but unfortunately that will not happened now of course but just shows the nature of the man and his love for amateur radio.

The situation of civil war in Mali between the government and Tuareg
is getting worse lately and, for safety reasons, the authorities do
not issue licenses to radio amateurs who may be targeted because of
radio equipment. For this reason the dxpedition is postponed until a
later date

DXCC NEWS ---> 6O0M (Somalia 2011), 9U3TMM (Burundi, December 2011-January 2012) and T6BP (Afghanistan, current operation commencing in 2011), as well as AX/VK0TH (Macquarie Island), have been approved for DXCC credit. If you had either of these operations rejected in a recent application, send a

note to bmoore[@]arrl.org to have your record updated. Once updated, this will be reflected in your LoTW account and/or in the live, daily DXCC standings on the website (www.arrl.org/dxcc).

LoTW ---> Jacques, F1VEV says he is in the process of uploading to LoTW his logs for TR8CJ (1988-90) and V85CJ (1990-94).

PY0S ---> Amateur radio activities have been banned from St Peter & St Paul Archipelago. The Brazilian Interministerial Commission for the Resources of the Sea's programme aimed at "the exploration, use, conservation and management of natural resources in the archipelago and its surroundings" specifically excludes amateur radio expeditions as they "do not meet the objectives" of the programme itself (www.mar.mil.br/secirm/i-proarq.htm). LABRE and Brazilian DX groups are mobilizing the support of government representatives to try and reverse the decision. [TNX PY2YP]

RSGB COMMONWEALTH CONTEST ---> The 75th edition of the Commonwealth (BERU) Contest (www.beru.org.uk) will be held on 10-11 March, from 10 UTC to 10 UTC, on 80, 40, 20, 15 and 10 metres CW. Only operators located within the Commonwealth or British Mandated Territories are eligible to enter, so please check the list at www.rsgbcc.org/hf/information/codes.shtml before calling.

TZ5T CANCELLED ---> The 12-27 April expedition to Mali [425DXN 1087] has been postponed indefinitely for security reasons, as the country is in the midst of an uprising by separatist Tuaregs and the conflict is worsening.

+ SILENT KEYS + The DX community worldwide mourns the loss of Ron Wright, ZL1AMO, who passed away on 6 March at 75 years of age. A top-notch CW operator, for some 25 years he conducted countless DXpeditions throughout the Pacific, and was inducted into the CQ DX Hall of Fame in 1985.
Other recently reported Silent Keys include Hiroshi Kuroda (JA1FRQ) and Wan Morhisham bin Mokhtar (9W2GL), president of the Malaysian Amateur Radio Transmitters' Society (MARTS).

Does anyone have a QSL Route for PY0S/PS7JN. All I can find is to send to PS7JN. It appears that he may not receive mail sent to the address listed on qrz.com and the e-mail listed there bounces.

Thanks,

Hello DXers:

Here we go again ….. Lee, KH6BZF reports this morning……
"HEADS UP .... FOUR MAJOR FLARES FROM SOLAR REGION 1429 BEFORE IT PASSES OFF THE RIGHT SIDE OF THE DISK.

Space Weather News for March 14, 2012
http://spaceweather.com
INCOMING CME: Sunspot AR1429 unleashed another strong flare (category M 7.9) on March 13th. The explosion produced a significant coronal mass ejection (CME), which forecasters say should reach Earth on March 15th. Geomagnetic storms are possible when the cloud arrives. Check <http://spaceweather.com for updates>.

SUNDIVING COMET: A bright comet related to sun grazing Comet Lovejoy is diving into the sun. The orbiting Solar and Heliospheric Observatory (SOHO) is monitoring the comet's death plunge even as the sun peppers the spacecraft with energetic particles accelerated by the March 13th solar flare. Images of the comet are featured on today's edition of <http://spaceweather.com>."

Lee adds: YOU CAN OBTAIN THE LATEST "SOLAR AND GEOMAGNETIC" DATA BY GOING TO QRZ.COM AND CLICKING ON KH6BZF..... AT THE HEAD OF MY BIO YOU WILL FIND THE LATEST 3-HR UPDATED INFO.

For the past several days, a couple of callsigns have been showing up on 20 & 40 SSB from LIBYA. One gives the call 5A/UTIG and the name "Anatoly" another signs 5A2FHE with the name "FAISAL" and is giving an Italian station for QSLing. Neither of these can be immediately verified but it is "POSSIBLE" these could be valid …. "Work First, Worry Later (WFWL)" would be seem to be in order for them.

QSL MANAGER OF THE YEAR
The Golist QSL Manager Data Service is reviving its QSL Manager of the Year Award.
The purpose of this award is to recognize the service of QSL Managers world wide for the service they provide to the World Wide DX Community Nominations for this award will be accepted by the Golist from DX and Contest clubs, world wide, for the year of 2012. Ending Date: August 1, 2012 Each DX club and Contest club is encouraged to poll their members for their nominations for the Top 5 QSL Managers for 2012. The definition of a QSL Manager for this award is any person who confirms contacts via printed QSL Card for any station other than their Primary Call Sign.
Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters, as voted by members of their club.

Votes should be tabulated and sent to the Golist by August 1, 2012, to be eligible for the QSL Manager of the Year award. Each club world wide may only send one submission for voting purposes. Records of submission will be maintained by the Golist A plaque, donated by DX Publishing, Inc., publisher of QRZ-DX and THE DX MAGAZINE, will be awarded to the QSL Manager of the Year selected, at the W4DXCC Convention held in Pigeon Forge, Tennessee in September 2012. The recognized format for your clubs submission is as follows: Club Name; Club Officer (Name, Call Sign, club office and email address); Top 5 QSL Manager Nominees (list name and callsign). In the subject line of your official email: *QSL Manager of the Year-2012* and send to: <golist@...>.

Until next time, enjoy the chase and HAVE FUN ! !

Carl, N4AA

Triathlon DX Contest announcement

It all started in August of 2011. That was about when it occurred to Mike, SV5BYR that a big Greek Contest was missing from international Ham Radio Contest Calendar. By the end of September this idea became mature and so the "Triathlon" was born! A triathlon is a multi-sport event involving the completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word. We had to change a bit the name to Triathlon DX Contest to match our activity.

Actually, trying here to simulate the original Triathlon athletic event, we involved three major ham radio modes, SSB, CW and RTTY. It will be a 24 hour non-stop event divided in three sections, each one devoted to a different mode. There are some tentative rules of the contest that you can take a look. It will take place on Saturday, the 1st full weekend of February, debuting on 02-02-2013.

After all, what makes this particular contest unique is the special gift for the winner! (take a look to the prize page)

In this point we have to mention all the Greek amateurs who are working to make this event alive: SV1DPI, SV1NK, SV2AGW, SV2DCD, SV5BYR, SV7JAR, SV8CS, SV8RX, SV9GPV, SV9DJO. There is still a lot of work to be done and more details to be announced. Stay tuned!

1. By now there are no direct Africa QSLs left unanswered.

2. If you sent your QSLs directly but you have not received them, then it probably is that your cards have been lost either way. Contact me to check their status.

If you need a paper QSL, request it directly, not via the buro. All QSOs have been LoTW uploaded.*

Once again K3PLV and K8PT will be operating from the island country of Jersey (EU-13). We will be on all HF bands from 160 – 10, including the WARC bands, using SSB, CW, and RTTY. Operation will begin March 27th and run through April 3rd. I will use the call MJ/K3PLV and my friend will use MJ/K8PT. I would enjoy working as many area hams as possible. This includes Northwestern Pennsylvania, Northeast Ohio, and Southwest New York. Also any Erie area hams who are now living in other states. One way to find where we are operating if you have internet access, is to go to http://www.dxsummit.fi/DxSpots.aspx You will see the last 50 DX spots which are updated every minute. If you click on the “search button” and enter mj/k3plv, you will see the last spots entered for me. Also I will try to get on the Fort Pierce Connection, which is on 14.340 MHz at 8 am local time (8:30 Sunday). It doesn’t take a great deal of power or large antenna arrays to work me. I work many mobiles from the United States and also many people running 5 watts or less. This will be my 13th trip to Jersey and I’m looking forward to operating and seeing my friends. Last year I worked 20 area hams and had over 4,700 QSOs. Let’s see if we can beat that.
